## Our Oysters have the Tang of the Sea

We receive our oysters under the regulations of the Sealshipt System which covers the growing, shucking, shipping, selling of

# SEALSHIPT OYSTERS

Protected by an Effective System

At the seaside they are packed, solid, into air-tight containers, and then SEALED. The ice is on the OUTSIDE of the containers. The containers are in patent Sealshipts.

Handled in this way, they retain all the freshness and flavor of oysters just taken from the beds. They are all solid meats—not a drop of water has ever

been added—no ice has ever touched them.

These are good reasons why Sealshipt Oysters are so much better than common oysters which are shipped in open wooden tubs with chunks of ice sloshing around.

They are economical, for you are buying nothing but solid oysters—no water.
