THE CATTLEMEN.

The Convention at Chicago on Wednesday.

THE LITTLE WAR IN BULGARIA.

On to Mandalay—The Servians Victorious—John McCullough's Brain—Mitchell Elected.

Cattlemen in Chicago.

CHICAGO, November 15.—The second day's session of the National Cattle Growers' Association of America opened with President Henry E. Alvered in the chair.

Thos. Sturgis, of Cheyenne, Wyo., read a paper on live stock diseases, treated from a commercial standpoint. The paper, recommended, first, a somewhat larger appropriation for seaboard quarantine, so that the bureau might retain men of character and ability; second, the suppression of foreign disease, increased power to the bureau of animal industry, and the passage of sanitary laws modeled on those of Nebraska; third, to sustain and rigidly enforce local quarantine for protection against domestic diseases. The paper was warmly applauded. The chairman of the committee on resolutions then made a report. The resolutions provided for the following: A finance committee of five to collect subscriptions and raise funds to prosecute means to secure legislation, this committee to act under the executive committee of the National Cattle Growers' Association; the committee to gather and give to the newspaper press authentic information regarding contagious diseases, so to remove popular misconceptions. Third—The committee to urge upon Congress the necessity of perfecting the existing laws and to make provisions for the national oversight of cattle diseases by the Commissioner of Agriculture. The resolutions asked for an appropriation of not less than \$1,500,000 from Congress to pay for diseased cattle slaughtered, and also to provide for the payment of experts to settle the value of cattle on the basis of health, before infection. The resolutions were adopted.

The War.

LONDON, November 18.—Bulgarians, after desperate fighting, have carried one of the Servian's positions, which were menacing Slivitzna. Prince Alexander led the Bulgarian columns in person. An official report from the front states that the Servians entered Bresnik yesterday. The town had been abandoned by the Bulgarians who left eight guns. The capture of Bresnik leaves that route open to Sofia. The Bulgarian army of the Widdin district may be considered completely destroyed and dispersed. A dispatch relative to the engagements near Slivitzna says that after heavy fighting Prince Alexander was forced to retreat to Slivitzna. Both sides lost heavily. A sharp fight has occurred on the left of the Servian advance line, where both forces had their positions. The Bulgarian force at Widdin has blocked the Danube river.

Getting Mad.

NEW YORK, November 18.—A Washington special says the President has called on the State Department for a full statement of our relations with Germany and Austria in regard to the treatment of naturalized citizens of the United States in those countries. It is understood that the President is determined that the United States shall no longer remain inactive upon this question. In the event of Germany and Austria ignoring our protest, it is believed that the severance of all diplomatic relations with these countries would rapidly bring about a crisis. It is not probable that the President will mention the trouble in his message, but he will make powerful suggestions about the need of a new navy, and the alarming condition of our coast defenses.

McCullough's Brain.

PHILADELPHIA, November 18.—The examination of the brain of John McCullough was made to-day by Drs. Hngo, Engel, Charles K. Mills and A. E. Rousel, in the presence of a number of the leading Philadelphia scientists. It resulted in confirming the diagnosis made by Dr. Engel, after the actor's return from the Bloomingdale Asylum, and showed that there was a disease of the blood vessels of the brain, due to blood poisoning. Neither tumor or abscess were discovered. Morbid conditions were found to explain the symptoms evinced during life.

On to Mandalay.

LONDON, November 18.—The British forces in Burmah have carried the forts in the vicinity of Minhla and captured the city after three hours' firing from floating batteries, armed launches and heavy guns on board the steamers. The British lost four men killed and twenty-seven wounded. Minhla was the most strongly fortified position on the river, and by its capture the way is cleared for the British advance to Mandalay, as the forts at Ava, twelve miles from the Burmese capital, are only slight structures in comparison with those at Minhla.

Thin People.

"Wells' Health Renewer" restores health and vigor, cures dyspepsia, Impotence, Sexual Debility. \$1.

Mitchell Elected.

PORTLAND, Oregon, November 18.—J. H. Mitchell was elected Senator on the third ballot, the Democrats backing to him.

"Rough on Pain."

Cure colic, cramps, diarrhoea; externally for aches, pains, sprains, headache, neuralgia, rheumatism. For man or beast. 25 and 50c.

The Southern California.

SAN DIEGO, Cal., November 18.—The city is crowded with visitors who have come to take part in the celebration to-day of the completion of the Southern California Railroad, which gives the Atchison, Topeka & Santa Fe system a through trans-continental road to the Pacific Coast, with a terminus at this point. The greatest enthusiasm prevails among all classes of citizens. The day is observed as a public holiday, all business being suspended. The festivities will be continued three days. The floral and fruit exhibits are acknowledged to be the finest ever displayed on the Pacific Coast.

Disastrous Explosion.

PHILADELPHIA, November 18.—An explosion occurred at the Philadelphia Lubric works at Mifflin Street wharf. Thirteen men have been seriously burned, one man was instantly killed, and four others cannot recover.

Womers.

If you are failing, broken, worn out and nervous, use "Wells' Health Renewer." \$1. Druggists.

For Emigrants.

The general agents have notified me that prepaid emigrant fare will be increased after January 20th, 1886. Those having friends in Europe that they wish to help, will do well to secure their tickets at once. J. A. Peterson, Merchant and Immigration Agent, No. 672 Third South Street. P. O. Box 869, Salt Lake City.

IMPORTANT FACTS.

While many have been experimenting with electricity for the purpose of illuminating our cities, and making it the agent of mind across the ocean, there have been important discoveries made in other directions, of still further benefit to humanity.

It is now an established fact that we can telegraph through the human system, and detect the locality, character and cause of diseases, or derangement of the vital forces, with a certainty entirely foreign to other methods of diagnosis. This enables us to treat the cause of diseases instead of their symptoms, and thereby to insure recovery. There is a vastly improved electrical machine, the currents from which can be applied to the tender infant, or to the most nervous patient, without the possibility of injury or annoyance. There is a new method of electrical treatment which seldom fails to produce benefit, even after all the old processes have proven of no avail. It involves the removal of all obstructions to the vital force, and ensures its equalization, by the scientific application of electric currents to all affected portions of the human frame, which cures the following class of diseases:

Fever, Inflammatory Diseases or Palsy, Constipation or Acute or Chronic Diarrhoea, Spleen, Kidney and Liver Complaints, Dizziness, Cold Feet, Palpitation of the Heart, Dyspepsia, St. Vitus' Dance, Fits, Nervous Affections, Catarrh, Ringing Ears, Loss of Sight, Hair, Hearing, Smell and Voice, Bronchitis, Lung Diseases, Asthma, Neuralgia, Sciatica and all kinds of Rheumatism, Weak Back, Spasmodic, Impotency, Female Diseases, Prolapsus, Whites, Old Ulcers, Piles, Tumors, Felons, Cancers and many ailments thought to be incurable.

The discoverer of this invaluable science is an electrical practitioner of twenty-five years experience, and has cured many of the Salt Lake people, with whom he has made his residence for the past year. He has also instructed several persons in the science, and enabled them to effect cures in their own cases as well as to treat other patients. One of his pupils has made in this city, as much as \$20 per day. He will remain here for a short time to treat sufferers, or procure for them the latest and best machines, which he connects with his late improved battery, and instruct students in the art of curing. This will be a great benefit to those far away, who cannot remain long enough to receive thorough treatment. Once in possession of the machines and the knowledge of their proper uses, the patient has in his control the means of combating the worst class of disease, and can put common ailments at defiance. Electricity is the life of the human system, and the new science shows the best means of prolonging life and for the preservation of the keenest intellect until the most advanced periods; ensuring happiness, and increasing wealth cannot bring. Those who study this new science will find that they meet with better success and more liberal remuneration than in many other professions. Do not class this with other freely advertised remedies, but call and remove all doubts of its value by the inspection of the positive proofs of success. Dr. WILLIAM JONES has his office in the first brick building west of the Salt Lake Theatre, where he will examine patients, and describe their diseases without asking them to do so. He will show them how he operates electrically, and explain the cause of failure by other methods. He will also take pleasure in affording visitors an opportunity to convince themselves of the value of his remedies, by placing them in acquaintance with people whom he has cured in this city.

Read the following from two of the many he has treated:

"I have been treated by Dr. Jones, and from the great benefit I and others with whom I am acquainted have received, I positively believe that all of the above is true, and that there is nothing equal to his new method of treatment.—NERRI PRATT."

"After the best of medical treatment had failed to prevent sciatic rheumatism from drawing my hip out of joint, and the limb being paralyzed and withered to half its natural size, and still had the worst of rheumatic pains, Dr. Jones has cured me of them, and my limb is now about its natural size, and my health is generally improved. H. E. Grow."

The above Mr. H. E. Grow was, as is shown, a patient of mine during my treatment of him. He acquired some knowledge of my methods, and is now practicing quite extensively in this city. Remember the address, DR. WILLIAM JONES, Electro-pathist.

First Brick building west of the Theatre, First South Street, Salt Lake City.

Bed-bugs, Flies.

Flies, roaches, ants, bed-bugs, rats, mice, coppers, chipmunks, cleared out by "Rough on Rats." 15c.
