More Plums and Apricots

Local Fruit Growers' Branch Quit Taking Plums and Apricots.

The Utah Grove Fruit Growers association this week sent out orders for all its branches to quit taking plums and apricots.

The reason for this action is that the association has decided that by assembling the shipments in carload lots from the different sections, results in too much handling to permit of their being shipped in arriving in first class condition.

Another reason is that the shipping commission men in the Utah market has been unsatisfactory, because their receiving other consignments.

This does not mean, however, that the association will not handle the peach, pear and apple crop. On the contrary, the association is proposing to handle about three-fourths of what is produced in these fruits. It has been in many states now making

Going in to Win.

Victory of Clean-up Movement Indicates that Pleasant Grove has First Class Chance to Be Best Ward.

The clean town movement seems to have caught Pleasant Grove with a popularly sentiment given a genuine impetus.

Everybody seems to have become suddenly interested with the fact that the state prize should come to this city. The big committees are meeting twice a week and in all parts of town many citizens with grub hoes, rakes and shovels cleaning the weeds from their back yards to correspond with their front yards.

The city health physician is co-operating, and draws attention to the fact that the official scorer will award more points for clean corners, privies and other objectionable features, than to freedom of weeds. A preliminary scoring will be made in the near future and the city will be told just where to do the work for the remaining two weeks before the final scoring is made.

W. L. Lund has offered a prize of \$15 to the ward scoring the highest, and is doing all in his power to keep the \$15 in his ward. Help will be given the widows, and others who do not join in on the movement may be prosecuted if their places are so bad as to come within the purview of the city ordinance.

Great Season For Canning Industry

Ogden, July 26—W. J. Parker, president of the Utah Cannery association, estimated today that when the pea season ends within the next few days 375,000 cases will have been packed. Of this number practically all will have been canned in the factories of Weber and Morgan counties. This is a record crop for Utah.

From present indications 1,900,000 cases of tomatoes will be the output from the Utah canneries this season, according to I. N. Pierce of the Utah Canning company, who is the pioneer canner of Weber county. All the factories are getting in readiness to begin packing tomatoes by August 1, and more people will be employed in the work than ever before.

If Weber county were situated nearer to the center of population the tomatoes that could be raised here would supply the United States, Mr. Pierce declared today. Under present conditions, he said, the canners depend a great deal upon the consumption because of the high freight rates.

Many of the canneries which are not putting uppeas are at work on apricots. The cherries and other small fruits have been packed. Along with the tomatoes some of the factories will handle peaches.
