

For Catarrhal Deafness And Head Noises

More in America there is much suffering from catarrh and head noises. American people would do well to consider the method employed by the English to combat this insidious disease. Everyone knows how damp the English climate is and how dangerous catarrh is when it attacks the ear. In England they treat catarrhal deafness and head noises as a constitutional disease and use an internal remedy for it that is really very efficacious.

Sufferers who could scarcely hear have had their hearing restored by this English treatment to such an extent that the tick of a watch was plainly audible seven and eight inches away from either ear.

Therefore, if you know someone who is troubled with catarrh, catarrhal deafness or head noises, put out this formula and hand it to them and you may have been the means of saving some poor sufferer's peace of mind. The formula is as follows: Prescription can be easily prepared as follows: Fresh young duck's, obtained in a market, (double strength). Take one home, and add to it a pint of hot water and a ounce of granulated sugar, stir until dissolved. Take a tablespoonful four times a day.

Remedy is used in this way not only to reduce by some means the inflammation and swelling in the Eustachian Tube and thus to equalize the air pressure on the drum, but to correct and remove of serousness in the middle ear, and the result it gives is usually quick and effective.

Every person who has catarrh in any form should give this recipe a trial.

ARTILLERYMEN SENT TO GREAT FALLS FROM HELENA

Twenty-five men of the Third company, Washington coast artillery, have been sent from Helena to Great Falls for guard duty, according to word received from headquarters in Butte.

It is thought that the present force of artillerymen in Butte will be unchanged for some time. A squad of men was sent back on the coast about a week ago, but it is expected that no more men will be sent out of the city at present.

NO PLACE TO GO

Mrs. J. E. White, who has been the proprietress of the "The People's Home" in Butte, has been ordered to leave the city by the military authorities.

POHL TAKEN INTO CHARGE BY GUARD

Military Men Remove Prussian From Butte to Prison at Fort Douglas.

Carl Pohl, Prussian and alleged German secret agent in America, was taken to Fort Douglas, Utah, last night for internment during the period of the war. Pohl was taken from the Silver Bow county jail by Capt. Henry Moore of Fort Douglas and Sergeant Higgins. The military men conferred with Lt. W. W. Myers, Jr., the department of justice and Lt. J. Murphy of the district attorney's office before leaving with the prisoner.

Pohl was taken to the Short Line train a few minutes before 3 o'clock by the army men.

It is understood specifically at the federal building that no hearing will be held on the internment warrant issued against Pohl. The hearing was originally set for Nov. 22, but pressure of business prevented its being held. It is expected that Pohl will be held in the military prison at Fort Douglas until the end of the war.

Major James was accompanied by the arrival of Pohl in his office in Butte in the evening. While the attorney is expected to make a statement regarding the case, it is understood that the man was working in the interests of the United States in the German government.

Pohl is a Prussian who had been active in the city and who alleged that he had had the job of poisoning Montana cattle by means of manufacturing arsenical compounds to use in the German government's work in Butte during the summer.

Pohl has been interned since his arrest. It is an incident of any internment of a person in the American government's custody. He is expected to be held in the military prison at Fort Douglas, but it is expected that he will be sent to a military prison at Fort Douglas, but it is expected that he will be sent to a military prison at Fort Douglas.

(at no cost to you)

50,000,000 have used this 25-year-old remedy. For chronic catarrh, nose pain, coughs, colds, sinusitis, nose bleeds, whooping cough, influenza, earache, ear noises, ear deafness, it will benefit you. Fewer headaches than in cork or we pay money back. For trial can free write to 1000 W. 2nd St., Minneapolis, Minn.

KONDON'S CATARRHAL JELLY

DENTISTS GIVING TIME TO SOLDIER

Members of Profession Will Alot Certain Time Each Day to Free Work.

Dentists of Montana, members of the Preparedness League of American Dentists, are making arrangements to work free to soldiers in the army of the United States. The free work of the dentists in this state is now being arranged by military men and Dr. Francis L. Stents of Butte, state representative of the league.

According to letters received from military men by Dr. Stents in the past few days, a number of dentists of the state have offered one hour each day free to soldiers who need dental work done. The work is not to be done absolutely free, charges to be made for actual expenses of material. The dentists are giving their own time without charge.

Physicians and dentists should work together in this plan, said Dr. Stents today. "As the army officers point out to us, not all of the soldiers are where they can be given the services of an army dentist. These soldiers are making very little money, not enough to allow for physicians' and dentists' bills. So the patriotic dentists of the country are getting together and offering a part of their time free to the men in khaki. We hear that a number of physicians are working on the same plan."

Dentists who are willing to give a part of their time to the army work are writing to army officers in San Francisco. When recommended by these officers, they are given army recognition and soldiers are allowed to accept their services for dental work.

guard by the two army men when placed aboard the train. Nothing was known in Butte of the intended departure of Pohl until army men visited the federal building last night and stated that they had come for the military prisoner. Pohl had been held in the Silver Bow county jail until "shut out" orders from president. The army men carried the "prisoner" with them last night.

CAN I TAKE DRAFTED MEN

Postmaster Phil Goodwin has received notice that applications for mechanical positions with the postal department and the government cannot be accepted where the applicant is a drafted man. Mechanical men are not necessarily exempt, it is also said, where the government would be unable to fill their places.

FEAST OF HANUKAH

Sunday evening, Dec. 3—according to the Hebrew calendar, Kislev 25th—the Jewish people will usher in the observance of the post-Mosaic festival of Hanukkah, also known as the Feast of the Maccabees and the Festival of Lights.

Members of Profession Will Alot Certain Time Each Day to Free Work.

NAVAL SCOUTS SECURE MATERIAL FOR FLAGS

The Naval Scouts will have signal flags. Through the generosity of the Synagogue, material for 54 flags has been donated to the boys. They will make the flags at once.

A meeting of the naval scouts will be held in the City Auditorium tonight.

\$5

As First Payment Places a MONARCH Range in Your Home Ready for Use, or

Your old range taken as first payment or in exchange for any range in store and allowance made for all it's worth.

MONARCH MALLEABLE RANGES outlast all other range because they are protected from rust damage by vitreous enameled lining inside of the iron castings instead of brittle gray iron.

MONARCH RANGES continue giving the same satisfactory service after year because every joint is made permanently tight by riveting of bolts and stove putty.

The Illustration Shows Why MONARCH Ranges Will Not "Rust Out"

Everybody likes the quick action and good baking of the Steel Range. They became immensely popular—yet in many sections Steel Ranges practically went out of use—

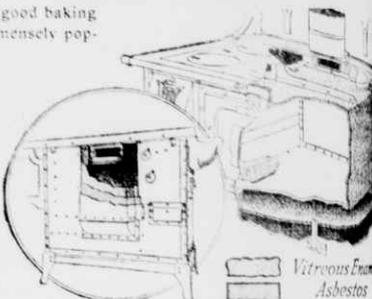

WHY?

Because they didn't last long enough to prove a good investment, they "Rusted Out."

Now MONARCH Malleable Ranges are "Steel Ranges" with every joint made tight with Rivets—not stove putty. They are so much better than "Gray Iron Steel Ranges" that they simply had to meet this Rust problem—

not avoid it by dispensing with the use of steel sheets for body and oven. And more to face they did—by lining every inside part exposed to heat and smoke with a material one knows is not affected by rust—Vitreous Enamel.

So now MONARCH Ranges have all the advantages of steel range construction—all the advantages of Malleable air-tight construction—and at the same time a durability beyond anything that has ever been known in any other type of range.

The Monarch Malleable Range is a range combining all the essentials of perfection. New 1917 winter models have gunmetal tops

FIRST: The economy and continuous perfect service, possible only in a range of malleable construction.

SECOND: The quick action and good baking qualities possible only in a range with steel oven and body.

THIRD: A durability that defies rust time as heretofore unknown in any type of range.
