BRONCHITIS

To Whom It May Concern
Bluevale, Ont., May 4, 1916—"I was sick for two years with chronic bronchitis and a consequent run-down condition. I received no benefit from doctors or from a trip which I took for my health, and I had to give up work. Vinol was recommended, and from the second bottle I commenced to improve. I gained in weight and strength, my bronchial trouble disappeared, and I am at work again. It is the combined action of the curative elements of the cods' livers, aided by the blood-making and strength-creating properties of tonic iron contained in Vinol which makes it so successful in curing bronchitis. Vinol is a constitutional remedy for chronic coughs, colds, bronchitis and pulmonary troubles—not a palliative like cough syrups. Try Vinol. If you don't think it helps you, we will return your money. G. L. Penny, Stanford, Ky.

There is quite a catch in this section of the country than in other districts. For a few years ago the disease was common, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, procured a morbid change in the system which is a constitutional disease, and therefore requires constitutional treatment. Hays' Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only Constitutional cure on the market. It is taken internally in doses from 4 to 6 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any cure it fails to cure. Send for circulars and testimonials. Write to F. J. CHENEY & CO., Toledo, Ohio, and be sure you get the right medicine.

An attractive entertainment, "Enoch Arden" at the opera house tonight, given under the auspices of the ladies of the Christian church. This surely deserves the patronage of all literary people.

A dispatch from Somerset says: Mrs. Mounce, living on the Stanford pike, found a couple of counterfeit molds, one for making quarters and the other for making dollars. With one was found a lot of different kinds of metal for making the imitation money. One of the molds was found in the walls of the house and the other in the garden. How they came there no one knows.
