

# Avery Tractors

## WITH SELF-LIFT PLOWS

8-16 TRACTOR, \$760 CASH

### SIX REASONS FOR AVERY TRACTOR SUCCESS:

**FIRST**—Avery Tractors have a special sliding frame on which the engine power plant is mounted. This sliding frame makes possible the elimination of the intermediate gear, shaft and boxings. Engineering authorities say that each gear contact means a loss of from eight to ten per cent of the power in the transmission, all of which is saved for use at the drawbar in an Avery Tractor. Because of this sliding frame an Avery Tractor has the least gears, the least shafting and the least bearings of any two-speed, double-speed tractor built—which means more power and longer life.

**SECOND**—All Avery Tractors have two rear drive wheels—no single drive wheel construction is used on any Avery Tractor. Furthermore, all Avery Tractors are regularly equipped with two speeds—a great convenience over a one-speed tractor—a slow speed for plowing and other heavy work and a fast speed for light loads and traveling on the road.

**THIRD**—Avery Tractors have slow speed, heavy duty opposed motors—not high speed light automobile motors.

**FOURTH**—Avery crankshafts are one-half or more than the diameter of the cylinder. There has never been a broken Avery crankshaft.

**FIFTH**—Avery motors have removable inner cylinder walls. This makes it possible to replace the part which is most subject to wear in a motor without the expense of having to buy an entire new cylinder.

**SIXTH**—Avery Tractors are entirely free from all pumps and fans. All such easily broken and troublesome parts are done away with in the construction of an Avery Tractor.

Avery Tractors are built in sizes to fit any size farm. They make tractor farming successful on any size farm, large, medium or small. They are the best power for threshing and road building as well as for farming. They are sold at low prices—3-pow Tractor, \$760 cash; 4-pow Tractor, \$1120 cash; 5-pow Tractor, \$1680; 6-pow Tractor, \$2145; 8-10-pow \$2475. We also build a special small size tractor for \$295.

Postage List (outside county) \$2.00

### Not Our Views

The Pioneer Press has this week opened its columns to a propaganda from the Montana Commercial & Labor League, an organization that seems to have mapped out for itself the herculean task of defeating prohibition in Montana this year. The matter is marked advertising, with the name of the Association signed to every article, so no one need be deceived as to the origin or responsibility of same.

The Pioneer Press accepts this matter with the emphatic declaration that in no way does it effect this paper's views or position on the issue in question. This matter represents one side of a legitimate controversy. To shut it out of a newspaper because it did not coincide with the editor's views would be narrow and arbitrary and might imply that the argument advanced was so logical and irrefutable that it would be harmful to the other side to publish it. The leaders of the prohibition movement in nation and state are preparing an assault on the "wet" literature and it will be admitted to our columns without question. Our own views will not be colored by the controversy in the advertising columns. Our position is pretty well known and it will be restated with perfect frankness a little later.

### All Is Amity (?)

The Cut Bank Pioneer Press inquires whether the democrats of Teton county are going to cast in their lot with the Stewart wing of the party or the Walsh faction. This newspaper does not pretend to speak for all the democrats of Teton county, but so far as we are able to learn there is no Stewart "wing" nor Walsh "faction." The republican newspapers of the state, the Press included, are endeavoring to engineer a split in the democratic party, but they are not making much headway. The democrats of Teton county will express their individual choice for the various candidates at the primaries, and when the ticket is named they will get behind that ticket and work for success at the polls. This will probably be true of democrats all over Montana. This bitter factional fight we hear so much about exists only in the minds of republicans.—Conrad Independent.

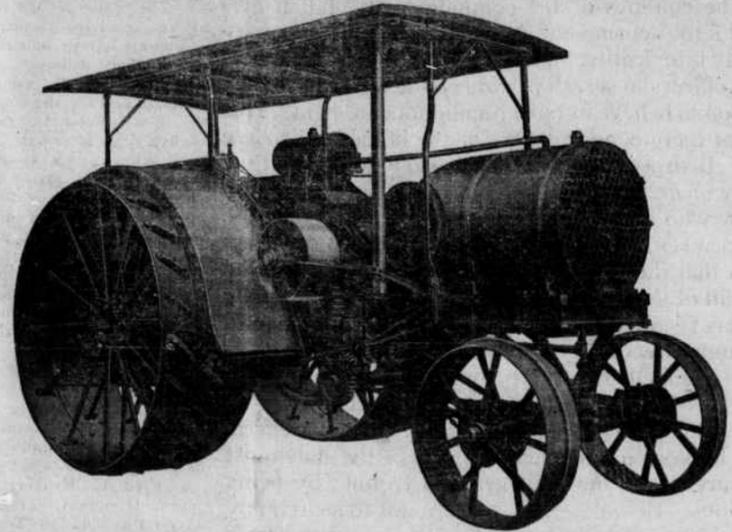

The Pioneer Press is glad to be corrected by Brother Busey, who seems sincere in his assurance that democrats all over the state are a big, happy family, as loving as little birds in their nests and with only one thought uppermost; the perpetuation of pristine democracy in power at Washington and Helena.

Our delusion arose through reading a recent statement from Joe Kirschwing, to the effect that the democrats who were not taking their orders from New York were lined up to work tooth, nail and tongue to root the "machine leaders," or proteges of the Amalgamated, as he plainly inferred, out of office. This is a declaration and a challenge, it seems to us, that is hard to reconcile with the honeyed declaration of Col. Busey. Then there's Miles Romney, over the mountains, uttering many maledictions against Sam Stewart. Does the malevolence of Miles sound like party love and loyalty?

And while in our perplexed, inquiring mood, may we ask Brother Tom where the democrats of Teton county stand as between Bryan and the Administration. Are they with Wilson on Preparedness or are they backfiring

## Gasoline and Kerosene

Are used with remarkable economy in the

with Bryan? These are matters that are puzzling us and we should like to have the circling haze dispelled.

Portugal has seized about twenty merchant ships because, as she says, she needs them. Is that Kultur?

A couple of days after being appointed a city peace officer a Great Falls man threw his family out in the back yard and neighbors had to call the police. Is that practicing Preparedness?

**FOR SALE**—We have here in the Flathead Valley some great bargains in farm lands and grazing fruit, stump and timber small and large tracts. Call or write us for particulars. Tuper & Co., Kalispell, Mont.
