Member of the Associated Press.

The Associated Press is authorized to use the name of the publication of all news appearing in it or not otherwise credited to this paper and also the Post's published herein.

NATIONAL ANTI-SLIPPER

an area not 12 per cent of Montana size and at that in large part mountainous. Germany is unwilling out of her strained and worn resources to contribute. Several weeks ago our government promised to furnish some supplies. But Switzerland was told what's what about shipping materials into a country with which we are at war, and there would be no way, except through Spain, to get her own people wanted and fed, with some things here, over to sell to Germany.

As a result, Switzerland's relations with Germany have been almost wholly broken. Recent reports of Germany's had crop returns throughout Germany may be exaggerated, but it appears to be the accepted truth that Germany is in extremely hard lines for supplies of food. The many millions of thousands are at the front, trying to stay that so-called "warrent" in the thousands near home.

AT THE FINISH

The finished product of the printing of the new issue of the Butte Daily Post is now being prepared in a great number of copies.

The process from Washington has been to the effect that the new issue will be printed in the city of Butte, Montana, and will be distributed to the various offices of the Post in the various cities of the United States.

The work has been done with the utmost care and attention, and the result is a fine, clear, and readable issue of the Post.

AT GOLD CREEK

The monument dedicated at Gold Creek is a valuable witness to the history of the first gold mine in Montana's history and, as well as a fitting tribute to a soldier whose name is held in reverence. The monument is a fitting tribute to a soldier whose name is held in reverence.

DELAYING THE GAME

The delay of the members of the W. W. W. is a delaying game. The delay of the members of the W. W. W. is a delaying game.

LITERATURE OF THE WAR

A writer in the Portland Oregonian says that had it not been for the war many of us would have gone to our graves with the chief memory of Conan Doyle as the author of the Sherlock Holmes stories. This probably does not refer to the author's latest contribution to literature, a poem entitled "The Guns in Sussex."

IN SWITZERLAND

One of Switzerland's press dispatches, dated at Bern, quoted the president of Switzerland who said that his countrymen are right as against a very bad outlook with respect to food and could but that he had well-grounded hope that the United States will help out as generously as it possibly can.

Switzerland's case has been considered very thoroughly at Washington, since the embargo was proclaimed, and it was made plain, on the continuing proceeds relating to exports, that the Swiss, in no many instances, have acted fully in the business of furnishing supplies to Germany.

Switzerland is heavily dependent upon outside resources for food and fuel. It is the home of hardly less than four million people living within

has written a book of an altogether different character which at once inspires like a lasting page in English literature. Wells' "Mr. Britling Sees It Through" first published in this country as a serial in a regular weekly is one of the finest history productions of the period.

There are others in whom the war seems to have inspired more brilliant authorship. Call them "Mr. Britling's" "Three Hundred Thousand" is a story that will live. It is a story of interest in this country while we are in the midst of a belated armistice to take our place in the battle lines of France.

The work is a striking arrangement of British improvisations, which, even if it is not as good as our own, it is not far from it.

Mr. Britling's "Three Hundred Thousand" is a story that will live. It is a story of interest in this country while we are in the midst of a belated armistice to take our place in the battle lines of France.

THIS DATE IN HISTORY

1787 - The United States Constitution was signed.

1812 - The British burned the White House.

1848 - The French Revolution broke out.

1864 - The Emancipation Proclamation was issued.

1898 - The Spanish-American War ended.

1914 - The First World War began.

THE ANNIVERSARY IN THE EUROPEAN WAR

1914 - The First World War began.

1915 - The Battle of the Marne.

1916 - The Battle of Verdun.

1917 - The Battle of Passchendaele.

1918 - The Armistice was signed.

WOODMEN OF THE WORLD PARADE CALL

The Woodmen of the World are called to a parade on Sunday afternoon, Oct. 7, at 2 o'clock, to take part in the parade. The parade will start at 2 o'clock and will last for several hours.

Will Be Repaid for Their Work

Women everywhere suffer from kidney trouble - backache, rheumatic pains, swollen and tender muscles, stuffy nose - all of which they have to suffer as the result of their work. They are called to a parade on Sunday afternoon, Oct. 7, at 2 o'clock, to take part in the parade.

NOTICE

The Fraternal Order of Eagles extends a cordial invitation to all members of the selective draft and their friends to the freedom of their club rooms Sunday, Oct. 7.

CURRENT ATTRACTIONS AT BUTTE THEATERS

ANSONIA
Vanderbilt and pictures: Tonight, Mrs. Byrd's Dancing Class and "The Marriage Market"; tomorrow, Pantagruel, Vanderbilts and Mrs. Brown's Dancing Class.

RIALTO
Moving pictures: Today and tomorrow, New York Giants in "One Touch of Nature."

AMERICAN
Moving pictures: Today and tomorrow, "The Whip."

ORPHEUM
Moving pictures: Today and tomorrow, "Who's Your Neighbor?"

NOW OR NEVER

The clock strikes the hour! Your country is calling! Listen, young Americans! Be brave and true! While in France soldiers are fighting and falling, fill up the lines that have opened to you! The cry of your nation - Now or Never!

THE POST FOR THE NEWS

Report in full uniform, with axes, at 11:30 a. m. Fall parade, Oct. 7, at the corner of Grant and Main. By order of Franz W. Knabier, Captain; Emmett R. Griffin, First Sergeant; COMPANY NO. 153, U. S. ARMY, MEN OF THE WORLD.

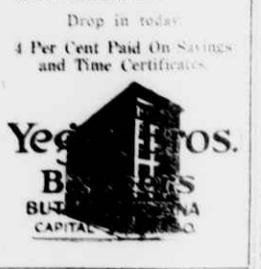

SAVE YOUR MONEY

The best way to save money - keep a little out of every pay envelope for pocket money, then put the rest in this bank and pay your bills by check.

Money in the bank is not easily spent for unnecessary and remains until a time of need comes to you, then you will be glad you have your bank account.

Drop in today.

4 Per Cent Paid On Savings and Time Certificates.

LUKE M'LUKE SAYS
Copyright, 1916, Cincinnati Enquirer

A woman can order her husband to empty the pan under the sink, but if she doesn't want the kitchen flooded she has to do it herself.

What has become of the old-fashioned woman who used to wash her face in the water before she washed her hair?

Yverly sneaks the tea out of the house. That is the reason why the average woman would rather be a rich man's widow than a poor man's wife.

One reason why we never take a drink at a ball game is because the waiters' hands carry the stinks in their pockets.

They never saw a man who could outlive his wife that had the habit of his business as heavy as his house's load.

We are making progress. There are fewer women who regard matrimony as something that fades away and something that should be kept out of the house by closing the shades and pulling down the blinds.

ODD AND INTERESTING

Your made from the kernel of the chestnut seed after the oil has been extracted has been found to have much food value.

English makers are experimenting with the manufacture of paper from waste bark that already has been used for tanning.

A handle appears on one side of a new salt shaker that is said to distribute its contents more evenly than the usual type.

A Paris scientist has succeeded in making crystals of sodium nitrate so pure that they can be used in optical instruments.

Wine imported from the United States seem to be the only ones to resist severe mildew in the vineyards of western France.

Machines have been built in England for making briquets from brass or cast iron burms at a speed up to four tons an hour.

An automobile valve has been invented that sounds a whistle when an automobile tire contains either too much or too little air.

It has been found that a nut growing in Brazil that is allied to the nutting yields an oil of much value in the manufacture of soap.

A long list of advantages are claimed for a new front drive automobile in which all the driving mechanism is mounted beneath the hood.

A locomotive sandbox from which a stream of water carries the sand to the rails with a minimum of waste has been invented by a Frenchman.

When struck, a new bumper to stop automobiles on bridges first rolls two feet, then slides and finally rises, reducing a car without a shock.

By scanning films of air between the hulls of vessels and the water British engineers hope to save steam craft 12 per cent of the fuel consumption.

To protect automobile tires from the sun when a car is standing, shades operated on spring rollers to be mounted beneath fenders, have been invented.

A new French static electrical machine of high power uses an ebonite cylinder, which can be warmed in damp weather instead of the customary glass disc.

To hold a skein of yarn while it is being wound into a ball is the purpose of a revolving wire frame that can be clamped to a chair or other piece of furniture.

English scientists are conducting a series of experiments to ascertain how best crop production can be increased with the use of high frequency electric currents.

As a Denver inventor's machine is passed over a road the earth is loosened, pulverized, distributed evenly at any desired angle and packed smoothly with a roller.

To protect a Swiss railroad from avalanche snow-retarding walls have been built on a mountain side at the points from which the slides start, to hold the snow until it melts.

Our Daily Special.
We Offer Heavy High Heels For The Other Fellow To Live To.

Names is Names.
Nelson Two Weeks of Trade, Kan.

COME THROUGH
BY BERTON BRALEY.
If you will, with some, try a brand new deck.
And send the old one through.
To the hunch in France, why they'll have a change.
To stiffen the backbone, you'll need a deck that will stand by a poor man's side.
Put it on the wooden floor.
May you be on the streets of a ratty street.
To keep a soldier's side.
If you like your smoke when your nerves are frayed.
Or your job and your time go slow.
If you get from a cigarette.
Or an old pipe's ruddy glow.
Then think of the boys in a muddy ditch.
Away from their homes and folk.
And away your dime and your life some-thing else.
To buy you a bunch of smokes.

WANTS STATION "LIT"
Chicago, Oct. 5. - Citizens don't mind it to worry. If the city council chooses to station the owners can sell their electric signs to the city.

Albermarl Tavern at a meeting of the council, offered resolutions asking that the fronts of police stations be illuminated so that citizens and the general public will not be confused in looking for a police station.

The resolutions were sent to the city council.

DIVES FOR DIAMOND
San Francisco, Oct. 5. - A diamond hunter, yesterday afternoon recovered one of his wife's earrings valued at \$1,000, which was lost in a bay when she climbed into a launch.

The diamond, the diver, was employed to search for the jewel from a launch. He suggested that he boat buckets of mud and pan for the stone.

Starch had been brought up to cover the deck of the launch and the stirring was discovered.

SELF HELP' GROCERY.
Chicago, Oct. 5. - In Gary, Ind., there has been opened for business the first "Self Help Store" under the patronage of R. A. Selby, president of the Union Trust and Savings bank of Gary. There are no employees in the store save cashiers. The groceries are ranged in neat piles and the customer goes from place to place as in a cafeteria and when departing pays the cashier. There are no deliveries made and Mr. Selby claims that a considerable reduction in prices can thus be made.

YOUNG CATTLE BARON.
Savoyburg, Kan. - Alexander Miller, 17, shipped a car of cattle to Kansas City thereby making a bill for the title on the young cattleman. Alex is only 17 years old and makes the feed.

RIPPLING RHYMES
By Walt Mason.

AFTER THE STRIFE
When Kaiser Bill is placed on ice, and war's no longer merchant prince who'd boost the price must have some new I'm tired of hearing dealers say, "The goods you're asking gone up half a plunk today, due solely to the war." I go to buy of peace, whereat the clothier cries, "The war has killed the price in France, which makes the prices rise." I go to have my stained a rich and lustrous blue; the barber says, "I'm ready to lift the price on you, but all the barks and buds and herbs of my eyes were made, were harvested by Huns and Serbs, and spoiled the trade." I do not care about the price of anything I'll cough up for a chunk of ice, a bulldog or a pie; the men at paying kale are people I abhor; but this old formula is stale, up because of war." Oh, happy day when Wilhelm's goose is to walk no more, and we shall hear a new excuse in every realm.

PERU READY FOR A BREAK WITH BERLIN

Lima, Peru, Oct. 5. - (Delayed) - The Peruvian government probably will soon break off diplomatic relations with Germany. The first step was taken today when congress, by an almost unanimous vote, decided in favor of such a course.

The Peruvian government on Sept. 26 instructed its minister in the present to the German government to demand that satisfaction be given within eight days for the submarine of the Peruvian fleet ton inside Spanish territorial waters. It was added that if the demand was not met diplomatic relations would be broken.
