WILL TEST LIVESTOCK LAW.

Custer Stockmen Question the Power of Deputy Veterinarian.

MILES CITY, Nov. 15.—The constitutionality of the law creating and giving power to the state livestock sanitary board to destroy livestock found to be infected with disease by the state veterinarian or his deputies, is to be tested in Custer county before Judge Sanner of the Seventh district, before it is taken into the supreme court.

The question arises over the contemplated destruction of some horses by Resident Deputy Veterinarian Cheney, who claims to have found glanders existing among animals belonging to D. C. McKay of Kinsie. Dr. Cheney determined that the animals were affected with the disease and that they must be destroyed in accordance with the regulations of the state livestock sanitary board. A temporary restraining order was secured in the district court by Mr. McKay, through his attorneys, Loud & Campbell, until they could bring the question of the constitutionality of the law to the attention of the supreme court of the state.

The supreme court decided that the matter must first be tried in the district court and a complaint against the action of the state accordingly was filed. In the complaint it is also alleged that the horses were examined by Veterinarian Swank and that no evidence of glanders or other diseases of which the nature is specified was found, and plaintiff will endeavor to recover \$500 damages from the state on account of his having been deprived of the use of the horses for a period of time.
