**BALLARD'S SNOW LINIMENT**

**READ THIS REMARKABLE CURE**

"I was much afflicted with rheumatism, writes Ed. C. Nud, Iowaville, Sedgwick Co., Kansas, "going about on crutches and suffering a great deal of pain. I was induced to try Ballard's Snow Liniment, which cured me, after using three 50c bottles. IT IS THE GREATEST LINIMENT I EVER USED; have recommended it to a number of persons, all express themselves as being benefited by it. I now walk without crutches, and am able to perform a great deal of light labor on the farm."

**BIGGEST CREAMERY.**

**BUTTER PROCESS IN WORLD'S LARGEST PLANT.**

Averages 55,000 Pounds of Butter a Day—Twenty Thousand Farmers Send Cream—Cream Alone Nets \$250,000 a Month.

Topeka, Kan.—In what is reputed the world's largest creamery, enough butter is made daily to provide a pair of it for 5,000,000 people. Fifty-five thousand pounds is the average daily output of the Continental creamery here. This quantity, in one-pound rolls laid end to end, would make a string five miles long. In one 24-hour run the concern turned out 92,000 pounds.

Five years ago the Continental was built and put into operation on an entirely new plan. Instead of receiving the whole milk it gets only the cream. The farmer patron has a hand separator. As soon as the milk is drawn from the cows it is run through this machine.

The skim milk is fed at once to pigs and calves, warm and sweet, worth almost as much for feed as before the cream was removed. The cream is gathered by the representative of the creamery, and hauled or shipped to the factory.

Under the old system, the farmer's wife drugged at the entire process of butter making. Now the men do the milking and separating—the factory does the rest.

The farmer used to market his butter at the country store at low prices for groceries and callouses at a high price. Now the cream is made into a high-class article worth twice as much in the market as country butter, and brings the farmer nearly twice as much money as he used to get from his cows.

The Continental creamery plan is very popular among farmers. It has pushed out along all railroads, even to the western border of the state. Some cream is hauled 400 miles. The company has its own refrigerator cars for handling cream and butter.

It has 500 cream-receiving stations. Its patrons number 20,000 Kansas farmers, who receive an aggregate of \$250,000 per month, although as individuals few keep more than a half dozen cows. Farmers are pleased with the system and are gradually increasing their milk production. They find the semi-monthly check convenient to have, especially during dull seasons.

In the factory everything is done accurately. An expert examines each can of cream as it comes in grades into first and second class, or rejects it entirely. From the receiving vat the cream goes to the Pasteurizer, where it is heated to 150 degrees, then cooled to 70 degrees for ripening.

Ripening is important. It controls the flavor of the butter. Flavor is caused by bacteria and a starter containing bacteria that gives a desirable flavor is added to the cream at the beginning of the ripening period.

A record is kept at every step and feature in the operation—the hour the cream is received, the amount of butter fat it contains, its acidity and grade. During the ripening process frequent chemical tests are made for acidity, and when sour enough it is cooled to the proper temperature and churned. These records are all handed to the butter maker, and he knows just how much and what kind of butter he will get; also how much salt and color to add.

The buttermilk is drawn off and the casein extracted, dried and sold to paper manufacturers to be used as a sizing material. The butter is cooled down, printed, wrapped in sealed packages by neatly dressed girls, and placed in storage to await shipment.

**SOON TO LAUNCH WARSHIPS**

Navy Department Announces Vessels Are Almost Completed—Nineteen Other Craft Under Construction.

Washington.—Thirteen first-class battleships will soon be added to the United States navy, several of which are nearly ready to be placed in commission, and 19 other vessels, including armored cruisers, protected cruisers, torpedo-boats and torpedo-boat destroyers, are under construction.

The first class battleships will be placed in commission within the next six months.

The bureau of construction and repair the other day prepared a statement showing the progress made on the vessels during the month of August, and how near completion are these ships. The most progress, four per cent, was made on the Mississippi, which is being constructed by the Cramps at Philadelphia. The percentage of completion of the battleships is: Rhode Island, 92; Virginia, 92.89; New Jersey, 89.8; Georgia, 86.44; Connecticut, 86.15; Louisiana, 84.4; Nebraska, 79.88; Minnesota, 71.16; Vermont, 61.4; Kansas, 60.1; Mississippi, 58.71; Idaho, 33.66, and New Hampshire, 13.12.

**CHURCH WORK AND WORKERS.**

The American Bible society last year sent forth nearly 2,000,000 Bibles.

Bishop Warren was surprised on his birthday by the congratulatory visit of 68 Methodist preachers and their wives. The official Presbyterian agent among the workmen, Rev. Charles Steinhilber, has undertaken to establish in 500 cities of the country better relations between the ministry and organized labor.

Prof. Benjamin Bacon, who holds the chair of New Testament criticism and interpretation in Yale theological seminary, has been made director of the

American school of oriental research in Palestine.

In every city at least half the population is made up of foreigners, "movers"—who rarely stay more than a year in one spot, and people who never go to church. That is one of Christianity's city problems.

Bishop Thomas B. Neely, of the Methodist Episcopal church, is planning for the erection of a Protestant church in Panama. He has almost completed negotiations for the purchase of the ruins of the church of Santo Domingo.

Over two per cent of the membership of the Presbyterian church in Japan has gone to war. This is more than twice the proportion of enlistments from the general population. Sixty-one Presbyterians are officers in the army or navy.

The American Bible society has recently received a number of interesting communications from its agent in Japan, Rev. Mr. Loomis, who says: "We have donated more than 22,000 Testaments and Gospels among the 45,000 wounded Japanese soldiers."

**The Unsubbed Snub.**

Clarice—Katherine is always looking out for more important people; so I determined not to notice her at Mrs. Chie's reception.

Clarice—How did it work?  
Clarice—Oh, she didn't even notice that I didn't notice her.—Brooklyn Life.

**It Wouldn't Do at All.**

"Let's have a George Washington party."

"What's that?"  
"Why, everyone is pledged to speak the exact truth."  
"Great heavens! You don't want to start a neighborhood feud, do you?"—Chicago Post.

**The Neglected Husband.**

"What makes you so blue?" asked the first new woman at the club.  
"My father-in-law has come to stay with us," replied the other, "and John and he sit at their knitting all day and cry about my treatment of John."—Catholic Standard.

**Ample Opportunity.**

First Schoolboy—It's dead easy for a school-teacher to be smart.  
Second Schoolboy—That's right. They've got lots of chance to look over the books and learn the lessons they didn't study when they went to school.—Brooklyn Life.

**An Old Adage Enforced.**

Dombey—How did you get that scar on your forehead, Jones?  
Jones—Oh, my wife and I had an argument and she obeyed that mean old adage—strike while the iron is hot.—Judge.

**A Source of Sadness.**

"Our delusions are the sweetest things in life," said the gentle optimist.

"How about the man who thinks he can sing?" asked the cynic.—Washington Star.

**Just Like the Rest of Us.**

He—You have a headache, you say?  
She—Yes, I have.

"Do you suffer much from headache?"  
"Yes; always when I have it."—Yonkers Statesman.

**Had Grammar and Functons.**

Ellen—How do you like your new society neighbors?

Agnes—Oh—don't say I said so—but, really, they ought to quit giving receptions and go to night-school.—Brooklyn Life.

**As to Taking Chances.**

Patience—A girl takes great chances on her first proposal of marriage.

Patience—Do you mean if she accepts or declines it?  
"Either way."—Yonkers Statesman.

**Bright's Disease And Diabetes**

We desire to place in the hands of those afflicted with Bright's Disease and Diabetes a 20-page pamphlet that is saving human lives. It is not an ordinary pamphlet, such as is commonly used to advertise medicines, but is principally made up of reports of scientifically conducted tests in a large variety of cases, showing 87 per cent of recoveries in these hitherto incurable diseases.

The specifics employed in these tests are known as the Fulton Compounds and the results obtained prove conclusively that these dreaded diseases, so long fatal, find deaths from Bright's Disease alone are appalling, over 100,000 a year, starting as kidney troubles have at last yielded to medical science. The pamphlet is free. Write to the John J. Fulton Co., 409 Washington Street, San Francisco, Cal.

When to Suspect Bright's Disease—Fuffy ankles or hands, weakness without apparent cause, kidney trouble after third month, frequent urination, may show sediment or cloudy—on standing; biting vision; day drowsiness one or more of these.

**The Line and the Time**

THE MIDLAND ROUTE between Utah and the east is by far the most attractive route over the mountains during any season of the year. The scenery is exceedingly grand, the service superior and equipment used is the perfection of modern air building. Be sure and ask for your ticket over the COLORADO MIDLAND and get the best. Write General Agent, L. H. Varding, Salt Lake, for further particulars and illustrated literature.

The best evidence that white is the emblem of purity:
