

There's a Flashlight made to fit your need.

EVEREADY
FLASHLIGHTS

are made in many styles that sell at a wide variety of prices. Each is equipped with genuine, long service Tungsten battery and Mazda lamp. All are guaranteed to give the maximum satisfaction. That's why it pays to get a real Eveready.

We sell them.

LIGHTCAP

twenty-four zero foot pounds! Figured in another way, the energy in the flying earth is equivalent to nearly three sextillions of horsepower, the horsepower being the measure of the work done by 33,000 foot pounds of energy developed in one minute.

That is to say, if the earth could be brought to rest in one minute and all its energy turned into driving machinery it would develop nearly three sextillions of horsepower. But if it were brought to rest in one second it would develop sixty times more horsepower!

Then we may consider the thermal effects of the earth's kinetic energy if by instantaneous arrest of the motion it were turned into heat. There would be a sudden development of so tremendous a temperature that the earth might be vaporized. Puff! And some astronomer on some distant planet, aiming his telescope through the cool evening air, would catch sight of a little new nebula, twinkling like a thistle down blown into the sky of space.

Thereafter the dissipated earth would appear in a catalogue on that faroff world under the name of "Jones' Nebula," and nobody, casually glancing at it from an observatory and unsympathetically noting its extreme exiguity, would ever think of the heart-breaking history that had been nebulized in that speck of cosmic vapor.—Garrett P. Serviss in New York Journal.

Be Yourself.

I hardly know so true a work of a little mind as the servile imitation of another.—Greville.

velocity of half a mile per second it would not only miss its mark, but the whole breadth of the earth would have passed by before the ball had traversed one-tenth of the original distance separating the cannon from the earth.

The motion of the earth becomes possibly even more impressive when we consider the awful energy that it produces. Kinetic energy, or the capacity to do work, such as striking a blow, is measured by multiplying the mass of the moving body by the square of its velocity and dividing the product by 2.

In order to get the result in foot pounds we reckon the mass in pounds and divide again by 32 or by 64 in all. The reason for dividing by 32 (more exactly 32.18) is that that number is the unit in feet per second of the earth's gravitation, or the acceleration of gravity.

Calculated in this way, the kinetic energy of the earth comes out at more than ninety septillion (90 followed by

This means that if you could stand beside it and see the earth rush by its whole enormous globe, 8,000 miles in diameter, would pass your eye in about six minutes. It means that in one day and night (twenty-four hours) the earth travels 1,900,800 miles!

Compare! with the velocity of projectiles, the speed of the earth's flight is so great that the swiftest of them would seem to stand still. A rifle bullet may go, say, one-third of a mile per second in the first moments of its flight—that is, sixty times slower than the earth, which never stops or slows up.

The initial velocity of some projectiles may be half a mile per second, or forty-four times slower than the earth. If a cannon could be planted out in space and fired at the earth from a distance equal to one-quarter of the earth's diameter (which would be like a hunter firing his rifle about eighteen inches from a deer's side) and if the shot were aimed at the front edge of the flying earth (imagining the latter flat like a disk) and fired with an undiminished

CALIFORNIA SENDS NEW MAN TO U. S. SENATE

Photo by American Press Association.
JAMES D. PHELAN.
Mr. Phelan was one of the new men who took the obligation as United States senators last week. He represents California. Mr. Phelan is a Democrat and has served many terms as mayor of San Francisco. He favors national defense.

OUR FLYING WORLD

ts Awful Velocity In Its Spiral Whirl Through Space.
THE RESULT IF IT STOPPED.
Were Its Motion Suddenly Arrested the Earth Would Be Vaporized by the Heat Generated and a New Nebula Would Blaze In the Heavens.

The direction and speed of the earth's flight are the resultants of two motions with which it is endowed—the one around the sun, the other with the sun straight away through space. The combination of these simultaneous motions causes the earth to travel in a spiral path whose axis is directed nearly toward the bright star Vega, the most beautiful in the northern sky.

In its orbit, or annual path around the sun, the earth's mean speed is eighteen and one-half miles per second, while its speed of translation toward Vega, which it shares with the sun, is about twelve miles per second. We may call the resultant or combined speed of the earth in its actual spiral trajectory twenty-two miles per second.

The Gift Most Highly Prized — A Ring!

W-W-W Rings

A ring—that article of jewelry which, if properly selected, indicates good taste and individuality.

In addition to our stock of beautiful diamonds, we have a complete assortment of the famous W-W-W guaranteed stone set rings. This stock is so carefully selected as to please the most critical.

Remember W-W-W Rings are guaranteed and cost no more than the most ordinary rings. The pleasure and happiness which a good ring conveys is typical of the good will of the Christmas season.

The spirit of Christmas is evident in every department of our store. We have eclipsed all former attempts to serve our customers with the best satisfaction.

Our gifts represent all prices but every one is a quality gift—from the store where quality is the first consideration.
