## News of Montana

### MONTANA STONE SUPERIOR.

Senator Annin Objects to Importing Stone.

Livingston.—Senator Annin makes it plain that Montana will regret it if Indiana limestone is used in the capitol additions instead of Columbus stone. The Indiana stone is a limestone and not a sandstone, it is not fireproof and the Montana stone is, it can be crushed and dissolved by the elements much quicker than can Montana stone, it cannot be so finely finished nor will it maintain a good appearance so long as the Columbus product, and if Montana stone is not used it will mean a direct loss to the union workmen of this state of more than \$125,000. These facts alone should cause the people of the state to make up the money required to assure the use of the proper material—Montana sandstone. But, while it will be a public subscription, in all probability a future legislature will see that it is returned to the individual contributors by the state. It will be remembered that at one time the legislature appropriated a large sum to make good the loss of a contractor on the state capitol and there is every reason why the next one should take action to repay the people who contribute to assure the use of Montana product. The more the facts become public the more it becomes apparent that nothing but Montana stone should be used.

### NEW MINE CONCENTRATOR.

Mill Will Cost \$150,000 and Handle 750 Tons a Day.

Butte.—A. B. Wolvin, of Duluth, president of the Butte & Superior Copper Company, announced after a conference in this city with other Duluth capitalists and representatives of the American Metals Company, that a 500-ton concentrator to handle the ores of the company will be installed at the Black Rock mine of the company on Butte Hill. This decision was arrived at after the Duluth men and the Metals Company's agents had inspected several sites. The plant will be in operation by March 1, and will be capable really of handling 750 tons daily of ore. The mill will be erected by the American Metals Company, a Guggenheim concern, which has contracted for five years' output of the Butte & Superior Company.

The concentrator will represent an expenditure of \$150,000.

Supt. Atwater announced tonight that, with the extension of the crosscut 180 feet south from the 1,500-foot level of the Black Rock mine, three veins had been cut, with more than 100 feet of zinc ore opened up, the breast of the crosscut being in ore, the last four feet of which assayed 57 per cent zinc and nineteen ounces silver.

## Women's Secrets

There is one man in the United States who has perhaps heard more women's secrets than any other man or woman in the country. These secrets are not secrets of guilt or shame, but the secrets of suffering, and they have been confided to Dr. R. V. Pierce in the hope and expectation of advice and help. That few of these women have been disappointed in their expectations is proved by the fact that ninety-eight per cent. of all women treated by Dr. Pierce have been absolutely and altogether cured. Such a record would be remarkable if the cases treated were numbered by hundreds only. But when that record applies to the treatment of more than half-a-million women, in a practice of over 40 years, it is phenomenal, and entitles Dr. Pierce to the gratitude accorded him by women, as the first of specialists in the treatment of women's diseases. Every sick woman may consult Dr. Pierce by letter, absolutely without charge. All replies are mailed, sealed in perfectly plain envelopes, without any printing or advertising whatever, upon them. Write without fear as without fee, to World's Dispensary Medical Association, Dr. R. V. Pierce, Frest., Buffalo, N. Y.
