AMERICAN FORK CITIZEN, SATURDAY, MAY 13, 1916.

NUMBER 4

Belorophan Fissure To Rival Pacific

Two Deep Tunnels Now Being Driven to Cut it at Depth, and Third One to be Started Soon—Source of Many Tons of Rich Ore in Mary Ellen and Major Evans Gulches is Located and Will be Opened up.

Globe Consolidated is the latest canyon property to be financed for an active campaign of development. The well known brokerage firm of W. H. Child and Co., is supplying the funds, and this week is placing 150,000 shares of stock on the market at 7 cents per share. The stock is said to be repeating Whirlwind history when 100,000 shares at 7 cents were taken in a week's time.

Just as soon as the receding snow line makes it convenient to select a suitable place to commence running a tunnel, a bunch of miners will be put to work driving the Belorophan vein. The John Cleghorn opened up late last fall. The Belorophan vein is one of the biggest in the canyon and is now known to have been the source of the hundreds of tons of rich float shipped in the earlier days and also recently from the Major Evans Gulch.

On the Belorophan ground much of the soluble lime has eroded away, leaving the ore lying in the top soil. Cleghorn is going after it where it makes to the deep. His demonstration last fall that the fissure is there, and the Pacific's proof that the best values also make into the quartzite, means that another vein as big, if not bigger than the Pacific will soon commence making history for the Canyon. Mr. Cleghorn has had a force of men at work there all winter, driving a tunnel to tap the vein on his own ground, and their work will make some mighty important disclosures about June 1st.

This same vein makes directly southwest across the Globe Consolidated ground and can be traced as

plainly as a cement sidewalk. One can dig in it any place and pick out samples of fine galena. The work done heretofore has been in the hard lime and while showing occasional values, it was not in commercial quantities. The new work will be in the soluble lime, lying from 50 to 100 feet below the old workings, and if Cleghorn's theory proves to be correct, then another tunnel will seek the ore deep in the quartzite. At any rate it seems certain that good bodies will be found in the soluble lime on the quartzite.

The same vein continues on into the head of the Major Evans Gulch, where the same big area of high grade float proves its presence. Here Charley Earl has a bunch of miners driving the Earl-Eagle tunnel to cut the fissure about where it makes in the contact with the quartzite and soluble lime. On the old Steele group, now the Earl-Eagle, much float has been picked up, some of it being so high grade as to make one dizzy. Mr. Earl will reach this vein sometime in the summer, depending on how soon he is able to change from single jacks to power drills.

These three properties, the Belorophan, the Globe Consolidated and the Earl-Eagle, are all on the same fissure. They with 200 feet of Live Yankee and a similar distance on the Silver Wave, cover a total distance of over 8,000 feet. A strike on either will produce water for the other two's mill wheels. Cleghorn is due to strike it first and well posted miners say that his is the next canyon sensation.

210,000, with shares at 1 cent each. R. Louis Phillips, president; William E. Kelley, vice president; Leonard S. Harrington, secretary and treasurer; George Goode, L. J. Phillips and James H. Clarke.

PACIFIC'S NEIGHBOR GETTING READY

American Fork Mining Company is Preparing for a Season of Active Development.

The American Fork Mining Company, owners of the Healey group of patented claims adjoining the Pacific on the north are preparing to commence work at an early date. The secretary, L. C. Hickock of Salt Lake City, states that just as soon as the melting snow makes it possible, a force of miners will be put to work opening up the ore bodies known to exist there. Considerable work was done on the company's ground several years ago. The recent developments in the canyon have shown where the ore lies, and before the present month is over the American Fork Mining Company will be among the most vigorous workers in the canyon.

EASTERN INVESTORS TURNING TO AMERICAN FORK

George E. Hemphill has returned from an extended trip to the middle West and to the East on mining business, and says that the degree of interest being displayed throughout the country in Utah mining securities is little short of amazing.

"The greatest interest is in American Fork canyon properties", he said, "and this will increase as quickly as our national foreign relations problem is definitely settled. The outlook in the East is for a great flow of investments to the West, particularly to Utah mining investments. Investors are looking more to coming mines where, in to place their money, than in established dividend payers."

"The large interest in American Fork canyon properties may be ascribed jointly to the development in Pacific, and the intelligent, conservative and far reaching publicity work being carried on by the stock brokers through the media of their market letters. As soon as one or two other

properties of this district bring in the ore, there will be a rush for these stocks. The prospective investors are preparing for it.

"I look for the Earl-Eagle and the Texan to develop something in the very near future. There is no question in my mind that these will equal Pacific with equal development. Both are well financed."

Mr. Hemphill went to the middle West, then to Boston and New York, returning to the middle West and then to Salt Lake. He says buying American Fork District securities is strong and growing stronger.

COMMERCIAL CLUB FOR CLEAN TOWN

Week Commencing May 15, to be Devoted to Cleaning up City Streets, Parks and Homes.

Thirty members of the Commercial Club met at luncheon Wednesday noon in Kelley's restaurant and voted unanimously for a clean town week. Six days will be devoted to the work and it is urged that every citizen join in the movement. Mayor Hunter has issued a proclamation published in this issue and the City Council has voted teams to haul away all the garbage that may be piled on the streets.

Monday will be for cleaning yards, raking rocks and repairing culverts. Tuesday—Plowing and cleaning waste water ditches.

Wednesday, Thursday and Friday—repairing fences and painting fences and out buildings.

President Chipman also reported on the plan of Earl J. Glade, the efficiency expert, providing for advancing and advertising the city.

Flower Day, June 14.

June 14, was voted as flower day and will be used as a business getter. Merchants will offer special prizes. There will be races on Main St., and a chase to catch a greasy pig. The program also provides for a band concert in the gymnasium at the Apollo Hall.

Every nation will be represented in costumes and prizes will be given for the best character. The grand march of the Nations will take place at 10 p. m.

THE REAPER

Mrs. Priscilla Covington Thornton Passed Away Sunday.

Mrs. Priscilla Covington Thornton passed away at her home Sunday morning, after being afflicted with dropsy for over three months. Mrs. Thornton was the daughter of Berrill Covington and Elizabeth Hodges Covington. She was born January 27, 1833 in Bedford, England, and emigrated to Utah in 1852, coming from Winter Quarters to the valleys in Pres. Smoot's company, arriving in Salt Lake in the fall of the same year. She was married to Thomas E. Thornton in April 27, 1856 making their married life 60 years and 10 days. Their posterity numbers eleven children, seventy-five grand-children, sixty-four great grand-children and one great great grand child.

She was modest and of a retiring disposition and had an abiding faith in the gospel of Christ.

Funeral services were held in the Fourth Ward meeting house Tuesday at 2 o'clock. Bishop Earl S. Greenwood presided, the speakers were, Warren B. Smith, James H. Clarke and Bishop Earl S. Greenwood. Martin Hanson gave the invocation and Christian Hansen offered the benediction. Music was furnished by the 4th Ward choir with a solo from Miss Myrtle Coddington and a duet from Mrs. Emma Greenwood-Anderson and Mrs. Mae Halliday. The grave was dedicated by James H. Pulley.

MRS. JAMES CONDOR SUCCEEDS TO OPERATION.

Moved from this City Three Years Ago—Funeral Services Held Thursday.

Mrs. Annie Condor, wife of James Condor, died at the Lehi hospital Monday. She had undergone an operation for a cancerous growth the Saturday before. She has been ill for the past three months and came down from her home in Provo Valley two weeks ago for consultation and an operation.

Mrs. Condor was born in American Fork, July 23, 1862. This city has been her home up till about three years ago, when the family moved to a ranch on Daniel's Creek, about five miles from Heber. Her parents are Mr. and Mrs. Peter Adamson. She is survived by her husband and three

CLEAN-UP WEEK

MON. MAY 15 TO SAT. MAY 20

Every person in the City should clean their premises. When you can afford it, you should repair your fences, paint or wash them. Let it be said American Fork is the cleanest city in the State.

With our close Cash prices you can do a whole lot of REPAIRING Paint Brushes—Whitewash Brushes—Bristle Brushes.

Why not BRUSH UP during Clean-up week?

EVERY DOLLAR EXPENDED FOR LUMBER IS WELL INVESTED

The buildings you construct with the lumber you buy, mean not only economy in the conservation of crops, machinery and stock, but add to the equipment and value of the farm.

Lumber purchased for repairs, is an especially wise purchase, as its use prevents the buildings from deteriorating in value and usefulness.

KNIGHT PLEASED WITH PACIFIC

Will Go After Big Fissure in Scotchman Tunnel, Now in 100 Feet—Will Start up Mineral Flat.

J. Will Knight with C. W. Earl and Peter Miller made an inspection of the Pacific mine this week. Knight is manager of the Miller Hill property on a part of which Mr. Earl has taken a lease. Mr. Knight had read much of recent developments in the Pacific, but expressed great surprise at the strength of the fissure, the amount of development work done and the immense bodies of shipping ore opened up. They examined the big strike in the north drift where the distance between walls is 20 feet. Mr. Earl declares that two men with power drills could keep a half dozen muckers busy indefinitely, wheeling out high grade shipping ore. Mr. Knight was also astonished with the development of ore on the level 100 feet above the tunnel, where the miners had a full breast of galena in an upside being made.

Mr. Earl had intended driving a new tunnel south of the Blue Rock No. 3 claim, but finding that the Scotchman tunnel is now half way through the Blue Rock claim he has decided to commence work here and all three men agreed that he is likely to cut the vein within the next 500 feet and Mr. Earl thinks it will probably be about 200 feet west of the Blue Rock No. 3 claim. The tunnel is caved in a few places. This will be caught up, and a track put in at once, when a force of miners will commence the search.

The visit of Mr. Knight will probably mean the resumption of work on the Mineral Flat, a property controlled by Knight interests. The Mineral Flat has had more money spent on it than any other property in the canyon, but has produced only a little ore, shipped by leasers. Developments during the past year in American Fork canyon and in the Cottonwoods just over the divide show where the Mineral Flat missed the ore. The property, however, is in the condition to get the ore without much more work and Mr. Knight intimated that this would be done.

FILED ARTICLES OF INCORPORATION

Provo, May 10.—The Toole Chemical Mining and Milling Company with nine Lost Lones claims at Six-mile Toole county, have filed articles of incorporation. The capital starts at

children, a daughter aged 21, and two sons aged 17 and 18. Her sisters are Mrs. Thomas Thornton, of Iona, Idaho, Mrs. T. H. Donahue of Peckaboo, Idaho, Mrs. J. E. Green of this city, Mrs. C. L. Killingsworth of Peirich, Idaho and Mrs. L. E. Lott of Lehi. Her brothers are T. H. Adamson of Heber and Peter Adamson, Jr., of American Fork.

Funeral services held in the First Ward meeting house, Thursday afternoon, were largely attended. Bishop James T. Gardner presided and the ward choir furnished the music. The speakers were J. H. Davis, Ammon Merrer, Alexander Lowe of Provo and Bishop J. M. Ritchie of Charlton. James Martin and Miss Mary Martin gave a duet. There were many beautiful floral tributes.

TROUT FOR CANYON STREAMS.

Dave Madison was in American Fork Wednesday and made arrangements to deliver a lot of Rainbow trout to J. V. Maxwell, the range rider, to be installed in the American Fork Canyon creek. The fish are several inches long so they will be good angling in another year.

HIGH WIND—SEVERE FROST

American Fork was visited with a high wind and severe frost this week. The big window in the High School building would have gone out but for propping by students. The truck at the Interurban was blown around and partly smashed.

The frost damaged the alfalfa and some of the fruit, the thermometer getting down to 27 degrees.

VISITORS FROM CHINA

In Native Costume at Presbyterian Church Sunday Morning.

Everybody invited. Seldom is such an opportunity presented in our small city. Prof. Chester G. Fuson, F. R. G. S., and family arrived on the Empress of Asia, at Vancouver one week ago from Canton, China, where Prof. Fuson is a member of the Faculty of the great Canton Christian College, where he has been engaged for nearly eleven years. Coming to America on a year's leave of absence, they are stopping here a week to visit the Meeker's, Mrs. Fuson being a sister of Rev. John Meeker. Several years

ago Prof. Fuson was a member of a Carnegie Magnetic Expedition that penetrated the far interior of China through Chinese Turkestan and into India via the great passes of the Himalaya Mountains exploring regions where Americans had never been seen. Prof. Fuson has also been engaged in the translation and preparation of text-books for extensive use in China. Prof. Fuson will speak on the great school work that is developing in China and his own special work. Mrs. Fuson, also in costume will sing hymns in Chinese, her voice being a rich contralto. The three Fuson children, all boys, are also expecting to be seen in their Chinese togs. After the lecture a table spread with curios and Chinese needlework will be at hand for inspection. Mr. Meeker hopes that the church may be crowded for this instructive and entertaining hour and regrets that he himself is leaving before Sunday in order to attend General Assembly, meeting at Atlantic City next week.

UTAH DANCE HALL AUSPICIOUSLY OPENED.

Monday witnessed the opening of the "Utah on the Lake," the big dance hall at the American Fork Lake Resort, and an auspicious opening it was too. The Elite of the city was

Automobile Contest Comes to a Successful Close

Miss Lilly Singleton wins, with Mrs. Nellie Robinson second. We wish to thank the candidates and those who helped them to make it a success.

The contest was the largest and most expensive one ever brought before the public of American Fork.

We continue to solicit your patronage on the principal of fair prices for the best goods and courteous treatment to all.

American Fork Telephone 99

out in force, and many auto loads from Salt Lake, Provo and other places. The floor was vetted one of the best in the state and the management gained a host of friends by the tact and courtesy shown his patrons.

NOTICE!

American Fork, Utah, 5-11, 1916.

Whereas the cities and towns of Utah are entering, what is known as a clean town contest, and our fair city being favorably located, with its many advantages and thrifty citizens. Now, we the undersigned set apart Monday, the 15 day of May, as a day for all citizens to clean up their respective lots and premises, burn what is burnable, the balance can be hauled in front of premises and repair all culverts.

Tuesday, the 16th trim shade trees, plow out and clean waste water ditches. Wednesday, Thursday and Friday repair fences and out buildings and see that same are painted before Saturday, as the committee will inspect all districts on this day.

Respectfully,
The City Council,
By John Hunter, Mayor.
