Against Lord Derby For \$10,000
or \$50,000 a Side.

Lexington, Ky., Oct. 3.—Thomas W. Lawson Wednesday night wired Secretary Wilson, of the Kentucky Trotting association, that he was very anxious to start Boralm against Lord Derby here, authorizing him to increase the amount of the challenge to \$10,000 a side, and urging him to use his best endeavors to secure the match. It is said by friends of Lawson that he is willing to increase the amount to \$50,000 a side. Each of the horses has been the other twice. Lawson is eager to have the question of superiority decided. Wilson, Wednesday night, wired the new challenge to Hamlin, at Buffalo.

Lexington, Ky., Oct. 5.—Harry Hamlin, owner of Lord Derby, wired Secretary Horace Wilson, of the Kentucky Trotting Horse Breeders' association, that he positively would not accept Lawson's amended offer of \$10,000 for the match race between Lord Derby and Boralm. It is all off.

TEN MILE MARCH.

Soldiers at Fort Thomas Hella-

the Tower at the Fort.

Coldspring, Ky., Oct. 4.—A ten-mile march through Coldspring is made daily by the soldiers of Ft. Thomas. Thursday the hospital corps marched to Coldspring and took a position in the play ground of the Coldspring seminary, from which they signaled with the heliograph to the large water tower at Ft. Thomas. The signals could be readily read at Ft. Thomas and by the men at Coldspring also. The flashes could be seen for many miles. Corporal Dale, who was in charge of the corps at Coldspring, delivered an interesting talk to the pupils of the Coldspring seminary upon the life of a soldier and the hardships and battles engaged in during the Spanish-American war.

DASTARDLY DEED.

Dynamite Was Used to Destroy a
Kentuckian's Home—Two Per-
sons Injured.

Henderson, Ky., Oct. 5.—About 2 o'clock Friday morning the residence of Ben Cabell, on Short Holloway street, was dynamited, and the whole end blown out. The fuse was placed under a bed occupied by Cabell. He and his wife were blown to the ceiling, sustaining severe injuries. The police think a mistake in the house was made by the perpetrators of the dastardly deed. A neighbor of Cabell, a union miner, who has spent a good deal of time recently at Madisonville and Earlinton, and prominent in miners' councils, is thought to be the man who the dynamiters intended blowing up. The explosion shook the whole town.

WHISKY VALUATION.

The State Board of Valuation and
Assessment Fixed It at \$10 Per
Barrel For Taxation.

Frankfort, Ky., Oct. 4.—The state board of valuation and assessment fixed the value of whisky for taxation at \$10 per barrel. In 1889 the value was \$7 per barrel and in 1900 \$8. The increase was decided upon by a vote of two against one, the one member voting to fix it at \$8, as last year. The distillers will likely urge a reconsideration. The board set October 25 as the day to hear arguments from the debenture and investments companies as to paying a franchise tax.

LEXINGTON TROTTING MEET.

The Stock Arrivals For the Event
Eclipsed Those of Any Pre-
vious Time.

Lexington, Ky., Oct. 7.—The stock arrivals for the trotting meet Sunday eclipsed those of any previous time. Every train brought in from one to three cars and stable room is at a premium. Prominent horsemen are arriving in large numbers and the hotels are rapidly filling. The track was the scene of intense activity Sunday, the arrivals being gotten in shape for Tuesday, the opening day. The big event then will be the \$16,000 Futurity and will have about seven starters. Conservative horsemen say it will be an open race. In public estimation Peter Stirling and Walnut Hall are the favorites. It is expected that it will be the sensational race of the year. Boralm is still suffering from a cold but his trainer hopes to have him ready for his match race with The Abbott Wednesday.

There were two cars under charge of shipper Johnny Miller, which reached Lexington at 2 o'clock Friday morning, and, during the day, were sent to their future homes in the blue grass region. They represented an expenditure of \$71,000, the highest priced being Mr. James R. Keene's imp, Field Azure, costing him \$18,500.

SMUGGLING IN CHINESE.

Organized Schemes in Mexico for Get-
ting the Coolies into the
United States.

There seems to be a pretty well grounded belief on the part of the United States government that there is an organized association composed of Chinese, Mexicans and Americans in Mexico, which has as its main object the smuggling of Chinese subjects into the United States, says the Chicago Inter Ocean.

For a long time it has been apparent to the American authorities that large numbers of Celestials have been systematically taken across the border and worked through the interior. It was at first thought that the headquarters of these agents were at El Paso, Eagle Pass and in Sonora. Several immigration agents have brought over large number of Chinese laborers to Sonora and Sinaloa, but special emissaries of the American secret service who have kept an eye on these shipments say that it is only a question of a few months till they are lost to view. Inquiries from the immigration agents do not elicit satisfactory explanations. It is reported that they have gone onto railways and into mines in the interior, but further investigation fails to locate them either on the railways or in the mines.

The Mexican Herald states that it is now believed that the real center of this business is in the City of Mexico. It is charged that Chinese immigration agents in Mexico City contract in Chinese ports for coolies to be delivered in Mexico for alleged work in the mines, on railways or plantations at ridiculously low figures and for a stated term of years. Some of these men are for the time being hired out, but many of them remain in Mexico, where employment is provided them and where they are taught to speak English, with the sole idea of getting them into the United States, where their knowledge of the language largely removes suspicion from their movements.

The leading Chinese in Mexico deny these statements, but they do not deny that every Chinaman in the city is learning pigeon English as fast as his brain will absorb the language. One man, however, who is in a position to know, says the denials are worthless. He states that these men, after having "mastered" English, are contracted to work near the border. From this point of vantage they are smuggled across the line by Mexican guides for ten dollars a head. It is very seldom that any attempt is made to cross the line at any of the railway points, or, in fact, near any town. But it is quite an easy matter for a guide to take, say, five Celestials in a bunch on a dark night and cross the Rio Grande at almost any point without attracting the attention of the outriders.

The Arizona frontier is an attractive field of operations for the reason that there are great stretches of desert where it is impossible for the customs officers to keep an eye all the time. It is only necessary to employ guides who are familiar with the water holes and the heathen are soon worked into the interior, where their presence arouses no curiosity. The guides on the Mexican side of the line invariably refuse to cross the border, not being willing to take chances of punishment for violation of Uncle Sam's laws against the entrance of Chinese. The modus operandi is to convey the gang to a given point on the line, where they are turned over to American guides, and the Mexican returns for a new batch. It has not been so very long since ten Celestials were taken by American customs officials through a miscarriage of plans. The American guide failed to show up at the appointed time and the Mexican who had the Chinese in hand instructed them to go due north till they struck a line of railway. Of course the Chinese, ignorant of the country, missed the water holes, and only by a marvelous chance managed to reach a stage station, more dead than alive. Two of them died later from the horrible experiences of the journey. The remainder were turned over to the United States marshal and eventually shipped back to China.

Woman in Motor Race.

One would think not many women would care to try motor racing after Mme. Gast's experience in the great race to Berlin. She describes the nausea caused by the petroleum fumes of the other cars as something terrible and affecting the brain. The throat and nostrils are parched and the lungs suffer. The dust was so thick that you could see no road, only the trees rising on either side. Eating was impossible, even during a halt, for all appetite had disappeared, and accidents were not omitted from the disagreeable programme. — London News.

Rose Without a Thorn.

It is said there are some people who complain that roses have thorns, while many more are grateful that thorns produce roses. In the gardens of Gundersbury house, Acton (of the residence of Mr. Leopold de Rothschild), there is a rose, probably of the Bourbon race, free growing and free blooming, though in a shaded spot, which is absolutely thornless. Its name is Zepherin Droulin, and it is of continental origin. Those who complain that roses have thorns and wish for them without prickles will find in this variety what they want. — London Gardeners' Magazine.

Chinaman's New God.

I asked a Chinaman the other day what they would do now, as the idols were getting so scarce. What would they worship? "Mexican dollars," he replied, without a moment's hesitation, "and," he added, "it's genuine worship, too, mister." — North China Herald.

SCIENCE AND INDUSTRY.

It is reported from Paris that Maj. Krebs has invented and will shortly bring out an extra light motor weighing hardly ten pounds, intended specially for aerial navigation.

A public automobile service has been inaugurated between two towns in the neighborhood of Vienna, Payerbach and Reichenau. The electric system is used, and the vehicles are of the large omnibus pattern, very comfortably arranged, and make good time. The eggs of a blue-bottle fly, if placed in the sun, will hatch in two or three hours. Linnaeus declares that the larvae of three blue-bottle flies will devour the carcass of a horse as quickly as would a lion, so rapidly do these insects increase, and so voracious do they become.

Dr. Bizarro of Gorz has published a pamphlet in which he tries to prove that the Adriatic has for more than a thousand years been rising and encroaching on its shores. The lower parts of Trieste are experiencing trouble already, and in course of time Venice will be buried in the mud of the lagoon. The new Italian submarine vessel "Delfino" has proved very satisfactory. It is provided with an instrument which permits a submarine vessel navigating below the surface to have a view of the whole horizon while it is under water. It is called a cleptoscope, and was invented by two Italian engineers.

A new product prepared from the coconut, and known as "vegetaline," is being manufactured by a Marseilles firm. The product is a kind of butter, and is stated to be particularly adapted for bakers and confectioners. It is much cheaper than butter, and is stated to be better adapted for pastry, and more especially biscuits.

THE ABANDONED FARMS.

New England Farmhouses That Have
Become Summer Cottages
and Residences.

The evolution of the abandoned farms into something better and more profitable than they ever were before has become a noticeable feature in the rural sections of New England. The Boston Transcript calls attention to the change in Berkshire county, Mass., where abandoned farms a few years ago were so numerous that it was feared the western part of the state in some sections would soon be depopulated. In place of that "there has been a record-breaking period of construction of street railways. The erection of big and modern hotels has been noteworthy. A large number of new industries of a minor importance have been inaugurated. In many cases the former abandoned farms have become summer residences for those who have plenty of money to spend and who are anxious to spend it. The advent of the summer boarder has caused the desert of the last decade to bloom as a rose garden. The abandoned farm house has now become a summer cottage, whose picturesqueness delights the trained eye of an artist." All this, says the Chicago Tribune, is but the natural outcome of the movements of social summer life. Originally the season lasted only from June until September and the seashore was the favorite resort. Gradually the rush for investments became so great that nearly all available sites on the New England shore from Stonington to Eastport have been taken up, as well as the islands near shore. Those that are left are held at such high figures that only millionaires can purchase and improve them. Little by little the summer cottages have been pushed farther inland, and as the season has now been extended from September, when the seaside resorts close, to Thanksgiving time, and the social locality changed from the shore to the hills, there has been a steadily increasing demand for these "abandoned farms" as autumn residences and summer residences alike. Not a few of them also have been bought for golf links and the old farm houses turned into clubhouses. Thus what was at one time a serious problem has been most happily solved, and those who have been lucky enough, after moving away to the cities or elsewhere, to hold on to their land will make handsome profits. The worn-out old farm has more than once proved to be a bonanza.

New Kind of Rat.

The immense number of bananas which have been sent into this country during recent years have been the means of introducing several different new kinds of flies, spiders and beetles, which have been inadvertently packed with them. The most formidable creature that comes over in banana cases is a new kind of rat. It is smaller than the ordinary sort, quite black in color, with round ears, and a head shaped somewhat like that of a bat. The little animal has a somewhat attractive appearance, and, in the early days of the banana trade, the salesmen were inclined to be kind to one of these rats if it was caught, and make a pet of it.

Big Tree for St. Louis Exposition.

An effort is to be made to remove a large red oak tree from the wildest section of Arkansas to Forest park, St. Louis, for the Louisiana Purchase exposition. The tree is 160 feet high and 12 feet in diameter at the base. A double tramway will be built from the tree to the river, where it will be floated and towed to St. Louis. It is estimated that this will occupy six months. The tree will be dug up by the roots instead of being cut down, and none of its branches will be trimmed. — Indianapolis News.
