

GALLANT SENATOR

Senator Carter Saves Ladies by Throwing Wild Horse.

Senator Carter had an opportunity for showing his constituency in Northern Montana, despite the fact that the frost of winters have whitened a beard made popular in the west by the Senator, they have not chilled the gallantry in him nor have they impaired a physique that Egyptian youths many years ago gave up in despair of ever successfully climbing.

The incident that for a few moments was tensely dramatic occurred just a little way beyond the outskirts of Harlem when the congressional committee was being taken out to inspect some lands. They were all riding automobiles, and as there is no speed limit law in that vicinity they were not fracturing any of the statutes.

A team of young horses driven by a lady who was accompanied by a couple of other members of the gentle sex, en route to town to listen to some of the orators advertised to be upon exhibition, took fright at the machine and reared and plunged near the brink of a great irrigation ditch whose glassy bosom was slightly ruffled with the wind. There where younger members of the party present, but before any of them could move, Senator Carter placed his hand on the side of the automobile and vaulted to the ground with the same apparent ease and sureness of foot with which years ago he went over staked and rider fences down on the old farm in Illinois.

The nostrils of the thoroughly frightened animals were distended with fear and they reared madly forward threatening the half-distracted women with death when the senator sized them by the bridle bits and with a trick not unfamiliar to plainmen threw one horse to the ground and held him until other members of the party handed the ladies down from their perilous position, when the horse was released, the disturbed harness readjusted by the senator and the party moved on. The senator was in the middle of one of the stories he tells so inimitably and after the adventure was past, picked up the thread narrative at the point of interruption as unconcernedly as though nothing out of the ordinary had occurred. — Havre Plaindealer.

A Narrow Escape.

Edgar N. Bayliss, a merchant of Robinsonville, Del., wrote: "About two years ago I was thin and sick, and coughed all the time and if I did not have consumption, it was near to it. I commenced using Foley's Honey and Tar, and it stopped my cough, and I am now entirely well, and have gained 175 pounds. I have had all due to the good results from using Foley's Honey and Tar." Lumber Talks.

Our lumber is cut from carefully selected timber, properly sawed by experts, graded and inspected by bonded inspectors and dressed by people who know how. The result is that in our yards you always find the best the mills produce.

Crops are assured and you have about decided to do that building that you planned last winter. Let us show you our stock and figure on your bill. You will make no mistake by giving us a call.

We want to fill your small orders, as well as the larger ones. Every order will have our best attention.

We Want Your Business.
IMPERIAL LUMBER YARD.

Keller Lake Items

From our Special Correspondent.

Ern Bahn and Mr. Kao were home from North Dakota over Sunday. Anton Anderson accompanied them on their return to thresh at Russell, N. Dak.

Mrs. Kao is taking care of Mrs. Swanson's baby while she is away at work. Mr. and Mrs. Swanson had the sad misfortune to have their house and most of its contents burned.

Mr. McCoy, Mrs. Jackson McCoy and Miss Karline went to the Sandhills Sunday for choke cherries. They called at the Cookson home.

One of Harris Clark's horses stepped on a nail which lamed the animal considerably before the nail was taken out.

Miss Nellie Steepie received a brand new pony. Be careful Nellie that you don't get thrown off.

Mrs. Robert Cookson's cousin, W. S. Drach, from New Windsor, Me., is visiting her at present. He is on his way home from the Seattle fair and the G. A. R. encampment.

Sunday was Mrs. Cookson's forty-eighth birthday. Mr. and Mrs. Keller helped her celebrate by serving a sumptuous dinner. She also received a shower of postal cards from her friends.

Miss Mary Mow dined at the Swank home Sunday.

Mr. Hurley is busy stacking grain this week. He is all smiles over his bouncing crop. He is a hustler.

SILVER QUESTION

American Mining Congress Seeks Increased Use of White Metal.

The American Mining Congress holds its Twelfth Annual Session at Goldfield, Sept. 27th to Oct. 2nd, and proposes to take up a discussion of the Silver question, with a view to bringing about a greater use of the white metal, thereby increasing its price and decreasing the rate of exchange with silver-using countries. This phase of question is different from the free silver doctrine of a few years ago, and becomes an important issue at this time by reason of the fact that American products are in great peril of being excluded from the silver-using countries of the Orient and South America because of the high rate of exchange. An adjustment of the silver question therefore, becomes imperative, else these very desirable markets will be closed to American industries.

Moreton Frewen, of London, England, James J. Hill and John Hays Hammond have been invited to speak of the subject.

Health and Beauty Aid.

Cosmetics and lotions will not clear your complexion of pimples and blotches like Foley's Orino Laxative, for indigestion, stomach and liver trouble and habitual constipation. Cleanses the system and is pleasant to take. Valley Drug Co. 2014

MONTANA'S SCHOOL OF AGRICULTURE

Over Fifty New Students Have Already Been Enrolled for the Coming Term.

The following letter was received by The Searchlight from Prof. Elliot, of the State Agricultural College:

We have received numerous letters asking for further particulars regarding the School of Agriculture Course, that is to be held at the Montana Agricultural College, October 19. Judging from the correspondence, this course is just about the thing that a great many young men in the state have been looking for. To begin with, we might say that all of the work given will be just as practical as possible. This will cover all questions pertaining to stock judging, breeding, feeding and management; as well as all points regarding dry and irrigated farming; grain breeding, seed selection, etc. Farm Dairying will take up the handling of dairy stock, the milking machine, farm butter and cheese, hand separator, testing, etc. The Horticulture will take up the various problems pertaining to Montana's orchard conditions.

In addition a course in farm blacksmithing and carpentry work will be included. Such things as painting and drawing out plow lays, sharpening drag teeth, making clevises, etc., together with cutting rafters, making gates and any other general farm work. It must not be forgotten that along with this practical work, will be given a thorough course in English and business methods.

SOME OF THE SPECIAL FEATURES.

It will be the intention to have besides the regular course, something each week of special interest to farm boys. For instance, Mr. I. Ingham, president of the A. B. Clark Horse Sales Co., of Miles City, a man who has probably broken and handled more horses than any other one man in Montana, will give a lecture to the students on the Montana Horse Industry. He will also give an exhibition of the proper method of breaking and handling horses and colts. Another practical demonstration will be given in handling steam engines such as are used on many farms. The different experts representing the different gasoline engine firms, will take their engines to pieces before the class and will thus give the students proper instructions in the handling and caring for such engines. Practical butchering, meat cutting and packing demonstrations will be given. There will be practical horse shoeing by a practical blacksmith.

As we have already said the whole course is designed to be of the greatest possible good to the young men who take it. The education offered is practically free to every boy and young man in the state. All that it will cost him in addition to his board and room, will be \$15.00. This is to cover such things as iron, wood, chemicals, etc., that are actually used in the laboratories.

On account of lack of room, only one hundred new students can be accommodated in this course. Already over fifty young men have registered so that it will be necessary for those who desire a place in the class of "One Hundred" to register very promptly.

W. J. Elliot, Principal.
Bozeman, Montana.

MONTANA MOSQUITO

A Thrilling Encounter Between a Mosquito and a Catfish Near Glasgow.

Bert McFarland is a very modest man, a man whose word, so far as The Democrat knows, has never been questioned; he is a member of a number of churches and besides is something of a politician. These facts are stated in order that the reader may not doubt in any way the following fish story Mr. McFarland is telling his friends. Last Sunday evening Mac took his hylan hook and fishing tackle and went down to the river to fish. Casting his line out he seated himself on the bank with the fish pole at his side, and commenced to warble some Gospel Hymns No. 3, but the fish would not bite. The mosquitos did, however, but Mac says he would brush them away and keep on singing in hopes that his voice might charm the fish as it had often done before.

At last a "he" mosquito settled down on his hand and started boring for blood. Mac caught him, and, pulling on his line, ran the hook up its back and then cast out again; the hook had hardly touched the water before there was great commotion in the river. He commenced pulling his line in and when right close to the shore he saw that the mosquito had fastened itself to the back of a catfish which weighed fully 9 pounds and they were having a life and death battle.

The fish gave a sudden jump, which broke the line, and, much to Mac's amazement he saw that the mosquito had sent its boring attachment through the back of the fish, and, raising itself up out of the water, flew away with the poor suffering fish. The last Mr. McFarland says, he could see of mosquito and fish, they were sailing over the North Bench.

Mac says that Monday W. H. McCormick was in the city trying to account for a large catfish being found half eaten and laying in his door yard. Now this is some may sound like a mosquito or fish story, but ask McFarland about it.—The Democrat

SUGGESTIONS FROM FARMERS

Census Director Durand Invites Practical Cooperation.

Washington, D. C., September 1, 1909.—The farmers of the United States are naturally very much interested in the census of agriculture and farms that will be taken April 15, 1910, as one of the subjects to be covered by the Thirtieth Decennial Census. Many are showing their interest by writing to the Census Bureau for the purpose of making comments upon census information regarding agriculture as presented in the past. The Director of the Census welcomes all such suggestions and gives them careful consideration, as he is anxious to have the results of the coming census correspond as nearly as may be to the desires of the people most interested.

In addition to studying carefully these suggestions, the Director has on his own initiative requested certain professors of economics and agriculture of the more important universities of the country, and other persons who have specialized in agricultural matters, to come to Washington for a short time for the purpose of studying carefully and criticizing plans now under way. Especially it is desired to obtain their opinion relative to the questions to be asked and their form, as the results to be obtained will so largely depend upon the character of the schedule and the manner in which the questions are propounded. These suggestions, coming from outside experts, are proving to be of great value, and it is believed that in consequence of this preliminary study more valuable and accurate data will be obtained than could otherwise be secured. After these special students and experts have made their preliminary studies, formal conferences are held in the office in which the whole matter of the character of the schedule and the best methods of securing the information are thoroughly gone over.

The Department is also seeking to secure the advice and cooperation, as far as possible, of the officers and experts of the Department of Agriculture, of the state agricultural colleges, farmers' societies and like organizations.

Many people delude themselves by saying, "It will wear away," when they notice symptoms of kidney and bladder trouble. This is a mistake. Take Foley's Kidney Pills, and stop the drain on the vitality. They cure backache, rheumatism, kidney and bladder trouble, and makes every trace of pain, weakness and urinary trouble disappear. Valley Drug Co. 2014

A Warning.—If you don't want to buy lawsuits to establish your rights to your lands or lots, insist that you are given an abstract of title, so that you know that your title is perfectly clear from the time it was patented by the government, before you pay over your money. Our records are complete and up to date in all respects and we send out all work promptly, neatly and accurately. Valley County Abstracting Co., R. E. Johnson, Prop., Glasgow, Mont.
