A Gladiators Recipe.

At a country house one morning the guests were discussing at breakfast the right of way of making a sponge bag when the sponge has been used and is consequently waterlogged.

Mr. Gladstone, who had apparently been solely absorbed by his morning's correspondence, suddenly closed the discussion by informing the party that they were all wrong.

"The only proper method is to wrap it up in your bath towel and stamp upon it. Then put it in your sponge bag. You will find it perfectly dry."

GO AT IT RIGHT.

Friends and Neighbors in Stanford Will Show You How.

Get at the root of the trouble. Rubbing an aching back may relieve it. But it won't cure it. You must reach the root of it—the kidneys.

Doan's kidney pills go right at it; Reach the cause, relieve the pain. They cure, too, so Stanford people say.

Capt. Thomas Richards, W. Main street, Stanford, Ky., says "Many years ago my kidneys began to trouble me. My back grew so lame that I could not stoop and I slept poorly at night. Sometimes an almost complete retention of the kidney secretions occurred. Then again I had a frequent desire to pass them. When the secretions were voided, a burning pain was in evidence I finally had the good fortune to learn of Doan's Kidney Pills and I commenced their use. This remedy gave me great relief and in view of my experience, I consider it the best preparation of its kind I have ever taken. I have recommended Doan's Kidney Pills to scores of people and everyone has reported that good results have followed their use."

For sale by all dealers. Price 50c. Foster-Milburn Co., Buffalo, New York sole agents for the United States.

Remember the name—Doan's—and take no other.

Think twice before selling the good cow and then don't sell her.

Care must be taken not to get the cream too early for churning. Remember the cow likes regular meal hours as well as you do. See that the dairy cow at all times has access to clean, fresh water.

The best thing with which to clean a separator is a small, stiff brush. If the cow is to produce pure milk she must have pure food and water.

One cannot properly clean milk pails without the use of boiling water. The hand separator has been a step to greater dairy profits on many a farm.

The real butter-maker of our country is the farm cow whose milk never goes to the dairy.

As the calf is so in the cow. Pure milk is produced means a pure cow when she comes to maturity.

The Iowa state dairy law forbids selling milk from cows within two weeks of calving and five days after the dairy horse, even where stables are darkened and the cattle kept in a part of the day, the loss in milk yields resulting from the annoyance caused by flies is often quite material.

Milk containing less than twenty per cent. of butter-fat cannot be churned at a temperature below 58 degrees, but milk containing 25 per cent. or more can be churned at lower temperature with good results.

Like a Man.

"Well, old Jenkins certainly bore his misfortune like a man," said his friend.

"Ah! Courageous, and all that sort of thing, what?" said the man who did not know Jenkins.

"Well, not so much that," said his friend. "As a matter of fact, he made rather a fuss about it. What I meant was that he blamed it all on his wife."
