FINANCE AND MINING.

In Business Haunts for the Week Past.

ORE AND BULLION OUTPUT.

News From Many Mines—The Coal Fields—A Government Building—Business Prospects.

With the opening of March, at least in this Territory, one naturally looks for premonitions of a revival of business, which is usually slow and uncertain during the two months following the holiday boom. Replies to inquiries made of some of the larger dealers yesterday, revealed the fact that the spring trade was crowding in upon them. "Of course," said one, "we naturally expect that it should. Representatives of our various departments have been on the road for a couple of weeks past, and the orders sent in by them assume the most satisfactory proportions."

"As compared with a year ago?" "Well, an increase, and a very noticeable one, in nearly all our lines. Remittances are fair, and I expect the coming season to be the most prosperous for many years past."

"As to the present real estate boom—do you think it has had any good effect upon business?" "Most assuredly, and for this reason. People who have for many years past found themselves financially embarrassed, have sold their property for much more than they had any idea it was worth, have removed a short distance away from their old location, and bought a cheaper place. With the surplus money, thus earned, they have been enabled to settle many little outstanding accounts, while not much in themselves, in the aggregate amount to a great deal. There is, as you are aware, too, a much better feeling among all classes of society in all our cities and towns than was a year ago; everyone looks for 'good times' this coming spring and summer, and all seem to be pulling to that end. One man's efforts amount to but little, but when a community bands itself together to accomplish a certain object, it is pretty sure to succeed."

The pleasant weather of yesterday had an inspiring effect upon the retail trade, and the smaller shopkeepers reported "a good Saturday."

As to the need of a government building in this city, the replies received from the various United States officials concerning the rent paid, the danger from fire, and the uncertainties of the lease system, leave no room for doubt. The Chamber of Commerce will receive the hearty support of our Delegate in Congress, and if they will only push matters with a reasonable degree of force and speed, it is not improbable that Congress will open its heart and send a little of that surplus in this direction. There are any number of elegant sites to be had. Congress owes it to the thrifty residents of Utah that such a building should be erected here, and without delay.

The bill now pending in the Legislature, providing for the establishment of an agricultural college and experiment station in Utah should receive the most hearty support of every member of both houses. The Legislature will be blind to the interests of the Territory if it fail to make proper provision for the use of the Congressional appropriation for such purposes. The southern counties, it is understood, will bid hard for its location.

Silver took an upward jump during the week, reaching its highest notch yet attained since it commenced the rise a few months ago. A week ago it closed at \$5.05; yesterday \$5.17 1/2 was the figure. It is, perhaps, needless to say that mine owners, especially in the lead districts, are not wearing mourning as a result.

The local stock market is almost a thing of the past. There were rumors during the week of immense blocks of Utah Central changing hands, but they could not be traced to any definite source.

Since THE HERALD first published the item referring to a strike of anthracite coal near Sunnyside, on the D. & R. G. W., numerous other strikes have been reported, but not many of them come well authenticated. Lately, Manti put in a bid for a boom by reporting the discovery of a fine vein of hard coal within seven miles of the town. Now it is said that the romantic spot known as Castle Gate, on the D. & R. G. W., bids fair to bud into a blooming metropolis, because of the discovery near there by D. O. Rideout, of an excellent quality of coking coal. It is said to resemble in appearance the best qualities of English coking coal. So far, the tests made have been highly satisfactory; the coke obtained being excellent. But, as the methods employed were very crude, the company which has since been formed to work the property, intend erecting coking ovens, and submit the coal to a thorough and practical test. The gentlemen comprising the company have the most sanguine hope of success.

The best vein is less than a mile from the track, and there are said to be indications of a find even nearer than that. It is thought a satisfactory rate can be obtained from the railway company. Thus another Utah industry, which will give employment to many and keep much money at home that is now being sent abroad, is coming to the front.

Both legitimate trade and speculation continue duller than is usual at this season, says the recent circular issued by R. G. Dun & Co., though moderate improvement in trade is noticed at Memphis, Charleston, Kansas City and Milwaukee, and in speculation there has been a little more activity in stocks. To natural causes of dullness at this season there is added quite unusual uncertainty in several important branches of business. The termination of the Reading strike has come at last, and, as was suggested some time ago, it only increases the uncertainty in the iron business.

Effort to settle railroad wars have not succeeded, but new cuts cause much disturbance. The Sugar Trust meets unexpected opposition, threatening its existence; operations of other syndicates or combinations make it impossible to forecast the future in many trades; and meanwhile the uncertainty as to Congressional action on the tariff is in no degree lessened. Within a few days, the sharp rise in foreign exchange has also rendered the future of the money market less clear.

The fact that the Reading strike but slightly affected the iron business became clear before work was resumed, and it is now felt that, with the known shrinkage in the demand for iron, the resumption of work by a few furnaces would be likely to ensure lower prices.

The sale of extra good ore for \$15 85 at furnace is reported, and the competition to secure orders for rails is still keen. Bar iron is quoted at \$1.90, but car building continues unusually large; the Pennsylvania alone has placed orders for 2,200 cars and 70 locomotives; Eastern rail-makers have combined, and the price stiffens a little. Coke producers at Conneville have at last consented to reduce the price 25 cents, which will help manufacture. The Goebitz mine consolidation has collapsed, and the orders for Lake ore thus far indicate a moderate increase in demand. The failure of Graff, Bennett & Co. of Pittsburgh, produces no disturbance, but illustrates the over confidence of last year's expansion. The decision against barbed wire patents affects concerns having a capacity of 300,000 tons, but not actually producing 150,000.

Without a wider demand for securities, a decrease in railroad building must affect many branches of production. The moderate improvement in the stock market is therefore interesting, but as yet has scarcely lifted prices above the level of February 1st. Of new bonds issued this year, \$54,000,000 are for new road, and nearly \$12,000,000 additional were listed last week, but how many of these have found purchasers, no one knows. The quick advance in foreign exchange appears to indicate that investments of foreign capital on this side have ceased for the present, and experienced bankers now discuss the possibility of early exports of gold. The actual exports of goods at New York for three weeks past, show an increase of 35 per cent. over the same weeks of last year, but no such increase is expected in the aggregate.

The Treasury has taken in \$3,100,000 more than it has paid out during the week, slightly diminishing "bank" deposits. The situation at Washington does not promise any early action in regard to the surplus, and even the bill authorizing purchases of bonds may be delayed. Domestic exchanges are but slightly in favor of New York, and the movement of money this way seems to have ceased, with some tendency to outgo in the direction of Boston. At interior points, the supply of money is everywhere reported ample, and collections are on the whole improving, especially in the northwest.

Trade in breadstuffs is hindered by foreign uncertainties, which keep alive hopes of war and higher prices. Corn and oats have declined about 1 cent each, while wheat has risen as much, but is weak again. No change is noted in hog product; oil has risen about 2 cents, while cotton has weakened. Sales abroad and the lack of domestic demand weaken coffee, and in the sugar trade, a Philadelphia house offers to undersell the Trust, and at Boston there is rumor of a split, while from San Francisco news comes of organized opposition by Spreckels and others. Reports that the copper syndicate has secured the Calumet & Hecla output for years, lead other producers to contemplate a large increase in production. The long depression in the price of leather is not yet broken, and the boot and shoe trade is reported satisfactory. The dry goods market continues fairly active for cottons, though print cloths are a shade easier; in the jobbing trade growing activity is noticed. But in woolens, the prospect of improvement is disturbed by renewal of the large auction sales, and a temporary sale of silks is also announced.

The business failures occurring throughout the country during the last seven days, number, for the United States, 237, and for Canada 33, or a total of 270 failures, as compared with a total of 273 last week, and 289 the week previous to the last. For the corresponding week of last year, the figures were 293, made up of 186 in the United States, and 23 in Canada. For the past four weeks, the aggregate has been 951 in the United States, against 899 last year, and 194 in Canada, against 141.

Ore and Bullion.

The ore and bullion output at the various banks in this city for the week ending Saturday, March 3d, 1888, were \$154,945.98, as compared with \$96,036.68, for the week previous. They were reported as follows:

Table with 2 columns: Item, Amount. Includes By McCornick & Co., Hanauer bullion, silver and lead ores, By Wells, Fargo & Co., Fine bars, Ore, Total, By T. R. Jones & Co., Germania bullion, Queen of the Hills, Silver and lead ores, Total shipments for the week.

At Mr. Hanauer's Office,

the week is reported as a fairly good one. There were not many shippers, but the lots received were unusually large, and aggregate considerably in excess of the week previous. Besides the usual output from the Park, the shipments received are detailed below:

Yosemite

Seventy tons of good ore, going 43 lead and 17 silver, and bringing in the neighborhood of \$25, came in during the week.

The Nest

had a 50-ton lot of the usual good grade.

The Broadway

shipped about fifty tons of concentrates to Hanauer.

The Spanish

was represented by a 20-ton lot of ore, going 50 per cent. lead, 30 oz. silver, and bringing about \$30.

The Lead Mine

sent to the smelter, as usual, 250 tons of the usual grade of ore.

Lucky Boy.

From this property, which seems determined to merit its name, there came thirty tons of 100 oz. ore, bringing \$90 per ton.

Bullion-Beck

One hundred and seventy tons of the regular quality, came up and was sold during the week.

The Horn silver

was represented by two lots, aggregating 100 tons.

The Asphalt Beds.

But little has been said concerning the doings of the North American Asphalt Company, whose extensive works are situated near Thistle, on the D. & R. G. W. Railway, but active operations continue; a three-story building 40x114 feet, will be finished in a month from now, and this will contain the machinery to be used in preparing the crude asphaltum for the market. Asphaltum will yet prove to be one of the most important industries of Utah, and is but one of the hundreds that will help keep the boom here, by giving support to many workmen.

Minute Moore.

The forces at the Minnie Moore are being increased daily. A northern exchange says the prospects are bright for unusually large shipments of ore this season.

Queen of the Hills.

Flattering reports also reach us from the Queen of the Hills, which is also adding to its force as rapidly as possible under existing circumstances. Yesterday we pay day for this company; that of the Minnie occurs on the 6th; it is estimated that these two mines will distribute about \$20,000 during the next ten days.

The Bellvue Sampler

is kept busily employed, and it may be interesting for Salt Lakers who are interested in Idaho mines to know that all the properties in and around Broadford and Bellvue are in fine condition. The outlook is reported better than at any previous season.

The Sampson

The working force of the Sampson has been increased of late, and the Record says that as soon as the roads get in fair condition once more, shipments will be resumed on a large scale.

The Orescent.

Sinking in the incline shaft has been resumed.

The Under-round Surveys

Councilor Bryan's bill to provide for underground surveys of developed mines in certain cases, is one of the wise measures of the present session and should become a law. It is very just in its provisions on all points, and will do much towards protecting the interest of claim owners, whose ground lies adjacent to large and active properties. The time has arrived when a reasonable precautionary measure is needed to protect the interests of claim owners not only in this camp but in other parts of the territory. From what we have heard since our location in the Park, it is our candid opinion that some measure like Mr. Bryan's bill is an absolute necessity, and we shall watch its fate with considerable interest. It is almost sure to run against a hidden snag because of its importance, and we desire to locate the snag and judge the source from which it obtains its power for evil.—Call.

INFANTILE SKIN DISEASES.

Our oldest child, now six years of age, when an infant six months old, was attacked with a violent, malignant skin disease. All ordinary remedies failing, we called our family physician, who attempted to cure it, but it spread with almost incredible rapidity, until the lower portion of the little fellow's person, from the middle of his back down to his knees, was one solid rash, ugly, painful, blotched, and malignant. We had no rest at night, no peace by day. Finally, we were advised to try the CUTICURA REMEDIES. The effect was simply marvellous. In three or four weeks a complete cure was wrought, leaving the little fellow's person as white and healthy as though he had never been attacked. In my opinion your valuable remedies saved his life, and to-day he is a strong, healthy child, perfectly well, no repetition of the disease having ever occurred.

GEO. B. SMITH, Atty at Law and Ex-Prov. Atty. Prepared by the Cuticura, Resolvent, and Chemical Company, Boston, Mass.

THOUSANDS OF CHILDREN

Are born into the world every day with some eccematous affection, such as milk crust, scaldhead, scurf, or dandruff, sure to develop into an agonizing eczema, the itching, burning, and excruciating of which make life a prolonged torture, unless properly treated. A warm bath with CUTICURA SOAP, an exquisite Skin Beautifier, and a single application of CUTICURA, the Great Skin Cure, with a little CUTICURA RESOLVENT, the New Blood Purifier, are often sufficient to arrest the progress of the disease, and point to a speedy and permanent cure. Hence, no mother who loves her children, who takes pride in their beauty, purity, and health, and in bestowing upon them a child's greatest inheritance—a skin without a blemish, and a body nourished by pure blood,—should fail to make trial of the CUTICURA REMEDIES.

Sold everywhere. Price: CUTICURA, 50 cents; SOAP, 25 cents; RESOLVENT, \$1.00. Prepared by the Cuticura, Resolvent, and Chemical Company, Boston, Mass. Send for "How to Cure Skin Diseases," 64 pages, 50 illustrations and 100 testimonials.

BABY'S Skin and Scalp preserved and beautified by CUTICURA MEDICATED SOAP.

HOW MY SIDE ACHES!

Aching Sides and Back, Hip, Kidney and Uterine Pains, Rheumatic, Sciatic, Neuralgic, Sharp and Stinging Pains, relieved in one minute by the Cuticura Anti-Pain Plaster. The first and only pain-killing Plaster. 25 cents.
