WORK

There is nothing like Work as a buffer to want;
The grim Wolf will pass by your door;
You can sleep well at night, you can peacefully dream,
While the interest mounts on your store.

There is nothing like Work for a balm to a heart
That is troubled or fretted or sad;
It will hold like an anchor the wandering mind,
And add to the wealth that you had.

There is nothing but Work that will make resting good,
And give zest to vacations and play;
It will give satisfaction that nothing can mar,
And shorten the dreariest day.

There is nothing like Work to ensure self-respect
And the praise of your neighbors and kin;
And the prizes of life, be they little or great,
There is nothing but Work that will win!

—E. A. Lente.

How to Detect the Alum Baking Powder

"Which are the alum baking powders; how can I avoid them unless they are named?" asks a housekeeper.

Here is one way: take the can of a low-priced powder in your hand and read the ingredient clause upon the back label. The law requires that if the powder contains alum that fact must be there stated. If you find one of the ingredients named alum, or sulphate of aluminum, you have found an alum baking powder.

There is another and a better way. You don't have to know the names of the alum powders. Use Royal Baking Powder only; that assures you a cream of tartar powder, and the purest and most healthful baking powder beyond question.

gives mastery not only of water, but also of the air. The seaplane furnishes eyes for the sub-marine and enables it to locate its prey.

Flight Across the Atlantic
The National Aerial Association of Berlin expresses the opinion that an air flight between Ireland and America is possible at the present stage of the development of air craft. Is the English Throne in Danger?
The Ulster struggle because of the revelations that have been made of the attitude of the army and the unwillingness of its officers and soldiers to engage in civil war, is giving rise to a more serious situation than is readily imagined and one that may imperil the existence of the monarchy. The rumor prevails that wholesale resignations from the army at Aldershot were only prevented through the influence of the King, and that it was he who prevailed upon the officers of the Curragh camp to withdraw their resignations.

African Railways
The German Railway from Lake Tanganyika to the east coast, about 800 miles in length, has been completed. This railroad will operate in connection with steam vessels on the lake, which is 400 miles long, and thence by rail into the copper country on the upper Congo. Immense developments of the mineral resources of Africa will follow the completion of this transportation route which reaches into the heart of Africa. The terminus of the railroad is near Ujiji, where Livingstone passed away.

U. S. Government Protests to Germany
Formal Action has been begun at Berlin by the United States government to protect the interests of United States citizens who are engaged in the petroleum interests in Germany. The proposition that the German government has undertaken, to secure to itself a monopoly of the oil industry in Germany, will work serious injustice toward American investors in Germany who should be fairly compensated for

any financial loss that may accrue to them as a result of this measure.

This car will be taken over the railways of northern Russia and lectures will be given in the different towns on the evils of drink. The first effort will be to reach the railroad employees.
