SECRETARY BLISS' REPORT

Recommendations as to Several Local Institutions.

GOVERNMENT INSANE ASYLUM

Superintendent Should Be Required to Deposit Moneys Intrusted to Rim by Patients in the Treasury as a Trust Fund Freedman's Hospital Work Commended.

Cornelius Bliss, Secretary of the Interior has transmitted his annual report to the President. The first recommendation h makes is that Congress shall make separate appropriations for the Civil Service Conndesion. The Secretary can are no good reason for requiring the department to disburse moneys appropriated for rent or to pay the contingent expenses, stationers printing and binding of the commission out of the department funds, which are madequate to properly provide for the wants of its bureaus. On the subject of forestry Secretary Blies says:

"It was my intention originally to es tablish a ferest bureau in this department, but the inadequacy of the appropria tion for the work precluded my carrying into effect such plan. I have, however taken such action as the circumstances per mitted and since July 1, 1897, have ap pointed special forest agents and super visors to patrol the reserves and to torre the regulations. The work per formed by this small corps will be a nucleus out of which, no coubt, will grov a forestry system and eventually a forestrates, one that, if efficiently conducted, will be practically self-sostating, and a revenue producer, by conserving the for ests, pratecting them in their growth and providing for their proper utilization."
In the matter of the Government Hos

pital for the Insene. Secretary Ellis says: "In the last annual report attention was directed to the fact that the superin tendent of the Government Hospital to the Insure had from time to time deposited with him as custodian maneys and private effects of patients to be expended or used in their behalf as the occasion might reamates, whether clothing watches, jewelty money, etc., were matters of trust impose upon the superintemient of the hospital by virtue of his office, and his legal responsi believ therefor was that of tensonable care only. Such fund on the 30th of June, 1896, accregated over \$50,000, and for the proper application thereof, as well as the Limiter is a well for the expenditures of such money, the Montgomery county. superintendent was not responsible under his bond as a United States disbursing

officer of public runds.
"The fact that an embezzlement of over \$14,000 from this find by one of the empieces of the hospital had occurred was sisc adverted to and the opinion exucessed that, as moneys of the character received by the superintendent, to be held in trust for the various patients were not strictly under the control of this depostment and the Government could not be legally responsible for loss thereof, it was advisable that legislation be had looking to the proper care and custody of such deposits. It was then recommended that Congress enact a law requiring the superintendent of the Government Hospital for the Insune to deposit in the United States Treasury the balance of this socalled patients' fund and any further sums paid him for a like purpose; that such sums be disbursed and accounted for in all respects as are the public funds, and that the coperintendent be required to give an additional bond for the faithful care and isbursement of such trust funds. No action having been taken by Congress on such recommendations, I deem it proper to resterate the same, and to state that the necessity for the legislation desired is as great today as it was at the time of the sibmission of the report of my

MARKET CONTINUES DULL

Sugar and Consolidated Gas the Strong Features.

Probable That a Mortgage of \$40,-000,000 Will Soon Be Placed on People's Gas Property.

New York, Nov. 18 .- News of the release the Competitor prisoners by the Spanish uthorities today again called attention to the Cuban situation and encouraged a more pacific view of it. The stock market reflected encouraging influences by decided strength, though most of the dvalings continued on a small scale, with the market ery dull the greater part of the day. London quotations showed fractions

dvances for the the leading internationally listed shares, and London houses were buyers of 8t. Paul and a few other stocks to a small aggregate. Sugar Refining and Consolidated Gas were strong features. The first named was affected by rumors bearing upon the expected decision of the Washington authorities upon the question of imposing a countervailing duty upon Dutch sugars. According to these rumors the decision will be in favor of such a duty, though advices from Washington through ordinary news claimels said that probably no decision would be reached for several

Liquidation seemingly had ceased, at my rate for the time, in Consolidated Gas, and the advance of the stock reflected in chief part the covering of contracts on the short side put out during the recent decline. People's Gas displayed heaviness in face of the strength eise where, being sold on romors of an impending taitman of the committee in charge of the Methodist bazar, now being successfully is to the effect that a consolidated mortgage of \$40,000,000 will be placed upon poreover, a nan whose whole soul is in the property, which will take up all th outstanding baues. The balance will not be sold except for extensions and Improvements:

An unfavorable effect in cont stocks was produced shortly afternoon by the dispetch from Philadelphia saying that some of the anthracite coal-producing some of the antiractic coarpivations companies had refused to agree to a policy of restriction. This has been denied by the companies here and a rally followed the publication. The maybet closed dull but firm

The combination of extreme duliness with Firemen's . a firm tone and an absence of selling pressure continues to be the chief and only characteristic of the present market. Yesterday's rading was devoid of any new features and the market as a whole was most unfuteresting, there being no specially new developments. A surprising number of stocks ere not dealt in at all, and in most of the thers only a few transactions occurre Sugar was again the comparatively active

feature. London prices for Americans were higher vesterday, and there was a disposition on London's part to buy stocks in New York. Exchange was easier, the slightly easier one of the London money market having

an offect upon rates. Demand sterling was quoted at 4 85 1 2. There is, as usual, much diversity dnion as to the immediate future of the narket and many reasons alleged for the carious similes of belief or alleged belief. Despite the very evident fact that nobally at the room traders are now doing any ldag, many p-ople are talking of the eavy people who are soon to get into the market at the low prices, so called and posh them up. Some even havard the ness that this active bull nesvement will

ommerce today. It is asserted now most confidently that nothing in the Cuban situation will cause the street any further trouble. The plan outlined in the gossip of the street is that the President, Speaker Reed and other leadng Republicans are agreed that the Administration shall stand for a lamb-like peace in all its atterances and methods and efforts, even if it has to fight the rest of the country to keep lamb-like with Smin, we might almost say. The Preshlent's message is to be so pacific that no Spaniard, no matter how firty and foolish, can object to it. A House Republican caucus indursement of this message is to be secured Mr. Reel is to prevent adverse action in

the Houre itself by his usual methods. It is also urged that after the great break of the last two months a reversal and advance is overdue. This argument s apparently invalidated somewhat by the fact that it has been made every other day during all these two months and with no result. It is a fact also that this is not the time of year when buil movement occur. The approach of Congresshis always en a depressant to the stock market. Or the whole, it would seem wise to take the present norkel for what it is, undoubtedly a professional affair entirely, and to buy on clines and sell on railies.

We make mention of this fact because promises have been so often made, and ern Union, Munhattan and Missouri Pacific would be made astractive it would be well for all who think of taking a position on the long side of these properties to wait for the return of Mr. Gould before venturing into the shares

The Sugar situation is interesting, as usual. The Trust stock was the only active feature of the market pesterday. It is now generally believed that the decision of the Treasury Department with regard to Dutch sugars will be in favor of American sugar people. This belief seems to be halled on pretty fair foundation from all that can be learned. However, the decision may not be reached for several days.

Mr. Lindblom, Mr. Silsby's correspondnt, believes wheat will fluctuate, bus that in the near future it will go up.
