LOST RIVER, IDAHO.

A Mining District in Idaho that is Coming to the Front.

T. A. Bennet, of Butte, was in Dillon last week, returning from a three weeks' examination into the mineral resources of the Lost River country in Idaho. The mines which have occasioned the recent excitement are located about 120 miles north of Hailey and are rich in argentiferous galena. There is one copper property there, a vast reef protruding from the ground and exposing enough carbonate ore to supply a hundred-ton smelter for several years. This reef seems to have been denuded by the action of the elements, but whether it is a blow-out or a permanent ledge has not yet been ascertained. It spreads over a vast area. The property was sold some time ago for \$10,000, and it is stated will soon be developed by a California company, who will erect a smelter to treat the product.

Seven Horse Thieves Sent to the "Other Shore."

Last week news reached Cottonwood, Meagher county, that there were seven men (horse thieves) hanging to trees at the mouth of the Musselshell. Downe and Felix are recognized among the number. They are supposed to belong to the Downe and Felix band, who have had their headquarters in that neighborhood. Some twenty of Granville Stuart's cow boys are out after another band, who have made for the Woody Mountains. They go fully prepared for all emergencies, and if they overtake the horse thieves there will be another hanging bee, as the settlers and stock men are desperate over the loss of their horses. There have been over one hundred horses recovered within the past week.

By advices from Cottonwood, August 3d, we learn that a courier has just arrived from near the mouth of the Musselshell, who reports that Granville Stuart's cow boys have a large band of horse thieves surrounded. The band is too strong to be taken, but they can be held till help comes. Reinforcements left Cottonwood on Sunday, and hot times are expected.
