

Published Every Friday by GEORGE WARREN, Hickman, Kentucky. Office—Jackson Street, next door to City Hall. GEORGE WARREN, Editor. Price of Subscription, \$1.50

ESTABLISHED 1859.

HICKMAN, FULTON COUNTY, KENTUCKY, FRIDAY, MAY 3, 1889.

VOL. 23, NO. 30.

FINE JOB PRINTING EXECUTED WITH NEATNESS AND DISPATCH. SALE BILLS, ENVELOPES, LETTER HEADS, BILL HEADS, INVITATIONS, ETC., ETC. CALL AND SEE US.

GOLD and silver discoveries go by decades: California, gold, 1849; Pike's Peak, 1859; Nevada, 1869; Leadville, 1876. Now is the bonanza of 1889?

The weather prophets are already giving us a summer with unusually violent electrical disturbances. These storms are said to follow, as a rule, mild winters.

An establishment for teaching housewifery has been founded by Miss Forsythe, of London. It is to be known as the Forsythe Technical College Company, limited.

According to population, Americans consume nearly twice the amount of tobacco that is consumed by Europeans. This comes of the great smoking of tobacco in the form of cigars.

The idea of having cigars go with the ocean mail steamers to distribute the postal matter, in order to expedite its transmission on reaching land, is said to be a German suggestion.

Living over 1,500,000 ex-soldiers and sailors, of whom over 340,000 are pensioners, and there are about 400,000 members of the Grand Army of the Republic.

GENERAL SALAMANCA is the name of the new ruler for Spain at the island of Cuba. He is an old soldier, and like all his profession intends to rule with strict discipline, at least as far as giving careful heed to the interests of the mother country is concerned.

A TEXAS railroad has agents in Oklahoma to induce those who can not get land there to come to Texas. The railroad offers good land on easy terms, and has 7,000,000 acres to sell, while all Oklahoma contains only 1,800,000. Texas hopes to get 20,000 emigrants from the overflow.

It is given out by those who ought to know in New York and Liverpool, that the Thringville steamer Danmark had no right under the navigation regulations to carry more than 300 passengers. She had on board a total of 730 souls when she foundered or was damaged and partly sunk.

A PRETTY custom obtains in Washington by which, on Easter Monday, the grounds of the White House are put at the disposal of the children, whatever children choose to come there. Hundreds of them do come every year to "peck" eggs, play ball and indulge in happy sport generally.

MASSACHUSETTS has a pretty stringent liquor law without prohibition. Cities had to wait the question of license or no license. In license cities and towns but one license can be granted to every 1,000 inhabitants. In Boston, which may have one license for every 500 inhabitants. The minimum fee for a license is \$1,000 per annum.

If anybody doubts that Americans have a genius for self-government, those doubts should be forever removed by contemplation of the proceedings in Oklahoma. Instead of the rioting and lawlessness, the pandemonium that so many predicted, was presented the remarkable spectacle of ten thousand men organizing a city government in a most orderly manner within twelve hours after their arrival on the town sites.

The New York post-office is the largest business establishment, affecting the greatest number of people under government control in the world. It delivers and collects every year a number of letters, papers, etc., six times as numerous as the entire population of the Union. It handles each year over \$85,000,000 in money orders, business, while its own receipts are over \$5,000,000, and the net revenue of the Government is \$3,250,000.

A CHICAGO man claims to have discovered a process for preserving meats, milk, vegetables and other perishable articles from decay for an indefinite length of time. The alleged discovery consists in a powder, the composition of which is a secret, and a small quantity of which burned in an air-tight room produces a smoke which permeates the articles to be preserved, and makes it practically imperishable. It is even claimed that eggs can be preserved by the process, the only change they undergo being the loss of vitality.

One of the important ethnological results of Stanley's march through the central African forest on his way from the Congo to the Albert Nyansa was his encounter with the dwarfs which he found exceedingly numerous between the Nepotes and the grass lands. They were known as the Wanbunt. Stanley says he saw about 150 forest villages or camps of these pigmies and describes them as a venous, cowardly and thievish race, very expert with their arrows.

The New York Sun prints interviews with a large number of prominent Englishmen relative to the possible annexation of Canada to the United States. The information sought to be obtained was what position Great Britain would take in case of a decided movement in favor of annexation. Those interviewed were prominent business men, manufacturers, professional men, members of Parliament and noblemen. The substance of the interviews is that if Canada really desired to secede the government would probably let her go.

The most compressed air establishment in the world is in Paris. It has a plant with 5,000 horse-power. Begun in 1881 to distribute the power necessary for the driving of pneumatic clocks, it was not long before it was discovered that the air could be profitably used for two other purposes—to distribute motive power to manufacturers by day and to produce electricity for lighting by night. The works, which are on the heights of Belleville, on the edge of the city, now occupy an area of two and a half acres.

OKLAHOMA'S GATES.

They are swung open and an Endless Stream of Humanity Pours Through the Portal of the Modern Canaan—Thirty Thousand People enter on Monday—The Santa Fe Road, Spring into a City of 15,000 Inhabitants—Exciting Scenes During the Invasion—The Invasion of the Men Reported Killed by Claim—Journals.

GUTHRIE, Ind. T., April 25.—The object of ten years of agitation is attained, and Oklahoma is occupied. Guthrie, which was a name on the map, a little red station-house by the railway track, is now a booming city of 15,000 inhabitants. Its structures are canvas and its population almost exclusively male, but there is an interest and excitement that is waiting in many a more substantial city.

GUTHRIE, Ind. T., April 25.—At noon yesterday Oklahoma Territory was thrown open to settlement in accordance with the bill passed by Congress at its last session and the order of the President. Hostile elements of humanity being to pour over its gates from the Cherokee strip came the great host of pioneers across the line, and from the Chickasaw Nation came troops after troops of sturdy pioneers, each with his family, and from the Arapaho and Cheyenne reservations on the west coast of the Territory.

Living over 1,500,000 ex-soldiers and sailors, of whom over 340,000 are pensioners, and there are about 400,000 members of the Grand Army of the Republic.

TALMAGE'S SERMON.

A Discourse Appropriate to the Centennial.

The Glorious Centennial of These United States—The American Colonies and the Great Revolution.

Last Sunday Dr. Talmage preached in the Brooklyn Tabernacle a vast audience was present. He said: "The Lord opened the eyes of the young man; and he saw, and beheld, the mountains were full of horses and chariots of fire round about Elisha."

As it cost England many regiments and two million dollars a year to keep safely a troublesome captive at St. Helena, so the United States, when there was a possibility of capturing a minister of religion, sent 50,000 men to take him.

During the night the army of Assyrians came around the village of Dothan, where the prophet was sleeping. The king's chariot and horses were sent to take him, and the king's chariot and horses were sent to take him.

There was nothing to do but to get up, for he looked up and saw the mountains all around full of supernatural forces, and he knew that the king's chariot and horses were sent to take him.

He was not the point of their destination, though it seemed the corner of the section and the corner of the town. It was to secure the lot nearest to it that the rack was made, but there was little left near it. Study had already been driven almost to the limit of the half section of 200 acres allowed for a town site.

It was not the point of their destination, though it seemed the corner of the section and the corner of the town. THE COMMONWEALTH.

Wm. Fessenden's arrest at Junior Landing, near Greensboro, was bargained at, the other night, over \$100 worth of dry goods and provisions.

On the 20th the brick walls in the large hemp storage building, Lexington, which was destroyed by fire last to the ground and fatally injured John Mohan, aged fourteen. He was dug out from the debris after being buried nearly thirty months. Charley Henderson, colored, had his left leg broken and sustained other injuries.

A man by the name of Hubert, of Staunton, Va., was shot from the Kentucky Central, held a dynamite cartridge in his hand and lit it with a match. The result was an explosion, and Hubert lost the finger from his hand and the other hand was badly lacerated.

FAT HENRY was convicted at Paris of the murder of James Albee last February. A TEAM of horses became frightened by the cars near the depot at White River, and ran off, smashing the wagon and throwing its occupants out. J. H. Lewis was seriously injured, but not fatally, by being thrown from the head of a heavy piece of timber.

At the spring meeting which began on the 25th the Kentucky Association celebrated the one hundred anniversary of racing at Lexington. Dr. H. H. GREEN, the Louisville physician who was confined in the jail a short time ago on a charge of manslaughter, was sent Henry Smart a pair of new shoes, which are to be worn by the condemned man when he is hanged.
