

HOUSE FINISHES RATE BILL.

Debate Is Closed and Measure Will Soon Be Sent to Senate.

WASHINGTON, Feb. 7.—There was no delay from preliminary business in the house today, the railroad rate bill being taken up at 11 o'clock and the last day of general debate was begun.

"The history of railroad management in this country," he said, "is the history of favoritism, of corruption and of fraud."

In spite of this he would not say the railroads had not rendered enormous service, but they had not been as efficient as they should be.

The most effective feature of the bill, he maintained was the popular disposition back of it, the next was its public feature.

Expressing some reluctance at doing so, Mr. Mann said he would explain why the bill contained nothing relating to passenger and sleeping car rates.

"We have a bill which will pass this and the other body, and we did not want to array southern senators against the bill and open up in this body the question of separate cars for whites and blacks in the south."

As to passes, he said, the old interstate commerce act prohibited free transportation and the present bill did not interfere with that.

Mr. Hepburn concluded at 4 o'clock and on his motion the reading of the railroad rate bill for amendment under the five-minute rule was begun.

Navy Funds Are Missing.

WASHINGTON, Feb. 7.—Chairman Foss, of the house committee on naval affairs, is engaged in a quiet hunt to ascertain what has become of about \$6,000,000 that has mysteriously disappeared from the accounting books of the navy department.

The facts are these: The naval appropriation bill last year carried about \$8,000,000 for repairs of warships under the bureau of construction and repair.

There is a well-developed suspicion in the minds of Chairman Foss and his associates on the naval committee that the missing \$6,000,000 was diverted by the department to permanent improvements in the various navy yards, such, for instance, as the construction of buildings, the purchase of tools and supplies and the expansion of the working plants.

Protest Against Forest Reserves.

WASHINGTON, Feb. 7.—Vigorous complaints are being received daily by the Montana congressional delegation in connection with the blanket withdrawal of Montana lands preceding the creation of Kootenai and Cabinet mountain forest reserves.

Dangers of Impure Food.

WASHINGTON, Feb. 7.—That more than a million infants have been sacrificed to the various concoctions known as soothing syrups and pain-killers and over twice that number killed by impure milk, was the declaration made last night by Prof. H. W. Wiley, chief of the chemistry bureau of the department of agriculture.

the milk we have left at our homes, or the conditions under which it is produced," he added. "There are a thousand and one possibilities which might have combined to make what nature intended for food the most virile poison that chemistry can produce."

"I have found that the foods we daily consume are so fraught with germ life of a harmful nature, that I am almost afraid to go to the table. The butter is painted; there is little other than painted to be found. Canned goods are kept years and sold for the genuine article. I speak particularly of condensed milk."

"If we know nothing of the fresh milk we get, surely our knowledge is more limited as to the product that is put in cans. The Lord intended us to resort to cans only to tide us over one season, until green fruits could be had again, but the canneries don't know this. There is no law requiring them to stamp the date upon their goods; if they did, it would kill the sale."

Smoot Case Resumed.

WASHINGTON, Feb. 7.—The senate committee on privileges and elections today again took up the Reed Smoot case.

Walter Wolfe formerly professor of Brigham Young college at Provo, Utah, was a witness for the prosecution today.

Wolfe told of the plural marriages of Professor Benjamin Cluff of Florence Reynolds. Wolfe said he had "taken endowment" oaths 12 times, each time taking an oath to pray ceaselessly that God should avenge the blood of the prophet upon this nation.

The witness said he believed that polygamous establishments have increased since Utah was admitted as a state, and that Smoot knew of these conditions. Wolfe said that, as a Mormon, he could not become a United States senator because when the oaths conflicted it would be his duty to adhere to the church.

An Insurgent Democratic Senator.

WASHINGTON, Feb. 7.—Senator Patterson hurled defiance at his democratic colleagues in the senate today, and charged them with attempted coercion and intimidation. He declared he had been characterized as a White House democrat, a bolter, and "had sold his vote for patronage."

Reform Wave in Chicago.

CHICAGO, Feb. 7.—Chicago may have an ordinance making it a misdemeanor for any person under 21 years of age to smoke tobacco in any public store building.

Other articles in the proposed ordinance prohibit minors to purchase cigarettes or any of the parts known as the "makings." Furthermore, any person who keeps a place where minors smoke, or sells or gives away tobacco without the written consent of the parents, will be subject to a fine of from \$5 to \$50 for their first offense and \$65 to \$200 for the second.

Mormon Leaves Seven Widows.

SALT LAKE, Feb. 7.—Merriner W. Merrill, an apostle of the Mormon church, died last night at Richmond, Utah, aged 74 years. Apostle Merrill twice has been subpoenaed as a witness before the Smoot investigation at Washington, the last subpoena having been served but a few days ago.

Apostle Merrill was one of the wealthiest men in the Mormon church, and the richest citizen of Cache county. He had been married nine times and at the time of his death had seven living wives, each of whom was maintained on a separate estate. He leaves forty-seven sons and daughters.

Dense Fog in Chicago.

CHICAGO, Feb. 6.—From early morning until after noon a dense cloud of smoke and clouds hung over this city, making it one of the darkest days ever experienced here. All of the stores were lighted as though it was night, and the street cars ran with lamps lighted and had lights blazing as in the night time.

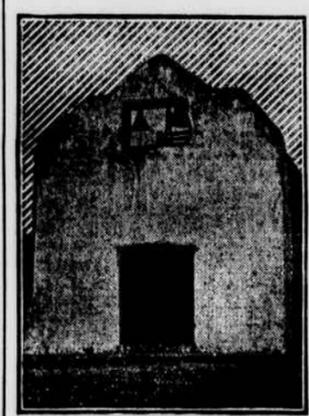

Much difficulty was experienced in the streets, the darkness causing many collisions. On the board of trade for the first time for many years, there was no announcement of the price of cash wheat at the closing of the session, dealers pronounced it impossible to determine the character of samples because of darkness. The weather bureau declared the darkness to be purely local.

New States Knocking for Admittance

THE question of admitting new members to the American sisterhood of states is always an interesting one, but it has peculiar interest in the case now before the attention of congress. Four different territories are under consideration in this connection. They are Arizona, New Mexico, Indian Territory and Oklahoma, and each has a history full of stirring and romantic incidents.

It would be possible to make four states out of the four territories, but that is not likely to happen. In discussing the question in his recent message President Roosevelt said: "I recommend that Indian Territory and Oklahoma be admitted as one state and that New Mexico and Arizona be admitted as one state."

The statehood fight is a somewhat complicated one, into which racial prejudices, politics and various other considerations enter. Many of the people of Arizona, especially those living in the northern part of the territory, are opposed to the proposition of admission with New Mexico on the ground that they would be dominated in all things by the people of that territory, with whom, they say, they have little in common.

AN OLD SPANISH MISSION AT SANTA FE.

peopled extensively by those of Spanish lineage. Opposition to admission of Arizona with New Mexico has also arisen among the mining companies of the former territory. It is stated that these corporations can operate more independently and profitably under a territorial form of government than they might be able to under statehood and do not care to risk a change.

There is substantial unanimity of opinion in favor of admitting Indian Territory and Oklahoma, but opinion differs whether they should come in as one state or two. It has been asserted that every citizen of both territories is in favor of single statehood if it can be secured and that a large majority is in favor of joint statehood if nothing better can be obtained. The people of Indian Territory have adopted, subject to ratification by congress, a state constitution and a complete state organization. They have chosen the name of "Sequoiah" for the proposed new state, thus perpetuating the name and services of the famous Cherokee chief who invented the Cherokee alphabet and did so much to advance the Indians of his own and other tribes in education and industry.

In Indian Territory there are a great many red men of considerable fortune and no small educational acquirements. Tribal organizations will go out of existence on the 4th of March next, tribal officials will go out of power and tribal taxes will cease. These conditions make an early decision as to statehood desirable. It is urged that no territory ever came to congress with better claims to statehood than Oklahoma. The territory has not only population, but wealth, commerce, industry and a high degree of civilization.

The ratio of illiteracy is said to be less in the newly settled Oklahoma than in that headquarters of culture and educational progress, New England. The statistics show also that the wealth per capita is larger in Oklahoma than in New England. While there are many red men in Oklahoma, the proportion of Indians to whites is not by any means so large as in Indian Territory itself, and this constitutes the main reason why the majority of the residents of Oklahoma ask for its admission as a state on existing territorial lines instead of its future being linked with that of the adjoining territory.

A TRAINED NURSE After Years of Experience, Advises Women in Regard to Their Health.

Mrs. Martha Pohlman of 55 Chester Avenue, Newark, N. J., who is a graduate nurse from the Blockley Training School, at Philadelphia, and for six years Chief Clinic Nurse at the Philadelphia Hospital, writes the letter printed below. She has the advantage of personal experience, besides her professional education, and what she has to say may be absolutely relied upon.

Mrs. Martha Pohlman

"I am firmly persuaded, after eight years of experience with Lydia E. Pinkham's Vegetable Compound, that it is the safest and best medicine for any suffering woman to use."

"Immediately after my marriage I found that my health began to fail me. I became weak and pale, with severe bearing-down pains, fearful backaches and frequent dizzy spells. The doctors prescribed for me, yet I did not improve. I would most after eating, and frequently become nauseated. I had pains down through my limbs so I could hardly walk. It was as bad a case of female trouble as I have ever known."

"When women are troubled with irregular, suppressed or painful periods, weakness, displacement or ulceration of the female organs, that bearing-down feeling, inflammation, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, 'all-gone' and 'want-to-be-left-alone' feelings, blues and hopelessness, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound at once removes such troubles."

"No other female medicine in the world has received such widespread and unqualified endorsement. The needless suffering of women from diseases peculiar to their sex is terrible to see. The money which they pay to doctors who do not help them is an enormous waste. The pain is cured and the money is saved by Lydia E. Pinkham's Vegetable Compound."

It is well for women who are ill to write Mrs. Pinkham, at Lynn, Mass. The present Mrs. Pinkham is the daughter-in-law of Lydia E. Pinkham, her assistant for many years before her decease, and for twenty-five years since her advice has been freely given to sick women.

Money cannot buy such testimony as this—merit alone can produce such results, and the ablest specialists now agree that Lydia E. Pinkham's Vegetable Compound is the most universally successful remedy for all female diseases known to medicine.

It is well for women who are ill to write Mrs. Pinkham, at Lynn, Mass. The present Mrs. Pinkham is the daughter-in-law of Lydia E. Pinkham, her assistant for many years before her decease, and for twenty-five years since her advice has been freely given to sick women.

Money cannot buy such testimony as this—merit alone can produce such results, and the ablest specialists now agree that Lydia E. Pinkham's Vegetable Compound is the most universally successful remedy for all female diseases known to medicine.

When women are troubled with irregular, suppressed or painful periods, weakness, displacement or ulceration of the female organs, that bearing-down feeling, inflammation, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, nervousness, sleeplessness, melancholy, 'all-gone' and 'want-to-be-left-alone' feelings, blues and hopelessness, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound at once removes such troubles."
