CONSERVATION

In these times when everyone is urging the conservation of the nation's resources, an article published in today's number of the Post will have special interest.

The figures given officially are startling. They indicate not only the saving of millions of dollars in operating expenses, but the gain of vast supplies of coal and oil required elsewhere.

From the day that the first Milwaukee locomotive pulled a train out of Butte over the continental divide in a test witnessed by railroad officials and representative citizens, the electrification of the road seemed to be an experiment.

At present the senate committee on privileges and elections, of which Senator Pomeroy of Ohio is chairman, is deluged with messages from people angered by La Follette's speeches.

LA FOLLETTE

Throughout the country comment on La Follette is pretty much one-sided. From Maine to California the Wisconsin senator, since his speech at St. Paul, has been the subject of caustic comment.

At present the senate committee on privileges and elections, of which Senator Pomeroy of Ohio is chairman, is deluged with messages from people angered by La Follette's speeches.

THE RANK OF GENERAL

A good many citizens would be better pleased were the conferring of the rank of "general" reserved, for bestowal hereafter on some member of the army of the United States whose war record would merit the signal distinction which the title carries.

Recently the war department decided that, in order to adapt our field service to British and French methods, we must use a title higher than that

of major-general, which implies merely the command of an army corps, whereas to designate the officer at the head of a force in the field numbering a million men more or less.

Thus they receive an unearned honor, the people of the United States hoping that they will yet prove that it was worthily bestowed.

IN NEW YORK By some of his supporters Bennett, the republican candidate for mayor of Greater New York, is mentioned as "coming." They say that he is likely to loom as another Roosevelt.

AN ASSET

In Thompson park Butte will have an asset that will be more appreciated each year. Even at this early stage of its development it is possible to say of it that no more lovely place may be found out doors.

ODD EVENTS IN TODAY'S NEWS

HIGH COST OF CLERGY. Eureka, Cal.—"The price of preaching must go up along with other labor costs," declared the Rev. G. H. Lobdell, pastor of the Christian church, in announcing his resignation because of the failure of the church to pay his salary.

HE COULDN'T EXPLAIN.

Chicago.—A pair of strange earrings which Mrs. Amy Matthews found in her boudoir when she returned home from a week-end trip a year ago, obtained them to her husband Judge John H. Steele. Mrs. Matthews said she asked her husband to explain the presence of the earrings and that he didn't even attempt it. Then they parted, she said. Matthews did not contest the action.

WOMEN STRONGER SEX?

Cambridge, Mass.—"Found for found the average normal woman in good health can endure more pain, discomfort and fatigue, and can expend more muscular energy than the average normal man of similar condition," Dr. Dudley A. Sargent declared at Harvard.

"Woman of necessity comes nearer the primitive type than man. Withstanding cold or thirst or hunger or physical privation of any sort, a woman can outlast a man nine times out of ten. Woman from the standpoint of physical endurance should make as good a soldier as man."

PLAN CURE CROOKS.

Chicago.—"Fifty per cent of the criminals in this country under 30 years of age can be restored to good citizenship under proper surgical attention."

Judge George W. Bridgeman, Benton Harbor, made that statement at the dinner of the American Association of Official Surgeons in Hotel La Salle.

"Seventy-five per cent of the criminals brought into the courts of this country are between the ages of 15 and 24 years and 80 per cent of them suffer from physical disability," said Judge Bridgeman. "In most of these cases this disability is responsible for mental disability, manifested in crime, and it is capable of correction."

SUPERVISION OVER MOST FOODSTUFFS

Proclamation Will Place Plants and Distributors Under U. S. License.

Washington, Oct. 11.—The machinery of the food administration was set in motion today to complete preparations for government control on Nov. 1 of 20 of America's principal foodstuffs.

The proclamation, declaring it was necessary to prevent unreasonable profits and to stop hoarding and speculation.

After quoting the food control act, under which the action is taken, the president's proclamation says:

The License Order. It is essential, in order to carry into effect the purposes of said act, to license the importation, manufacture, storage and distribution of necessities to the extent hereinafter specified.

All persons, firms, corporations and associations engaged in (1) operating cold storage warehouses (a cold storage warehouse for the purpose of this proclamation being defined as any place artificially or mechanically cooled to or below a temperature of 45 degrees Fahrenheit, in which food products are placed and held for 30 days or more); (2) operating elevators, warehouses or other places for storage of corn, oats, barley, beans, rice, cotton seed, cotton seed cake, cotton seed meal or peanut meal; or (3) importing, manufacturing (including milling, mixing or packing) or distributing (including buying or selling) any of the following commodities:

Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, imitations and "just-as-good" are but experiments, and endanger the health of children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Peppermint, Drops and Soothing Syrup. It contains neither Opium, Morphine nor other narcotic substance. For more than thirty years it has been in constant use for relief of Constipation, Flatulency, Wind, Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. THE DAY OF PEACE

The war will end some blessed day, some day the strife will cease, the kings will put their guns away, and boost the boom of peace.

captains then will drop the tools which made the world forever drive their teams of sorrel mules along the rows of corn. While the tide of battle rolls, while still we hear the din, it seems to come weary souls that war has always been. Three years, they say, the strife has raged across the mourning seas, but it would seem that it has been waged for three eternities. The days that reek of blood and tears pass slowly o'er the stage; to weary hearts three gory years become an endless age. We're looking forward to the day when with honor comes, when kings will put their swords away, and their battle drums. I long to see the colonels drop their snickersnees, and buckle down to raise a crop of beans and early potatoes to see field marshals hang their batons from a nail, and their busy with the gang, to earn some bloodless kale.

MINES HARD HIT BY NATIONAL WAR

Many Students Volunteer and Many Drafted—Work is Proceeding Lively.

There are 52 students on the roster of the Montana State School of Mines in this city, as compared with 87 at the same period last year. The war has affected the attendance considerably. In all, 25 of last year's students have been drafted and 12 have volunteered. The latter are now serving in various camps throughout the country, while one of the boys, William Moran, is with the engineering department of the British army in England.

Of the drafted men, eight are already at American Lake, five have been accepted for the next draft, seven were exempted and five remain to be examined. Among those who are with the colors at the present time, but still carried on the school roster, are McAllister, Davis, Miller, Ryburn and Simon.

This year as compared with last year. This is considered an excellent showing in view of the fact that the freshmen were grabbed especially in the spring. In spite of the fact, however, the school has been depleted of many of the seniors, the usual work being carried on actively under the direction of President Bowman, who realizes that the work of the school, especially of an engineering school, just as important at the present time as the work of the soldier.

The sophomores spent all the month of September at Malheur, Ore., surveying trip. The juniors during the greater part of the month to date surveying at the Silver Bow mine. Seniors were at Phillipsburg and studying field geology. All classes took advantage of the very good weather conditions for outside work. As a result the school was ahead of last year in the smaller amount of laboratory work has been postponed and in spite of the smaller amount of industry and activity, with a touch of patriotism in the work which is to help the boys so much in the next few years, but being the period of reconstruction of the war.
