Overland

Five-Passenger Car Complete. Light, Easy to Handle, Economical to Operate.

From every state in the Union we hear of the amazing success of the latest Overland—the \$615 model.

And why not? An electrically started and electrically lighted, completely equipped Overland, with four-inch tires for only \$615!

Season after season for seven years the Overland factory has experienced one great success after another.

But this one to top them all. The \$615 Overland has made history. It marks the entrance of a new automobile value—a car complete in every sense of the term at a price which was hitherto thought impossible. Not that word "complete."

This means electric starter and electric lights, electric horn, magnetic speedometer—in fact, every necessary item. There are no "extras" to buy.

Note that the motor is the very latest in bloc design—the last word in fine engineering.

Note that the rear springs are the famous cantilever type. Cantilever springs mean the utmost in riding comfort.

Note the electric control buttons on steering column—demountable rims and one-man top. These are all big advantages.

This newest Overland is light in weight, easy to handle and very economical to operate.

It is a car that looks good in the best of car company.

It is large enough for the whole family—moderately priced—built of the best quality materials—snappy, stylish, speedy.

More Overlands are owned in Lincoln county than any other car, except the Ford—and the Overland owner is always pleased with his car.
