Make This Your Prayer on the Fourth.

"O God, thou hast been the strength and refuge of our fathers, help us their sons. As thou didst give to them the founding of the nation, thou hast given to us its preservation. To thee we look for guidance in our task; from thee alone can we get the courage to undertake it and the strength to continue it.

"For our country we pray—that its officials may be honest, wise, just and efficient. For our church we pray—that it may carry out thy purpose for the world, building the republic in righteousness. For the people we pray—that they may be citizen-patriots willing to live for the state as well as die for the flag.

"We, men and women who would be of some use in our time to our country and to thee, so pray to thee, so praise thee.

Amen."

You Can Be a Better Cook

It isn't *all* in the "knack." The utensils you use go a long way toward making your food fine and appetizing or ill-cooked and indigestible.

It's impossible to make the best cookery in utensils that quickly scorch or crack and scale off, rust and corrode. And such utensils are dangerous. Authorities say that cancer comes of eating particles of glass chipped off from ordinary enamel ware when hot.

The heat expands the iron frame but the coating of glass—which is all enamel ware is—does not expand so fast, consequently it breaks and gets mixed with the food.

There is no such danger from food cooked in up-to-date

"1892" Pure Spun Aluminum Ware
