

SALT LAKE DAILY HERALD

THURSDAY MORNING, APRIL 22, 1880.

THE DAILY HERALD is published every morning, Mondays excepted, at East Temple Street, near First South, Salt Lake City, by the HERALD PUBLISHING COMPANY.

Subscription price \$10.00 per annum, postage included, in advance. Single copies, 5 cents. The weekly subscription, collection made by carriers, 25c a week.

THE SEMI-WEEKLY HERALD is published every Wednesday and Saturday morning, at \$2.00 a year, six months, \$1.25, postage included. Postage outside the U.S. and Canada, extra.

THERE ARE MORE "Jack Mormons" among Utah republicans than formerly. It looks as if the business men had become "J.M.'s" by an overwhelming majority.

SOME of the Utah democrats are anxious for a reorganization of the party here, but for what (and sufficient reason) they are unable to definitely state.

IT MAY be impossible to do so, but if it can be done, some plan should be arranged for ringing the fire alarm bells so as to inform the public as to the direction of the fire.

WE believe there is some plan now in force by which certain strokes of the hammer are intended to indicate certain points of the compass; but the system seems to be generally unsatisfactory.

IS ANOTHER part of this morning's HERALD will be found a communication from a well known Salt Lake democrat who has just returned from a few weeks' sojourn in the east.

THE bill providing for the reorganization of the party here, but for what (and sufficient reason) they are unable to definitely state.

WE believe there is some plan now in force by which certain strokes of the hammer are intended to indicate certain points of the compass; but the system seems to be generally unsatisfactory.

days. This is not quite up to railroad time, but it is far in advance of the speed made by horses. Some time ago a bicycle rider published a challenge to run against any horse 20 miles. No horse could accomplish what the bicyclist are doing every day. There are numerous recorded instances where men have ridden from 20 to 140 miles on the road without stopping, hence it must be plain that there is no great waste of power, in propulsion—not nearly so much as would be required in lifting and dropping the feet as in ordinary walking. In walking rather briskly a man steps 120 times a minute, and advances about 320 feet. At this rate he soon grows leg weary, and picks up his feet with an effort. It is claimed by bicyclists that on ordinary roads 120 steps, or 60 revolutions of the wheel, or 60 revolutions of the wheel a minute require little labor. They rather prefer about 70 revolutions or 140 "steps" a minute, that being nearer to the natural gait, as 120 steps are to the ordinary pedestrian. The walker, by his 120 steps, would go about three and a half miles an hour, while the bicyclist, by his sixty revolutions a minute—assuming the wheel to be 50 inches in diameter, the rider generally in use would advance nearly ten miles an hour; and at 70 revolutions a minute and the expenditure of physical force to the pedestrian's 120 steps—ten and a half miles. In racing, on good floors, bicyclists have attained as high as 150 revolutions a minute, and 100 revolutions a minute have been reached for short distances on the road.

A machine that can so augment the effectiveness of the body in locomotion, and accomplish such marvelous results, is more than a toy. The road prais bestowed upon the bicycles by their owners cannot all be genuine, for it is hardly probable that the many thousands of people in Europe and America who are using these vehicles are deceived, and have united in a huge conspiracy to deceive the rest of mankind. We are inclined to believe the bicycle is a useful and really valuable machine, and that it will grow in public favor in America as it has in England, France and Germany. The "cyclist's creed" is not looked upon with much favor in Salt Lake, but we are inclined to regard the manifest popular dislike to the machine to other causes than its merits in the bicycle itself.

MORE FATALITY.

A New York Building Gives Way While 800 People Are In It.

New York, 21.—A fatal accident occurred at the Madison Square Garden to-night, causing intense excitement. About 800 people were attending the Mahanessan Hospital fair, in the building, when, at 9.30, half the front, facing on Madison Avenue, gave way, falling outward, and part of the roof also falling in with a crash. It is not known how many are killed, but a number were injured. Three of the killed were counted here already been found. Several persons on the sidewalk were covered. Mrs. W. A. Ogden Hageman, a prominent lady manager of the fair, was the first person taken out of the building. She was supposed to be dead, but some signs of life being discovered, was taken to Bellevue Hospital. Wm. F. Heston, of New York, was a victim; Mrs. Ogden, and other injuries, were also broken, and other injuries. Part of the building which fell was mainly occupied as an art gallery. The pictures were jammed and insured for \$150,000 against fire damage, but as it is known that the pictures were not in the gallery, the insurance company is not liable. The pictures are so much injured as to be almost worthless. The cause of the accident is supposed to be the pressure on the floor of the gallery, which was not designed to support the weight of the pictures. The gallery was crowded with people at an early hour this evening. Suddenly it was noticed that the floor was cracking, and the pictures were falling. The gallery manager, Mr. McKay, was seen to be in a state of great alarm. He immediately called out to the people to get out of the gallery as quickly as possible. His manner of speaking caused most of the persons in the room to step out on a broad landing which overlooked the gallery. The dancing hall on the second floor was still full of people, and before they could be warned of the approaching danger a succession of loud reports were heard, and the floor of the gallery fell into the street. A large part of the roof which had been supported by the wall immediately fell in upon the heads of the frightened dancers, burying many of them. Debris and broken glass were heard on every side, and a panic followed. A moment after the accident the floor of the dancing room settled and there was a general stampede out upon the landing and down the staircase to the main part of the garden. The fire department was summoned and calls sent to Bellevue and New York hospitals and a number of ambulances in charge of surgeons promptly on hand. A woman and two or three men, whose names cannot be ascertained, were carried out dead. Wm. H. Tullison, 11 East Thirty-eighth street, was dragged from underneath a part of the roof, having both legs and arms broken. He is believed to be fatal. James Smith, of Fushing, Long Island, was also found suffering from severe bruises. Two or three men and several women were killed, and several were taken away by their friends. The firemen are still at work in the ruins. It is believed all the wounded have been removed, but feared that some more lifeless bodies are still lying in the debris. The loss of life is very great. The loss on the building is estimated from \$25,000 to \$40,000. The building is owned by Wm. H. Vanderbilt, and was insured against fire.

Another Family Quarrel in the Infallible Banks.

Atlanta, Ga., 21.—The republican state convention, held here to-day, was characterized by bitter feeling and great excitement. The majority of the convention was largely republican. It was called to order at 10 o'clock. A contest at once began between Grant and anti-Grant men, both of whom endeavored to obtain control of the organization. The temporary chairman was elected, both taking the platform and demanding silence. The excitement was intense, and amid cries and yell, the convert on assumed the shape of a mob. At last a compromise was had on a negro name, Pledger. Several addresses were made to the convention. The committee on permanent organization finally reported Major W. H. Smyth, a Blaine man, as president. The name was determined on at a trick and nominated a negro named Pleasant. The chairman put the question, and amid great confusion declared Smyth elected. He took the chair while the contest continued, and the convention adjourned till to-morrow morning. Grant men are holding a caucus to-night, to determine their policy. They will demand a reconsideration of the vote on Pledger, and if not accorded, will cause serious trouble. A riot is probable. All parties are anxiously consulting to-night, about to-morrow's programme.

Domestic.

Washington, 21.—Davis, Illinois, introduced a bill in the Senate to-day, authorizing the President to appoint Major Reno to the first vacancy in his former rank and grade. Montpelier, Vt., 21.—About 300 delegates to the democratic convention have already assembled. The Hancock delegation is unopposed, except to vote as a unit.

The Death-rate of

Our country is getting to be fearfully alarming, the average of life being lessened every year, without any reasonable cause, death resulting generally from the most insignificant origin. At this season of the year especially, a cold is such a common thing that in the hurry of every-day life we are apt to overlook the dangers attending it, and often find too late, that a Fever or Lung trouble has already set in. Thousands lose their lives this way every winter, while had Bosche's German Syrup been taken, a cure would have resulted and a large bill from a Doctor been avoided. For all diseases of the Throat and Lungs, Bosche's German Syrup has proved itself to be the greatest discovery of its kind in medicine. Every Druggist in this country will tell you of its wonderful effect. Over 500,000 bottles sold last year, without a single failure known, jall.

Factory Facts.

Close observation, careful attention to all facts of work, gives the operatives pallid faces, poor, languid, miserable feelings, poor blood, inactive liver, kidneys and urinary troubles, and all the physical and medicinal in the world cannot help them, unless they get out of doors or use Hop Bitters, made of the purest and best of remedies, and especially for such cases, having abundance of health, sunshine and rose cheeks in them. None need suffer if they will use them. They cost but a trifle. See another column.

NOTICE.
