

THE BILMESTALIC LEGATES NAMED

Utah to Be Represented at the Bimetallic Convention.

ACTION BY THE GOVERNOR.

The Report of a Centennial-Eureka Strike Is Confirmed.

The Officers of the Company Are Retired—Meeting of the Copper Smelter Committee—Mining Men Witness An Electric Drill Exhibition.

Some time ago Governor Thomas received a communication from A. A. Flak, president of the Pan American Bimetallic association, requesting him to appoint twenty delegates to the convention to be held at Washington, D. C., on Feb. 22, and yesterday his excellency issued the following proclamation:

"To all to Whom These Presents May Come, Greeting:

"Know ye, that repeating special trust and confidence in the ability, integrity and discretion of Charles C. Goodwin, Robert C. Chambers, Thomas Marshall, Henry W. Lawrence, William F. James, John J. Daly, J. B. Beckner, H. Henderson, Edward F. Colburn and C. B. Markland, of Salt Lake county; F. J. Kiesel, J. F. Bagley and Ben E. Rich, of Weber county; A. G. Saxey and J. J. Mes, of Utah county; William M. Ferry, A. H. Emery and Alma Eldridge, of Summit county; Charles W. Nibby of Cache county; and D. D. Cannon of Sanpete county, I have this day appointed these delegates to represent the territory of Utah at the annual convention of the American Bimetallic League, to be held at Washington, D. C., on February 22, 1893.

"In testimony whereof I have hereunto set my hand and caused the great seal of the territory to be affixed, at Salt Lake City, Utah, this 16th day of February, A. D. 1893.

ARTHUR L. THOMAS, Governor.

"By the Governor, 'ELIJAH SELLS, Secretary of Utah."

It is certain that some of the delegates named will be at the convention. Mr. W. F. James is in Washington, D. C. There is no appropriation for their expenses, and the delegates will have to pay their own way.

CENTENNIAL-EUREKA STRIKE.

The Report of a Rich Ore Discovery Is Confirmed.

Although the officers of the Centennial-Eureka decline to give any information concerning the strike recently made on that property, the report is confirmed. The strike, it is said, has had a good effect on the camp and its development will be followed by increased activity in the district. The officers of the company are not yet prepared to state what the extent or character of the new ore body is.

THE NEW ELECTRIC DRILL.

Another Public Test of a Salt Lake Invention.

Another exhibition of the operation of the Jones rotary electric mining drill took place yesterday morning at 25 East First South street, and also in the afternoon. As on previous occasions, the drill worked in magnificent form. Thrown into place, facing a large boulder of dolomite lime and quartz, the drill started with uniform and steady speed. The bit used was a 1 1/2 inch, taking out a core of one inch. A noticeable feature was the ease and facility with which all the details were handled by the operator. This is a matter that commands attention, and the work is done without the least jolt or hitch. Its simplicity is most apparent, even to those who have not had experience with other apparatus for mining work. These can be no doubt, but this drill will revolutionize the work in this line, exacting less labor, and the rapidity with which it drills, making it one of the most valuable additions to machinery that has been introduced to the mining fraternity.

Among those present were: Colonel Oshelton, of the Comstock mines; Geo. Holmes, M. D. Parker, of the Utah and Montana Machinery company; R. G. Legge, A. Hanauer, Jr., J. L. Powell, S. D. N. Bennett, S. D. Carson, A. M. Hinkle, of the Salt Lake Rapid Transit Railway company; Louis F. Kullak, C. Lowe, J. D. Kandal, of the Centennial-Eureka mine; A. L. Houston, Robert Jackson, M. B. Sinclair, Edward Sampson, A. J. Hedges, C. VanAntine, of the Utah mine; T. G. Holliday, E. J. Edwards, Mr. Wilson, of Harris & Wilson, Dr. Winters, of the Star mine; C. M. Slickles, W. W. Chisholm, of the Centennial-Eureka; Heber M. Wells, W. E. Preston, of the Bullion-Beck; L. L. Downing, P. R. Snow, of Brookbank and Oliver Hodgson, of the Star mine, Haly, Ida.; James A. McFadden, of the Yankee Fork mine, Custer City, Ida.; J. W. Minor, R. W. Sloan, of Logan; A. E. Hyde, of the Bullion-Beck; W. J. Holt, J. S. Cameron, President S. L. Ropes Grant, Bishop Musser and others of the Salt Lake mining company, and many whose names were unknown to the reporter.

A Copper Plant Meeting.

Members of the committee of twenty-five, together with members of the real estate exchange, held a meeting at the office of the Business Men's association, room No. 302, Progress building, yesterday morning, and to allow the real estate men more time to solicit property donations adjourned until 7:30 Saturday night.

COAL CLAIM CENT.

A Case Involving Valuable Coal Land Near Castle Gate.

In the land office yesterday the case of William W. Paire, protestant, vs. Spencer S. Markham was commenced. It involves the final proof on a coal claim covering the southwest quarter of section 6, township 13 south, range 10 east, situated north of Castle Gate.

Mineral Patents Granted.

Mineral patents as follows have been granted by the land office and will be issued by Registrar Hobbs, Certificate No. 894—To the Mount Baldy Gold and Silver Mining company; the Uncle Sam lode mining claim in the Mount Baldy district.

Certificate No. 892—To the heirs of Isaac S. Waterman; the Sacramento lode mining claim in the Ophir mining district.

Certificate No. 1,865—To Robert C. Chambers; Park lode mining claim, in Utah mining district.

Certificate No. 1,866—To Sarah Mc

Chrystal and Fred H. Auerbach; the Uncle Sam lode in Tintic district.

Mining Concentrates.

Silver, 83%; lead, \$3.95. Wells, Fargo & Co. yesterday received: Mingo bullion, \$1,607. T. R. Jones & Co. received: Ores, \$3,800; bullion, \$3,000.

The Conklin sampler have received one car of Nevada lode in the Adams ore. Taylor & Branton have received three cars of Eureka-Hill.

The sale of 20,000 shares of Greely stock at 10 cents a share is reported.

The old Kalamazoo mine, in American Fork canyon is to be opened this season. It is a producer of rich ore, which is mined with sand gravel, the washing that it is the channel of an old stream. The new company will file articles of incorporation in a few days.—Mining Journal.

STILL WORKING FOR DILLON.

Another Letter from Wyoming Received by the Governor.

Will L. Simpson, prosecuting attorney of Fremont county, Wyoming, Ben Sheldon, clerk of the court, and D. A. Preston, a prominent attorney of Lander, Wyo., are the interested parties of the petition asking that executive clemency be extended to Malachi W. Dillon, now serving a term for manslaughter. In a letter to Governor Thomas, Mr. Preston says that he knows Dillon's character and his familiarity with all the facts of the homicide, he is satisfied that he was insane at the time the crime was committed in the gravel, the Washnaker quarry, near the residence of Dillon's father, saying: "I write because I am a friend of Dillon, because I believe an injustice has been done him and that the wrong can only be righted by his pardon."

A LITTLE HERO.

The Brave Act of a Hoboken, New Jersey Boy.

New York, Feb. 16.—Hoboken produced a hero yesterday in the person of James Duff, 13 years old. He and Joseph Rodgers, aged 9 years, were picking coal along the west banks of the Washnaker branch of the Erie railroad at Fourteenth street, Hoboken, as a locomotive bore down on them. Quick as a flash young Duff jumped to one side, but the Rodgers boy was too frightened to move and stood as though petrified upon the track. At the risk of his own life young Duff sprang forward and dragged little Joe from the track in time to save his life, but not his limbs. The boy's right leg was caught under a heavy load of coal, and he crushed the splintered bones protruding from the flesh. Duff picked him up in his arms and started with him to the police station on Willow avenue, fully half a mile away. It was a heavy load for the little fellow, but he struggled manfully with his burden, and staggered into the station house with the mangled body of his companion. He asked the sergeant to send post haste for a doctor and then told what had happened. An ambulance quickly came and the injured boy was taken to a hospital. He never regained consciousness while the physicians were examining his leg, and the doctors say he is the luckiest little fellow who ever came under their observation.

Where the Gold Is.

At the close of 1891 the seven principal banks of Europe held \$635,000,000 of gold, while at the close of 1892 they held \$750,000,000. They gained \$115,000,000 of gold, while the United States had about \$600,000,000. In this same period the seven European banks added \$10,000,000 of silver to their holdings, while we gained \$48,000,000.

Europe, the United States and Australia had at the end of 1892 in silver \$87,839,000, in gold \$1,788,338,000. The world's gain in silver \$58,865,000. Of Europe's gain of gold we supplied some \$60,000,000, and the rest, according to Mr. Octavian Haupt, was mostly from the mines. India sent some gold and China some. "We evidently have to deal," says Mr. Haupt, "with a constant increase of the visible gold stocks in the leading countries, except in the United States, where a false monetary policy drives the more precious metal out of the country."—New York Stockholder.

Y. L. M. I. A. Notice.

Professor Willard Dene has kindly offered to conduct a three weeks' training class in the use of the Y. L. M. I. A. guide commencing on next Monday, Feb. 20, at the Latter-day Saints' college. Each association in the stake has the privilege of sending two members to attend this course free of charge.

This guide class will be held each day at 2 p. m., but it will be much better if the young ladies chosen can go at 9 in the morning and remain throughout the day. They will then receive the benefit of the opening exercises of the college and of other instructions that may be given. It is to be hoped that the officers will not neglect this great opportunity of benefiting their associations.

MARY A. FREEZE, Stake President.

The Branding of Sand as Sugar does not make it a sweeter taste. Why should the branding of cold rolled and sheared nails as hot forged and hammer pointed change their characteristics?

Look at your horse nails. If they show the marks of the shears on the edges near the point, avoid them—they are cold rolled and sheared.

The Putnam nail is the only hot forged and hammer pointed nail made by machinery in existence. It is drawn from the best Swedish iron rods, at a welding heat by the action of hammers alone, polished by the water process and hammer pointed, thus following the old hand process.

Thus a perfect oneness of the metal is secured and a tougher, better nail results.

There are no shear marks on its edges, for it is not sheared, but hammer pointed. At a quarter of a pound to shoe a horse, its use costs but 1 cent more on each horse shoe.

A Sound Liver Means a Well Man.

Are you bilious, constipated or troubled with jaundice, sick headache, bad taste in the mouth, foul breath, coated tongue, dyspepsia, indigestion, hot, dry skin, pain in back and between the shoulders, chills and fever, etc. If you have any of these symptoms your liver is out of order and your blood is slowly being poisoned because your liver does not act properly. Herbs will cure any disorder of the liver, stomach or bowels. It has no equal as a liver medicine. Price, 75 cents. Free trial bottle at Z. C. M. I. drug department.

To the Ladies Only.

We have an immense line of ladies' skirts from 90 cents to \$7 each. Will make tremendous reduction on any you select. PEOPLE'S EQUIVABLE CO-OP., 7 and 9 Main street.

A Million Friends.

A friend in need is a friend indeed, and not less than one million people have found just such a friend in Dr. King's cough and colds. If you have never used this great cough medicine, one trial will convince you that it has wonderful curative powers in all diseases of throat, chest and lungs. Each bottle is guaranteed to do all that is claimed or money will be refunded. Trial bottles free at A. C. Smith & Co.'s drug store. Large bottles 50c. and \$1.00.

What is a Guarantee?

It is this. If you have a cough or cold, a tickling in the throat, which keeps you constantly coughing, or if you are afflicted with sore throat or lung trouble, whooping cough, &c., and you use Ballard's Horehound Syrup as directed, giving it a fair trial, and no benefit is experienced, we authorize our advertisers to refund your money on return of bottle. It never fails to give satisfaction. It promptly relieves bronchitis. Sold by Z. C. M. I. Drug Dept.

FORWARD IS THE WATCHWORD.

To stand still is impossible, we must either go backward or forward. Sinking finally into oblivion or reaching a pinnacle of success. We cannot if we so desired, remain stationary. The moment we cease to advance we begin to retreat, such is the order of the day. The world moves and as "all the world's a stage" and all the people players, every individual must do his part, he must strive to advance or he will be ignominiously left in the rear of the great procession of the world's truth, knowledge and treasure seekers. He will be left so far behind that the poor distinction of being a mark of the world's progress will not even be granted him.

The requirements of the people are constantly changing, ideals of perfection always rising to a higher standard, the faculty of the intellect forever grows keener, and that which was beautiful yesterday has passed into criticism today, tomorrow it will be extremely ordinary and in a month not even ranked among the common place.

Stand still if you dare, and the surging sea of humanity brings in their ceaseless struggle for a place of Dillon's character and his familiarity with all the facts of the homicide, he is satisfied that he was insane at the time the crime was committed in the gravel, the Washnaker quarry, near the residence of Dillon's father, saying: "I write because I am a friend of Dillon, because I believe an injustice has been done him and that the wrong can only be righted by his pardon."

Success comes to almost every man who industriously seeks it and constancy of his abilities to the great and marked success of Dr. Hale's method for

"Painless Dentistry"

It was not by mere chance that this now famous method was discovered; on the contrary, it was by a search of the literature, extensive research that this great pain-saving method was finally given to the public.

When we think of the horrible tortures of the dentistry of old and compare our sufferings in the dental chair of a few years ago; to the easy, painless method of today, we cannot forget the debt of gratitude we owe to Dr. Hale of St. Paul and to the hundreds of crust, clever dentists who were quick to recognize the great value of this discovery and by securing the right to operate in their respective localities throughout the United States have proved that they were ever alert to the interests of their patients and worthy of the place they occupy as leaders in the dental world of which they are the center. These men are to be lauded and upheld, not only by the community in which they live but by the world at large, as they are quick to recognize true worth in others.

There is Another Class of Men

however who are not bright enough to carry a reputation for themselves of just and fish or stupid enough not to acknowledge the merit of others. Thus it is in the case of our dentists.

Hale's Famous Method

Of Painless Dentistry

as it has been in scores of others who have given to the world some of the greatest inventions of the day, that have helped so materially to advance science, civilize the people and relieve the sufferings of their fellow men.

Edison who has done so much towards the advancement of science, the mechanic men had to go through a siege of abuse, ridicule and opposition before the world finally bowed its head in acknowledgment of his real genius. A score of others might be mentioned who have traveled the same rocky road to success, and it was not to be supposed for a moment that Dr. Hale or any of the expert dentists who operate with this method would escape.

Dr. Griswold.

whose experience of 16 years in the profession of dentistry have been spent in the endeavor to eradicate the worst, latest and best possible methods, had secured the sole right to use this painless method in Salt Lake City.

Slenderous tongues have been hard at work in a futile attempt to disparage the treatment and vilify everything and everybody in connection with it.

This of course is only applicable to a few "would be" and not to the majority of Salt Lake dentists. The "profession" as a whole recognize the true value of the discovery and if they do not feel inclined to speak well of it, are gentlemen enough to say nothing.

There can be no stronger argument in favor of this new method now used with such marked success in Dr. Griswold's dental parlors, than the fact that IMITATORS are springing up on all sides.

"Painless Methods" (?) are becoming positively popular, but there is not one of these imitators that can substantiate their statement. For it is a fact beyond the veriest shadow of a doubt that

Dr. Griswold has the sole right to operate in Salt Lake City the only known method for positively painless filling known to the profession.

And the hundreds of patients who have visited his dental parlors in the past few months all say that

Dr. Griswold Fills Teeth

WITHOUT PAIN.

TESTIMONIALS.

See our leading merchant tailor says of Dr. Griswold's dentistry:

SALT LAKE CITY, Jan. 26, 1893.

DR. GRISWOLD—I want to say that I thank you not only on my own account, but on behalf of humanity at large for securing this new and wonderful method for painless dentistry. I have had many teeth filled, but never without suffering untold agony until I came to you. I was very doubtful about you being able to fill teeth without pain, and in fact laughed at the idea, but as I had to have the work done, thought I might as well try you as anyone else.

Four minutes in your chair convinced me that I was wrong in doubting your ability, and I was extremely gratified to be able to acknowledge my mistake. You will remember that you filled three teeth for me and I felt not the slightest pain or uneasiness during the entire operation. I could scarcely realize that you were using a drill on my sensitive teeth. I fear there are no dreads of the dentist's chair in future.

Wishing you every success with your new method for painless dentistry, I am, truly yours,

F. E. WELLS,

"Artist Tailor," 7 and 9 West First South street, Salt Lake City.

PATENTS

Conveys, Trade-marks, Design Patents, Copyright, and all Patent business conducted for MODERATE FEES.

Information and advice given to inventors without charge. Address: PRESS CLAIMS CO., JOHN WEDDERBURN, Managing Attorney, P. O. Box 468. WASHINGTON, D. C.

This Company is managed by a combination of the largest and most influential newspapers in the United States, for the express purpose of protecting their subscribers against unscrupulous and incompetent Patent Agents, and each paper printing this advertisement vouches for the responsibility and high standing of the Press Claims Company.

PUTNAM

NAILS and SUNOL. New York, Nov. 12, 1890, PUTNAM NAIL CO.

In reply to your favor I would state that I have used the Putnam Nail for several years, and have advised my friends to use it only. It is hardly necessary for me to add that I prefer it to all others.

The Putnam Nail enjoys the distinction of being the only Hot-Forged and Hammer-Pointed nail made by machinery, and which imitates the old hand process.

ROBERT BONNER INSISTS ON ITS USE. All others are COLD ROLLED and SHEARED, as an examination of their edges near the point will show, and are liable to SPLIT or SLIVER in driving, to injure and perhaps kill the horse.

The above picture, from a photo representing Mr. Bonner in the act of handling his smith a Putnam nail, while superintending the shoeing of Sunol, will be sent in the form of a half tone, size, 5x8, on thick, white paper, with wide margin, on receipt of 2 cent stamp for postage, etc.
