EAST AFIRE WITH PATRIOTIC BLAZE

Arthur Berry Tells of Enthusiasm for the War in the Large Cities.

The east is ablaze with the war spirit and the enthusiasm of the men is only exceeded by the enthusiasm of the women, according to Arthur Berry, proprietor of the Florence hotel, who returned last night from a two weeks' trip to St. Paul, Detroit and Chicago. He called on his mother and sister who are visiting in Chicago and another married sister in Detroit. Mr. Berry said:

"The larger eastern cities are a mass of American colors. Every two feet an American flag is hung. Stores, public buildings and private houses are covered with the red, white and blue. One hears everywhere about the war and all over is the same genuine enthusiastic support for the president and the government.

"In the enlisting stations women are stationed for the first time in the history of the country, urging the young men to enlist and so spontaneous is the response that it looks as if the west will not be called upon at all. The women are joining the Red Cross in every city.

"The depots at Chicago and St. Paul are being guarded by Uncle Sam's soldiers. One is forcibly reminded at every turn that the war has become a reality and over and above all one finds that true patriotic spirit which makes one so proud to be an American. Butte should have more flags. There should be more patriotism and a greater display of the American spirit in Butte."

Mr. Berry's return home was signalized by a lavish display of the American flag all over the Florence hotel. About business Mr. Berry said:

"There is no comparison, as far as business is concerned, between Butte and the east. And let me tell you," he said, "and I told the boys at 'The Ship' this morning, 'I'd sooner be a bum in Butte than a millionaire in Chicago.'"

Mr. Berry had a very pleasant visit with his relatives and enjoyed every moment of the trip.

Ellison S. Ople, city passenger agent of the Short Line, left last night for a two weeks' vacation trip to New Orleans and other southern points.

UNDERTAKERS.

TOOMEY—In this city April 8, 1917, John Toomey, aged 69 years, leaving one daughter, Mrs. C. H. Lambeau of Ironwood, Mich. The remains are at Sherman & Reed's undertaking parlors. Notice of funeral later.

BUTTE'S MODERN DENTAL HOSPITAL, SECOND FLOOR, IN THE NEW RIALTO THEATER BUILDING, HAS A SCIENTIFICALLY EQUIPPED LABORATORY WHICH WAS INSTALLED AT VERY GREAT EXPENSE

Fully Furnished With All the Most Modern Instruments and Dental Appliances—It is Possible for the "Sterling" Company to Make or Repair Anything in the Dental Line.

One of the most important departments in the new "Sterling" dental office is the laboratory. In this wonderfully interesting section is to be found all the very latest scientific dental conveniences, and machines used for the mechanical end of dentistry.

The benefits of any dental concern in having their own laboratory are not far to seek, inasmuch that when work is sent to an outside laboratory, it is never nearly so efficient as work that is produced under the direct supervision of the dentist who is operating on a patient.

The "Sterling" dentists say that in their laboratory the mechanical work of each patient is carefully and faithfully examined many times, in the making, by the operating dentist, so that accounts for the beautiful crown, plate and bridge work that enterprising concern has been turning out during the past six months in the Park street office.

Dr. Hardan told, and demonstrated to the writer, the mechanical and laboratory work will be of a still higher standard, on account of the added conveniences now installed in what is easily one of the most completely equipped dental laboratories in the entire United States.

Another highly important point to which the concern owes much of its success and that is the laboratory experts who serve them they have been fortunate enough to secure—men of experience and ability in the latest scientific methods of dental mechanical work. Anyone who is interested in the progress of Butte will find a visit to the new and marvelous dental laboratory highly interesting—well worth the time spent.

Opening date is looked for April 15.—Adv.

CALLS AN AGRICULTURAL CONFERENCE AT BERKELEY

To Be Similar in Purpose to That Held at St. Louis This Week.

Washington, April 9.—President Benjamin Wheeler of the University of California, at the suggestion of the secretary of agriculture, has called a conference of state agricultural officials and representatives of the land grant colleges on or near the Pacific coast at Berkeley on April 13. The conference is to be similar in purpose to that Secretary Houston is holding today in St. Louis.

It is expected Oregon, Washington, Arizona, Utah and Nevada, as well as California, will be represented by the presidents and deans of their agricultural colleges and experiment stations.

The conference will consider the agricultural situation in the present war emergency and to see what can be done to increase production, improve distribution of food and effect a helpful organization to meet food demands.

SEVEN RECRUITS FOR NAVY HERE

Several Applications Rejected and Many Are Still Pending.

Seven young men have been enlisted for service in the United States navy since the arrival of Chief Henry, recruiting officer, in Butte last week. There have been a score or more of applications, however, but some of these have been rejected and others are pending decision on the part of the applicants as to what branch of the service they desire to enter.

Five of the recruits qualified Saturday and two yesterday. The seven are: Alfred Hinkle, Roy Salisbury of Whitehall, George Randolph, Ralph Hall, Robert Charlton, Henry Stanley Kroll, Martindale and John Charles McSherry of Martinsdale. They will be sent to Salt Lake in course of the next two days and thence to Goat Island, Cal., for training.

Two printers, employed in local newspaper offices, applied for enlistment today. One was rejected because of the fact that his weight did not come up to requirements for one of his height and the other will probably be sent to a physician for physical examination this afternoon.

Another applicant was rejected because of bad teeth and still another, who has served two three-years terms in the navy, was rejected because of the fact that he is married and has dependent children.

Many amusing incidents occur at the recruiting office as a result of the many applications for enlistment. One man, slightly intoxicated, was told that he was too light for service, meaning his weight did not come up to requirement for one of his height.

"I'm as good a man as you are," he told Chief Henry, "and if you don't think so well close that door and I'll show you."

A big Irishman sought enlistment Saturday and was told that he could not enlist because he is not an American citizen.

"I'm as good an American as you are," he declared, "and I'll throw you out of that window if you say I'm not."

Chief Henry has asked that another officer be detailed to assist him in Butte, since so much of his time is given over to explanation of various branches of the service and the like.

A number of applicants have sought to enter the aviation corps, but only experienced aviators are being taken into this.

CALL ALL WOMEN TO MAKE BANDAGES

New York Organizer Receives Generous Support for Work in Butte.

Several hundred Butte women responded enthusiastically today to the first real call for aid for their services for the entente allies. They met in the Chamber of Commerce rooms in the courthouse in answer to a request of several committees of local organizations and of Miss Margaret Moore of New York City, who is here representing the American Fund for French Wounded, to enlist women to volunteer their services to make bandages.

Mrs. Charles R. Leonard was named head of the Butte organization. Miss Moore explained the need of the bandages by the French hospital corps at this time and told of the efforts of the organization she is representing. The organization has secured the Old Colony club of New York in its entirety as a depot for receiving bandages made in all parts of the United States which are forwarded to that building and then sent to Paris.

From there they are distributed to the necessary points largely through the efforts of the American ambulance corps.

Beginning tomorrow morning at 10 o'clock the Chamber of Commerce headquarters will be open and material donated by Butte merchants will be made into compresses at first. As the corps of workers grow and the work progresses, other kinds of bandages will be made, although at first only the cutting and wrapping will be done. The hours will be from 10 to 5 o'clock daily.

Representatives of every woman's club in Butte as well as many other women were present at the meeting this afternoon, when a number of committees were named and every step taken to start the work tomorrow morning.

The Headquarters.
The Chamber of Commerce has given its headquarters to the women as long as they will need them, and they have the endorsement of the leading business men and organizations of the city. A number of the merchants of Butte have given generous donations of gauze, cotton and other materials.

Miss Moore plans eventually to organize all Montana for the work. The women of Anaconda are heartily in favor of the movement and committees have already been named and are taking the preliminary steps in Missoula. Later Miss Moore will visit in Great Falls, Helena, Bozeman, Livingston, Miles City and Billings.

"We want and will be glad to accept money contributions also," Miss Moore said. "The entire organization from coast to coast is run without an overhead charge by the donations which are coming in."

"We must realize that the men in the trenches in Europe are fighting our battles now and are helping us in every way possible. We are doing our best to enlist the women in this work to give only their time and their

services. If it is only ten minutes a day it will be a help. Those wounded French and English soldiers need bandages badly and we can supply them and help our own cause at the same time."

The prisoners at Deer Lodge will make bandages of all the material furnished through the aid of Frank Conley.

WOULD MAKE LABORER A BUSINESS PARTNER

Paris, April 9.—Another step toward making the laborer a business partner, participating in both the profits and management of enterprises in which he is employed, is being taken in France. The senate has adopted the principle of a bill amending corporation laws so as to permit the allotment of shares to workmen collectively in any establishment to be held for all employees of one year's standing or more, for the distribution of the dividends among them.

In case of dissolution the capital stock will be shared between all the shareholders, those holding labor shares as well as capital shares. Wage earners under this measure also may participate in the management of the corporation.

The law provides exemptions in favor of corporations formed under this law which it is hoped may help solve the problem of conflicts between capital and labor and reduce the number of strikes which increased in France from 261 in 1912 to 1,075 in 1913.

This law, it is held, will make mining shares less risky. Capital now hesitates at investment in these stocks because of the frequency of strikes. The bringing of capital and labor into closer co-operation in this way has been one of Premier Briand's favorite projects.

The law under discussion, of course, cannot make it obligatory upon all corporations to accept the participation of their employees; it only encourages it by offering advantages that other corporations do not enjoy.

BORE.
Son, read this rhyme, you'll find it true.
And then read it again;
You never get so dull that you
Can't love your fellow men.

Wedding Gift Silver

A Silver Service Will please the Housewife
