

UTAH TO PRODUCE GREAT WHEAT CROP

"Utah this year will produce 1,000,000 bushels of wheat or 60 per cent more than last year," says M. M. Austin of the bureau of crops estimates this week.

"Winter wheat," he continued, "improved two points in condition in May and the crop seems better than for several years. The condition of spring wheat is generally good, although the acreage is 7000 less than in 1919. Generally the decrease is due to sugar beets.

A shortage of seed was reported in Rich county.

"Oats promises about a half million bushels more than last year, although the acreage is smaller.

"The condition of barley sown is excellent, forecasting a greater production than last year, although there is a decrease in the acreage. Rye shows better than last month with prospects for a crop twice as large as last year.

"Hay conditions have advanced several points the past month until the present is now for a crop 43 per cent larger than last year. The weevil has done little damage.

"Sugar beets are doing well, the earlier plantings producing good yields but later plantings are hampered by crusted soil following storms.

"Fruits are unusually promising. The Dixie country was frosted severely this spring, affecting all classes of fruit. In the larger producing sections of the state, peaches are the only fruit which show poor prospects. Rich county has about two-thirds of crop.

"The crop acreage in the state are: winter wheat, 158,000; spring wheat, 1,000; oats, 70,000; barley, 22,000; alfalfa will harvest 343,000 tons."

NEW TRAIN SERVICE ON SALT LAKE ROUTE

Operating on a new schedule, the Salt Lake Overland limited train, on the Salt Lake Route, train No. 102 leaves American Fork at 11:49 a. m. daily, for Salt Lake City and Eastern points, arriving in Salt Lake at 1:10 p. m. and reaching Chicago the second afternoon at 4 p. m. This train has chair cars, tourist and pullman, observation car and dining car service.

The Overland limited No. 101, west bound leaves Salt Lake at 4:55 p. m. daily and reaches American Fork at 6:12 p. m. This train has the same superior accommodations as Eastbound train No. 102. It reaches Los Angeles the next afternoon at 6:40 p. m.

The above are in addition to Overland express trains No. 3 and 4; No. 3 for the west leaves American Fork at 1:20 a. m. and No. 4 for the east at 4:13 a. m.

Pleasant Grove Time
Train 102 from Southern Utah and California leaves Pleasant Grove at 11:42 a. m., arrives at Salt Lake at 1:10 p. m. and reaches Chicago second day at 4 p. m.

The Overland limited No. 101 west bound leaves Salt Lake at 4:55 p. m. and reaches Pleasant Grove at 6:19 p. m. It arrives at Los Angeles at 6:40 p. m. next evening.

Overland express No. 3 leaves Pleasant Grove for Southern Utah and California at 1:27 a. m. and No. 4 for East at 4:05 a. m.

A good lucern crop predicted, get your mowing machine ready or buy a new one at Chipman Implement House. Extras on hand.

NOTICE TO BICYCLE OWNERS

Section 25 of the Revised Ordinances of American Fork City provides that it shall be unlawful for any person to ride any bicycle on any street, sidewalk or in any public place within this city without first procuring a license therefor and a number plate, 1920 licenses and number plates can be secured by making application to the City Recorder, or the City Marshal, upon payment of fifty cents.

Bicycle owners are given until July 1, 1920, in which to procure licenses and number plates. Failure so to do, will make owners liable to the penalty as provided by law.

By order of City Council.

"The Probation Wife," Norma Talmadge's latest Select Picture, in which she is presented by Joseph M. Schenck, will be seen on Saturday June 12 at the Realart. It is the story of an inmate of a notorious cafe, who later reforms through the love and trust of a good man.

The story of "Quiet" Carter and his bride is unfolded to a smashing climax in "Sundown Trail" Monroe Salisbury's latest Universal photodrama, at the Realart Monday.

Louis Grantaire inherited a timber kingdom from his father and set out to view his holdings through the eyes of a lumber-jack. He wandered from camp to camp seeking information. His strength was greater than any man's and only a woman could break down the barriers of his reserve.

In pretty Annette Bossett he found the woman who lured him almost to death in his quest for love and honor. The story will be told at the Realart on Friday when "The Brute Breaker," the Universal photoplay is shown.

First Lifeboat Still in Existence.
The first lifeboat ever made is still in existence in Yorkshire. It was constructed in 1802, to be used "for saving life in storms or other dangers to ships." A poor shipwright invented and made it, and parliament considered his labor and skill so meritorious that it voted him the sum of \$2,000 as a reward.

Bath in West Africa.
The Bantu of West Africa makes elaborate preparations for a real soak by digging a hole in the ground, in which he puts seven herbs, a quantity of peppers, cardamom seeds and bushes, then he pours in a lot of boiling hot water. After he gets in a light frame covered with clay is put over the hole to keep in the steam. After hours of steaming the bather emerges and is washed off with clean water, then kneaded by a professional for one hour, when he dons his scanty clothing and goes his way "shivering with cleanliness."

Inverse Ratio.
Jud Tunkins has noticed that as the contents of a package grow smaller the bragging on the label gets bigger.

Standard English Pound.
The original English pound was derived from the weight of 7,680 grains of wheat taken from the middle of the ears and well dried. This remained the standard from the time of William the Conqueror to the time of Henry VIII, in whose reign the avoirdupois pound of 7,000 grains came into use. This was established as the standard pound during the reign of Queen Elizabeth and has been continued to the present day.

Selfishness Gains Nothing.
Men should see life as more than a quest of personal advancement. Selfishness may achieve, but its inglorious name will soon be forgotten in the round of yesterdays. It's life that lives for the common good that lays tribute on humanity and carves an indelible name in the very foundations of history. Call it Utopian if you will. Facts show that men must die to really live. And men who give themselves to human betterment live as they raise others from unreasonable drudgery to honorable toil and common comforts.

Anything is Possible.
While one man says of a thing: "It is impossible!" and contents himself with saying so, another one passes him and does it. This has been the history of the world's progress ever since time began. We cannot say of anything that it is impossible in this marvelous world of invention and endeavor. We can only say: "It has never yet been done."

The Name Taffy.
The name Taffy is a nickname for the whole Welsh people. The word is simply Davy (David), pronounced with aspiration; Sawney (Alexander) the most common Scotch name; Pat (Patrick) the most common Irish name; and John (John Bull) the most common English name. Each is used to designate the race or nationality to which it belongs. A similar case is that of Brother Jonathan, once commonly used to designate the people of the United States, but now largely superseded by Uncle Sam.

MICKIE SAYS
"YA SEE, BOSS, MY LIL TALK GOT TH' RESULTS AN' HERE I AM, BRINGIN' HOME TH' BACON—JUST KEEP ON SENDIN' TH' PAPER T' B. BECKWITH AT TEMPE, ARIZONA"

THE U.S. NAVY Passing Through the Canal.

The U. S. S. Wyoming and the U. S. S. New Mexico are shown here passing through the Pedro Miguel locks of the Panama Canal.

The electric engines along the side of the locks are called "mules" in deference to their four legged predecessors—they have just hauled the battleship through the locks. If you are interested in mathematics you might figure out how many old style mules it would take to do the job.

The Wyoming at the left, is moving out to the lower level, and as soon as the water in the other lock is let out to the correct level the New Mexico will move ahead.

This picture was taken from a U. S. Navy flying boat, during the recent trip of the Pacific Fleet to the West Coast. They were royally received at all of the ports along the trip.

Introduction of the Umbrella.
The umbrella was used in England as a luxurious sunshade early in the seventeenth century. Ben Jonson mentions it in a comedy produced in 1616. The eighteenth century had half elapsed before the umbrella had even begun to be used in England by both sexes as it is now.

Cornish Tin Miners.
The men who work in the Cornish tin mines are a class by themselves, and all their differences are adjusted by the stannary courts, as they are called from the Latin word stannum. These curious courts have existed in their present form since the middle of the thirteenth century, and, in a simpler form, much earlier; and the miners claim to be free from all other jurisdiction, "except in matters affecting the land, life or limb."

A Learned Capital.
Aarau, capital of the Swiss canton of Argovia, possesses one of the hardest working libraries in the world. Though the library consists of only 80,000 volumes—which is not so large as public institutions go in the United States—the population of the capital itself is only 10,000. With eight volumes per inhabitant, the library of Aarau has just cause to boast of itself as a miniature Athens.

CINCY REDS HOIST CHAMPIONSHIP FLAG

These ceremonies mark an important sporting event at Cincinnati, O., the unfurling to the breeze the first championship baseball pennant won by that town's team in years. Of course we all know that the Cincy Reds are now world champions, but it was not until last week that the champions received their flag. Manager Pat Moran is pulling it up—the second flag he has hoisted—the other in Philadelphia five years ago.

PLUMBING

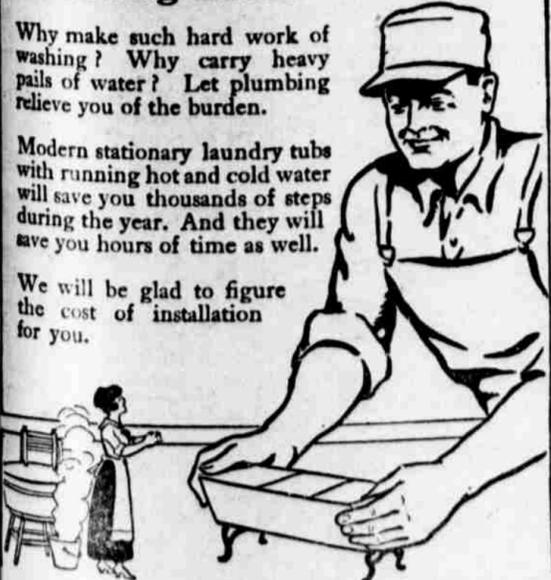

The Messenger of Comfort and Convenience

To Make Your Washing Easier

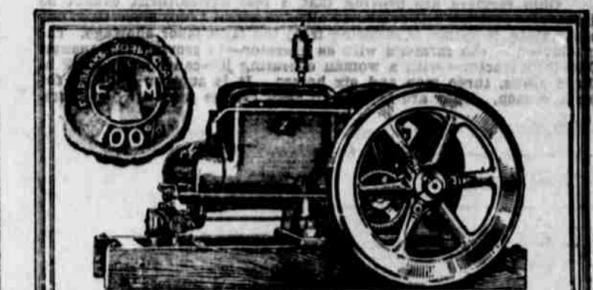

Why make such hard work of washing? Why carry heavy pails of water? Let plumbing relieve you of the burden.

Modern stationary laundry tubs with running hot and cold water will save you thousands of steps during the year. And they will save you hours of time as well.

We will be glad to figure the cost of installation for you.

M. S. LOTT,
PLUMBING and HEATING
LEHI UTAH

The "Z" Lives a Long and Useful Life

"Z" Engine endurance is proverbial—it's a lifetime engine. That's because every part liable to wear is case hardened. Push rod rollers—valve stems and cams—contact parts throughout—are made immensely hard by heat treating. They will not wear—nor will they break.

The "Z" has an extra large crank shaft. Not one has ever broken. All "Z" bearings are die cast and removable. Every "Z" part so carefully made that it is absolutely interchangeable. Ample lubrication—positive—well-balanced, correct mechanical design—help make the "Z" the "lifetime" farm engine. On the job—dependable—powerful—always.

Other "Z" features are: Runs on kerosene; coal oil, tops, as well as gasoline; built-in Bosch high tension oscillating magneto; more than rated power; every part interchangeable; clean-cut, efficient design.
