THE recent panic in Wall Street was but another instance of speculators hammering one another with the usual results. A lot of water was let out of watered stock and in the squeezing process a number of stock gamblers were caught while the men who did the squeezing came out on top, and that was all there was to it. The real value of stocks was not affected nor the prosperity of the country checked. The merchant, mechanic and farmer have pursued their callings undisturbed, and as for the crops they and their selling prices are as large as ever. The government did well to refuse help to such a conscienceless set of stock gamblers.

Advertising the Doctors.
In a Kansas paper the following "personal notice" appeared:
"Our prominent townsman Theodore Monkton is seriously ill. He is being attended twice a day by Dr. Smith, in consultation with Dr. Morgan. His recovery, therefore, is in great doubt."
Nature as an Artisan.
As a weaver, nature produces fine work. Certain tree barks and leaves furnish excellent cloth, as, for instance, the famous tapa cloth used in the South Sea Islands. Nature is a glassmaker, too, according to the Indian review. By discharging her lightning into beds of quartz sand she forms exquisite little pipes of glass. She makes valuable ropes of various kinds in the shape of tropical vines and creepers, and she is even a lacemaker, as witness the lace trees of the West Indies.

HIS EXCUSE.

Brother—The wind blew my hat off and it went right in my tailor's front door.
