

WOMAN AND FASHION

Stoles Have Elaborate Streamers. Just as the stoles of last winter required almost more material and ornament than the blouse, so the ends of all the new ruches are built by the same rule.

ONE OF THE NEW STOLERS.

med with many ruffles put on in design. After this lace, ribbon and silk bands are added.

This photograph shows one made of black net, elaborately trimmed with white and black striped ribbon and accordion plaitings of black and white net.

The Sweater Appears. Transatlantic tourists for a season or two have experienced the comforts and delight of the sweater, and ever and anon the golfer has appeared with a sweater of blazing color, and now at least the shops presently present sweaters.

Following the vogue for white, these natty and exceedingly becoming garments are shown in pure white tones. They come in both mercerized linen thread and in hand knitted yarn, and a new model is in the cable stitch and reaches below the waist line.

A becoming and unusual thing for the girl who "will be different" is a sweater of pale gray. A fancy stitch is used in the make up of the garment which ends at the waist line with a drop belt and which has as a finishing touch a modish turnover stock and tight cuffs.

The girl with a straight, lithe figure will promptly affect the sweater; her "chunky" sister will avoid it as she would avoid the plague. The sweater goes best with a trig tailor made skirt, many gored and severely plain in finish and effect. The hat to keep company with the sweater is a flat affair and thereon are laid, with the precision of the milliner who really knows, a quill or two, and a severely plain bow of the "long line" variety, and the bow may be held down to the buckle with a cut steel buckle, and the hat must keep to the general line and be long and narrow.

The Sailor Hat. The sailor hat is ever with us and changes very little in shape as the years go by. This year there are three kinds of straw introduced in the sailor

THIS SEASON'S SAILOR.

hats, one of which, the split semit, as shown in the hat here pictured, being far in the lead. The brim of this sailor is quite broad and the crown exceedingly low. While black bands are preferred, yet many are seen with colored ribbon bands. Worn with one of the modish linen suits, this hat completes a really smart outfit.

An Elaborate Linen Gown. A linen gown as elaborate of design as though it were richest silk in color a soft, delicate blue, the skirt bordered with a dainty vine pattern embroidered with white with thread. This same embroidery decorates the puffs of the sleeves and the edge of the bolero. Around the middle of the skirt is a series of lace medallions so shaped as to suggest the idea of sun rays. A deep collar of guipure is worn with this, and the grille of black velvet ribbon has little cut ends dangling from it, which give quite an end in the back.

Leaf Green. The popular and becoming color leaf green is seen in an accordion plaited gown of silk mull. The skirt is plain and flowing. The jacket waist is of leaf green the exact color of the mull and has a short tunic. It is belted in at the waist with a satin grille. The accordion plaited sleeves have an elbow cuff of the same leaf green.

IMPORTANT IF TRUE.

A New Chemical Process That May Cause Revolution in Mining.

BOISE, Idaho, Aug. 25.—By a new process just discovered gold can be abstracted from the most refractory ore at the nominal cost of \$2.50 to \$3 per ton. This can be accomplished by machinery costing only a few thousand dollars, and in the most inaccessible mountain fastnesses. There is no need of great reduction plants, coke, fuel of any kind or transportation facilities, as all that is required is the powdering of the rock and the extraction of gold by a chemical process.

Col. H. D. Rankin of the Rankin Gold Mining company is the discoverer of the great process that is to bring about the long dreamed of revolution in mining. The company owns mines in the Rapid river district, on the boundary line between Idaho and Washington counties, one of the most inaccessible regions in the inter-mountain states. There are mountains of ore in that vast stretch of territory running anywhere from \$5 to \$12 per ton.

Last year machinery was carried into the mines piece by piece by pack animals and a slow erection of the plant undertaken. Work has just reached here that the first trial has been made and has proved a most startling success. Colonel Rankin employs nitric acid as the agent for separating the gold from the rock and he gets the nitric acid from the nitrogen in the air.

In an hour and a quarter he secured 500 pounds of the acid and in 40 minutes more the first pulverized rock was run through its chemical bath and there lay in lustrous beauty as the residuum—a gold button. The figures of the cost of the reduction are Colonel Rankin's own, so is the gold button, and so is the secret of his great discovery.

Farmers Ruined by Floods.

KANSAS CITY, Mo., Aug. 26.—A special to the Star from Frankfort, Kan., says: The damage to farms in Nemaha and Marshall counties by yesterday's cloudburst is greater than at first estimated and is now placed at \$500,000. Great quantities of hay, wheat and oats in stacks, besides wheat and corn in bins, were swept away. Many farmers lost all their cattle and hogs, according to reports brought in today from the flooded districts. Business at Frankfort is at a standstill. Many bridges are out and wire communication with most of the flooded points is still interrupted.

Strenuous Politics in Arkansas.

ST. LOUIS, Aug. 26.—A special to the Post-Dispatch from Little Rock, Ark., says: Judge Carrol T. Wood, of the Arkansas supreme court, who is opposing Governor Davis as candidate for third term, knocked Governor Davis off a speaking platform, four feet to the ground during the campaign at Bismarck yesterday. Governor Davis was not hurt and friends prevented further trouble.

Judge Wood was immediately arrested on a charge of assault and battery. Governor Davis publicly asked Judge Wood questions and before they could be fully answered, interrupted with more questions, which so angered Judge Wood that he knocked Governor Davis from the platform. Later the matter was adjusted and Judge Wood returned to Little Rock today.

Must Remove Fences.

TOPEKA, Aug. 26.—It is announced at the United States marshal's office this city that notice has been served on six of the largest cattle companies in western Kansas to compel them to take down fences from government land. Fourteen more defendants will be added to the government case. The officers expect the fences will be removed without the matter being tried in the courts.

Robbers Make Big Hunt.

CHICAGO, Aug. 26.—A dispatch to the Record Herald from Vancouver, B. C., says: Four masked men last night held up the watchman of the Featherston Baugh mines in Atlyn and stole nearly \$20,000 worth of gold dust which had been collected in the sluices during the day.

Twenty workmen had just gone to supper, leaving the watchman in charge. He was caught from behind, pinioned and gagged and in twenty minutes the big cleanup was in canvas sacks which the robbers brought for the purpose. They fled in the darkness.

Lord Brassey Is Impressed.

BOSTON, Aug. 26.—Lord Brassey, eminent authority, and president of the London chamber of commerce, who is here looking over the business and shipping interests, has expressed the belief that the United States, with her tremendous resources, is undoubtedly destined to be a naval power. He predicts owing to present conditions, at least a partial disarmament on the continent, in France, Germany and Russia.

Leaf Green.

The popular and becoming color leaf green is seen in an accordion plaited gown of silk mull. The skirt is plain and flowing. The jacket waist is of leaf green the exact color of the mull and has a short tunic. It is belted in at the waist with a satin grille. The accordion plaited sleeves have an elbow cuff of the same leaf green.

said, "when the fleets of the United States will be raised to the first rank. Potentially the United States is, comparatively, the greatest naval power in the world. She has the greatest resources and it is only a question of policy with her."

VESUVIUS IN ERUPTION.

A Stream of Lava Flows Down the Side of Big Volcano.

NAPLES, Aug. 26.—The people of Naples and environs witnessed a remarkable spectacle at noon today. One thousand feet below the central cone of Vesuvius the volcano opened like a huge mouth out of which bled a fiery stream of lava, which ran down the side of the mountain and at first seemed to menace the observatory. This building, however is protected in the direction of the stream by a boundary line of lava 200 feet high which was thrown out during the eruptions of 1890 and 1900.

The eruption occurred without any warning whatever. There was no earthquake, detonation or rain of ashes, nothing but a clear stream of lava and red hot stones, which were thrown to a height of 700 feet, producing an extremely beautiful effect as seen from Naples.

The stream of lava, which is 15 feet broad at 11 o'clock tonight, had covered a distance of 2,700 feet. It deviated later from the direction of the observatory, which is no longer menaced. The only danger is for the new electric tramway up the volcano, which, however, has thus far not been touched. The eruption already seems to be decreasing, and it is hoped that no damage will result from it.

Young Whales Were Slaughtered.

ST. JOHNS, N. F., Aug. 26.—A school of 143 small whales, driven ashore at St. John's wharf, unable to retreat. The residents, men and women, waded waist deep into the water and killed them all with hatchets, scythes and pitchforks.

Increase in Taxable Wealth.

HELENA, Aug. 26.—A study of the figures as shown by the corrected assessment rolls of the various counties, all of which have been received, reveals the fact that the assessment of Montana property, including the railroads, passes the two hundred million mark—an increase of more than fifteen millions, as compared with the assessment of last year. To be exact, the total assessment for the state this year is \$201,333,310, of which the assessment on railroads is \$35,442,188.

The increase in the total real estate assessment over that of last year is \$4,809,909; in live stock, \$3,251,356; all other personal property, \$4,140,765; railroads, \$3,405,623. The live stock interests of the state show a value of \$35,812,571, a little more than the total railroad assessment in the state.

Ralph Pulitzer Arrested.

HELENA, Aug. 26.—Ralph Pulitzer, son of Joseph Pulitzer, the millionaire owner of the New York World, who spent some time in the northern part of Montana early in the summer, stepped across the boundary line into Montana late today and into the arms of State Oame Warden Scott, who was waiting to arrest the young man on a charge of violating the game laws of the state of Montana. He will be taken to Teton county for trial, it being alleged that he killed game out of season in that part of Montana.

Held Bozeman Bandits.

BOZEMAN, Aug. 26.—Hauley Morrison, contractor for the Montana Railway company, was held up by two masked men near the Northern Pacific depot this morning and robbed of \$1,800. Morrison was here on his way to Chestnut, where he intended to pay off today. He stayed all night at a local hotel and went down this morning to catch the 5:50 train. On arriving at the station he found that it does not stop at Chestnut and started back up town.

While he was midway between two streets, two masked men stepped out of the brush and shoved revolvers in his face. They compelled Morrison to go with them and then relieved him of his money, which consisted of a \$1,000 bill, two \$100 bills, four \$50 bills and smaller paper. The robbers also took Morrison's revolver, but gave him his gold watch, which had his initials in it. They said they could not use marked jewelry.

A Remarkable Record.

Chamberlain's Cough Remedy has a remarkable record. It has been in use for over thirty years, during which time many millions of bottles have been sold and used. It has long been the standard and main reliance in the treatment of croup in thousands of homes, yet during all this time no case has ever been reported to the manufacturer in which it failed to effect a cure. When given as soon as the child becomes hoarse or even as soon as the croupy cough appears, it will prevent the attack. It is pleasant to take, many children like it. It contains no opium or other harmful substance and may be given as confidently to a baby to an adult. For sale by D. G. Lockwood, druggist.

Timber Land, Act June 3, 1878

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., Aug. 26, 1903. Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the states of California, Oregon, Nevada, and Washington territory," as extended to all the public land States by act of August 4, 1892, Isabella Thain, of Highwood, county of Hill, state of Montana, has this day filed in this office her sworn statement No. 4, for the purchase of the N1/2 SW1/4 section No. 12 in township No. 29 north, range No. 8 east, M. 23 in town No. 29 north, range No. 8 east, M. 23 in township No. 29 north, range No. 8 east, before Charles H. Boyle, U. S. commissioner at Fort Benton, Mont., on Saturday the 12th day of September, 1903.

She names the following witnesses to prove the complete irrigation and reclamation of said land: Charles Lundy, Cyrus T. Neubert, Charles A. Fischer, Fred East, all of Fort Benton, Mont. J. M. BURLINGAME, Register.

Desert Land--Final Proof.

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., Aug. 26, 1903. Notice is hereby given that George Yellousoff, of Fort Benton, Montana, has filed notice of intention to make proof on his desert land claim No. 510, for lot 1, section 19, and lots 8 and 13, section 19, township 28 north, range 8 east, before Charles H. Boyle, U. S. commissioner at Fort Benton, Mont., on Thursday, the 10th day of September, 1903.

He names the following witnesses to prove the complete irrigation and reclamation of said land: William T. Bailey, William Humphrey, John Lee and Della Yellousoff, all of Fort Benton, Mont. J. M. BURLINGAME, Register.

Desert Land--Final Proof.

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., Aug. 26, 1903. Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before Charles H. Boyle, U. S. commissioner, at Fort Benton, Montana, on Wednesday, September 30th, 1903, viz: Mary Crisp, formerly Mary Coleman, who made homestead entry No. 12,770, for the S1/2 SW1/4 section 15, township 23 north, range 6 east.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz: Conrad Sack, of Geesee, Mont.; John W. Adams, of Knerville, Mont.; Ole Johnson and Ole O'Connell, of Geesee, Mont. J. M. BURLINGAME, Register.

Timber Land, Act June 3, 1878

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., July 17, 1903. Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the states of California, Oregon, Nevada and Washington territory," as extended to all the public land States by act of August 4, 1892, John Bernold, of Highwood, county of Chouteau, state of Montana, has this day filed in this office his sworn statement No. 8, for the purchase of the S1/2 NE1/4 SW1/4 section 21, township 29 north, range 8 east, M. 23, in township No. 29 north, range No. 8 east, M. 23, and will offer proof to show that the land sought is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before the Register and Receiver of this office at Great Falls, Montana, on Thursday, the 10th day of September, 1903.

He names the following witnesses to prove the complete irrigation and reclamation of said land: William Mitchell, of Chester, Mont.; John C. George, John C. Quigg and Alexander Johnson, of Marias, Mont. J. M. BURLINGAME, Register.

Notice of Contest.

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., July 18, 1903. A sufficient contest affidavit having been filed in this office by E. J. Constant, against homestead entry No. 1907, made July 9, 1902, for the N1/2 NE1/4 SW1/4 section 11, township 21 north, range 2 east, before Charles H. Boyle, U. S. commissioner at Fort Benton, Mont., in which it is alleged that said William E. Sunde has never resided upon the land entered by said "contestant" and that the land is more valuable for its timber or stone than for agricultural purposes, and to establish his claim to said land before the Register and Receiver of this office at Great Falls, Montana, on Thursday, the 10th day of September, 1903.

The said contestant having, in a proper affidavit, filed July 15th, 1903, set forth facts to show that after the filing of the contest affidavit, the said E. J. Constant is hereby ordered and directed that such notice be given by due and proper publication.

Desert Land--Final Proof.

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., Aug. 26, 1903. Notice is hereby given that Warren C. Thorpe, of Great Falls, Mont., has filed notice of intention to make proof on his desert land claim No. 5215, for the NE1/4 SW1/4 section 11, SW1/4 NW1/4 SW1/4, and lot 6, section 12, township 29 north, range 8 east, before Charles H. Boyle, U. S. commissioner at Fort Benton, Mont., on Saturday, the 12th day of September, 1903.

He names the following witnesses to prove the complete irrigation and reclamation of said land: John Ryan, John Maher, John Frame and Walter Brown, all of Box Elder, Mont. J. M. BURLINGAME, Register.

Desert Land--Final Proof.

UNITED STATES LAND OFFICE, GREAT FALLS, MONT., Aug. 26, 1903.
