AT SANTANDER.

Four or Five Men Are Blown to Pieces.

THEY WERE AT WORK UNDER THE WATER.

The Awful Tragedy of November Last Recalled.

Has Never Been Definitely Known Just How Much Damage Was Done on That Occasion—Yesterday's Casualty Caused by an Attempt to Remove the Explosive from the Hull of the Wrecked Yessel—Gladstone Issues a Letter—Other Foreign Fishes.

Santander, March 21.—Another fatal accident occurred here today, caused by an explosion of dynamite. Ever since the awful disaster that occurred in this city on the night of November 3 last, when the Spanish steamer Cabo Machichao was blown up by the explosion of a part of the large consignment of dynamite on board of her...

It was discovered by divers who went down in search of the bodies of some of those who were killed at the time that a considerable quantity of dynamite was still in the wreck. This was considered a menace to shipping and the authorities determined to have it removed.

While a number of men were engaged in the work of taking the dynamite from the hull, an explosion occurred and several of the men were killed. The loss of life occasioned by the disaster of November 3 has never been accurately ascertained. It is known, however, the list of dead, missing and wounded numbered fully a thousand.

The Malinchico was lying alongside a wharf discharging part of her cargo, which consisted of general merchandise, including a quantity of dynamite in cases. While this work was going on, the steamer took fire and the blaze attracted large crowds to the waterfront.

Officers and men went to the assistance of the firemen, who had been hastily summoned. Suddenly there was a deafening roar and the steamer disappeared. The wharves among the spectators was frightful.

Houses along the water front were either completely destroyed by the shock of the explosion or badly damaged as to be unfit for occupation.

Large quantities of burning oil were thrown into the water and at one time it appeared as though the harbor would be destroyed. Fortunately, however, a change in the wind prevented this, but terribly damage had been done in the harbor and a number of others, including the Mercha steamer Alfonso XII, caught fire from the rain of flaming oil and the crew of the vessel were killed.

Mangled and blackened corpses were scattered all along the quay and the scene was one that defied description. Among the dead was Don Manuel de Lapena, the provincial governor and a number of other officials. Just as the ship was about to be raised, a railway train arrived from the station, and the explosion from the scene of the explosion. This train was completely wrecked, set on fire and most of its passengers burned to death.

WINDSTONE REPLIES TO HIS WISHES. Gladstone Replies to the Addresses of His Constituents.

London, March 21.—Mr. Gladstone recently received an address from his constituents in Midlothian, in which he was requested to continue to represent that parliamentary borough in the house of commons. Replying, Mr. Gladstone has written a letter declaring his chief desire will be to follow the wishes of the constituents he represents.

He adds: "There will naturally be a change in my attendance at parliament, and I can not yet judge how far my sight and hearing will be adequate for performing parliamentary duties."

"As to the merits or demerits of my career, and certainly I have been conscious of my own shortcomings, I hope I have at least been governed by upright intentions and a desire to labor."

Proceeding to give his public life of sixty years, dating from Lord Gorbals' reform act, which he describes as the political birth of Scotland and the beginning of a duty which had solemnly recognized Mr. Gladstone's career has been a history of political, economical, social, moral and intellectual emancipation.

He adds that all the numerous causes that had been brought forward in this time Scotland has battled for the right.

Continuing he says: "I am deeply convinced that until the just demands of Ireland are satisfied as the house of commons tried to satisfy them, neither the legislative ways of any portion of the United Kingdom will be adequately met nor will the empire attain its maximum union or power, nor its honor or effectively cleared of the deepest hereditary stain."

The operation will be performed upon Mr. Gladstone's eyes in about three months.

THE PATRIOT'S BODY. Resting in the Bed Where Kossuth Died.

Turin, March 21.—A guard of honor from an early hour this morning has been drawn up in front of the house where the remains of Kossuth are resting. During the day the syndic of Turin visited the house and consoled with the members of the Kossuth family. Later the syndic, on behalf of the municipal authorities of Turin, sent a message of sympathy to the municipal authorities of Budapest.

The body of the Hungarian patriot lies in the bed where he breathed his last. The body is laid in a casket and is surrounded by floral wreaths and has been sketched by several Hungarian artists, who are desirous of producing pictures of the room where Kossuth lies. Messages and letters continue to arrive from all parts of the world.

Iowa's Whisky Troubles. Des Moines, Iowa, March 21.—The house, today, by a vote of 33 to 45, passed the local option bill. This, if passed in the senate, will nullify all existing legislation on the liquor question and put Iowa in the list of high license states.

THE BOURSE CLOSED.

Budapest, March 21.—The independent party has resolved to move at the special meeting of the diet which has been called for Friday next that the greatest honors be paid to the remains of Louis Kossuth.

WILL GO TO AFRICA.

Negroes Resolve That There is Their Proper Home.

Birmingham, Ala., March 21.—Three thousand representative negroes from every part of Alabama were in attendance here today upon the state convention of President Lincoln against the return to that continent as soon as possible, and establish there a great nation such as the whites had established in America.

It was agreed, however, as the white man had brought the negro to America, he ought to pay his fare back to their native land.

Resolutions to that effect were passed.

BOYD-BUYERS HOWL.

Will Protest Against the Signing of Seigniorage Bill.

New York, March 21.—Representative financiers of the city, all of whom had subscribed for various amounts of the recent issue of \$50,000,000 of 5 per cent. bonds met today and adopted a protest against the signing of the seigniorage bill. They claim the right to be considered in the matter because their bond subscriptions were all in the series. It was held that there should be no increase in the colnage of silver.

TROUBLES IN COREA.

STRENUOUS OBJECTION TO CIVILIZED METHODS.

Introduction of American Ideas Was the Cause of the Recent Attempt to Blow Up the King, and the Formation of a Revolutionary Party.

San Francisco, March 20.—It seems that the troubles in Corea, details of which arrived here yesterday, are due to the effort on the part of the king to bring his country up to the standard of modern civilizations.

The conservative element of the country bitterly resent any innovations and the attempt to blow up the king and ministers is said to be due to this feeling. Recently the ruler of Corea has shown a tendency to adopt western ideas and customs, and recently appointed Clarence Greenhouse, an American, to a position corresponding to that of postmaster-general in this country.

Greenhouse, who was formerly secretary of the consular general at Seoul, was elected to the highest rank ever accorded to a foreigner in Corea, and was given almost unlimited power and authority to enable him to establish a postal system on the American plan.

Greenhouse commenced his work with enthusiasm, but the ultra-conservative element do not look with favor upon his attempts to change the customs of their country, and it is thought they deemed the assassination attempt a revolution in the proper method of putting a stop to it.

AGREEMENT NOT PROBABLE.

Union Pacific Wage Affairs Are Not Satisfactory.

Omaha, March 21.—No conference was held between the Union Pacific employees and President Clark on the wage schedule this morning as a result of a suggestion by the latter that the various branches of labor prepare a schedule of what they wanted, believing that this was the quickest way to reach a decision.

Accordingly the employees presented a schedule to Superintendent Korty, continued their session with him during the forenoon, without reaching a conclusion.

This afternoon the engineers submitted their compromise schedule and after an hour's general talk with Mr. Clark, withdrew to await the conclusion of the trainmen's conference. The trainmen expect to be through by noon tomorrow. The prospect of an agreement appears more remote than ever tonight.

THE ATCHISON OBJECTS.

Struggle Yesterday Over Raising the Rates.

Chicago, March 21.—The Western Passenger association struggled all day with the proposition to raise the \$10 rate between Chicago and the Missouri river. Nothing was done, and the meeting will be resumed tomorrow, when it is hoped the Union Pacific will represent. Heavy pressure was brought to bear upon the Atchison to induce it to consent to an elevation of rates, but it steadily refused. It declines to reduce the rate on the Iron Mountain main line south of Little Rock has been repaired and trains are passing on time.

THE MISSOURI RIVER.

Storm Leaves Death and Destruction in Its Track.

DRIFTS FROM TWO TO FOUR FEET DEEP.

Telegraphic and Railway Service Badly Impeded.

Property Loss Will Be Very Heavy—Thousands of Cattle Are Off Their Winter Range, and Many of Them Will Doubtless Perish—Sheep Owners Who Had Taken Advantage of the Late Fine Weather Are in Despair—Fear That Lives Will Be Lost.

Omaha, March 21.—The blizzard which defied the northwest part of the state last night is moving slowly, but steadily, toward the Missouri river. Its progress is marked by the drifts from six inches to two feet deep and a general blockade of business.

Dispatches received tonight from points in the interior of the state indicate that the storm has traveled eastward about 150 miles in 24 hours. At North Platte, Neb., the drifts are from two to four feet deep and the Union Pacific line is completely blocked.

All trains are abandoned and a number are blocked between stations. Snow plows are out and efforts are being made to clear the tracks.

Kearney, Hyannis, Elsie, McCook and other points report snow deep and drifting badly. It is not very cold, but the mercury is below the freezing point, ranging from ten to twenty degrees above.

The Burlington lines in the west and northern part of the state and in the Black Hills are badly blocked. A message from Buffalo, Wyoming, says: "The storm here has assumed the proportions of one of the worst blizzards in the history of this section. It is feared that the ranges will be covered with cattle succumbing to the exposure of the blizzard, and the sheep owners are almost in despair. The recent warm weather makes the situation all the worse."

Telegraph wires are in a very bad shape and have been useless for hours. There are rumors of deaths from exposure, but these can be neither verified nor contradicted, as it is next to impossible to take any action to find out the truth.

One cowman, belonging to a ranch eleven miles north of Douglas, rode into town last night and reported having been separated from a companion in the height of the blizzard, and the horse of the other man was exhausted. Reports from the neighboring ranches, however, are not so gloomy. It is said that the property loss will be great. Thousands of cattle are known to be off their usual winter quarters and far from their homes. It will be impossible to save them from almost total destruction unless the blizzard breaks by noon.

Similar reports are received from all points in the state. The farmers over the stock ranges, the farmers in the central part of Nebraska welcome the snow, as the ground has been hard in many places to work. There will be but little snow to winter wheat, as the snow is deep enough to prevent the ground from freezing.

At midnight the mercury at this place is falling rapidly, indicating that the storm is not far off.

NOT A WHEEL MOVED.

Hot Springs Cut Off From the Rest of the World.

Hot Springs, Ark., March 21.—Not a wheel has yet been moved on the Hot Springs railway. The flood is abating somewhat, and it is expected trains will be able to resume operations tomorrow.

Today made three days that have passed and this city has had no communication with the outside world, and the hundreds of visitors here are being starved out.

This has been a most terrific and prolonged storm. There is no way to get an estimate of damage done along the Chicago river. The farmers who came into the city today said the destruction of farm property along the river will be very great. Plantations never covered by water before have been swept clean of everything, even houses on a number of places being swept away, but it is thought the inmates escaped.

Dark clouds still obscure the sky, and it looks this evening as though another rain might begin pouring down any minute. If another water spout should follow within a couple of weeks, at the present high state of the river, there is no telling what the result might be.

Traffic has been suspended on the Gordon branch of the Iron Mountain, between Camden and Eldorado, some points being three feet under water. Four hundred feet of the Cotton Belt track was washed out this morning near Salina.

Salina river is reported rising a foot and a half, and is expected to overflow its banks. The Iron Mountain main line south of Little Rock has been repaired and trains are passing on time.

ALL TRAINS DELAYED.

Losses of Cattle Will Be Heavy in Wyoming.

Cheyenne, Wyo., March 21.—The worst storm of the season has been raging all over this state for the past thirty-six hours, and it is still blowing, though with decreased severity. Cattlemen say the loss of range cattle will be very great. Trains are being held up. No train has arrived from the east in this city today and all trains, including the fast mail, have been abandoned until tomorrow. It is feared some people who have been in the country, especially school children, may have perished in the storm.

FOUR FEET ON THE LEVEL.

How the Feet of Falls in South Dakota.

Deadwood, S. D., March 21.—The worst snow storm of the season commenced here Monday night and has kept up ever since. The snow is about four feet deep on a level, and is still coming down.

Telegraphic communication from Sun Dance and Fourchee states that snow is falling at both places and extends to all cattle ranches.

It is believed the loss to the cattlemen will be heavy.

Neither the Elkhorn nor the Burlington & Missouri River arrived today, the former being snowed up at Hall Springs and the latter east of Hall Springs.

All trains on the B. & M. are abandoned east of Edgar.

The present indications are that the snow will rival in depth the memorable storm of March 7, 8 and 9, of 1873, when it fell to a depth of six feet.

MINNESOTA BLIZZARD.

Duluth, Minn., March 21.—A March blizzard started here today and has been increasing steadily ever since. Electric wires which are ice coated by the early rain have given way before the wind. The city is practically without telephone, fire alarm system and the electric lights are out.

Damage to the amount of several thousand dollars has already been done.

BLOWING AND SNOWING.

Brush, Colo., March 21.—The most severe snow storm this winter has been raging here for thirty-six hours. The wind from the northwest has been blowing and the snow has drifted badly. Stockmen fear if the storm continues much longer it will cause them heavy losses.

WRECKED BY WIND.

Fort Morgan, Colo., March 21.—The front of the brick building of Judge G. W. Warner's residence, just east of town, was wrecked by the wind today. Leaving her three small children standing, Mrs. Warner walked a mile through the blinding snow to get relief.

GASOLINE EXPLOSION.

Belvidere, Ohio, March 21.—As a result of a gasoline explosion, Mrs. J. Westfall, Mrs. Barney Manley, Miss Grace Barker and a six months old son of Mrs. Manley were frightfully burned.

HAS STRUCK LEAVENWORTH.

Leavenworth, Kan., March 21.—The blizzard that has been raging west and north struck here this evening and since 6 o'clock the temperature has fallen 30 degrees. The wind is blowing thirty miles an hour from the northwest with prospects for snow. This afternoon the temperature was 39.

CAME WITH A HIGH WIND.

Akron, Colo., March 21.—It has snowed here continuously for over thirty hours and the storm does not seem to be abating. There is a high wind and the storm is hard on stock, but the snow will be of incalculable benefit to farmers in eastern Colorado.

WORSE THAN HOPPERS.

INDUSTRIAL ARMY IS SPREADING DESOLATION.

Towns on the Line of March Are Looted—The Tramps Create Terror at El Paso—Fry Arrested for Vagrancy, but Later is Discharged—Trouble Ahead.

El Paso, Texas, March 21.—General Lewis C. Fry was arrested this morning by order of Mayor Solomon and thrown in jail, on the charge of vagrancy.

HE WOULD NOT EXPLAIN.

Louise Wilson had been there, but a girl named Burgoyne had a child there at that time, Miss Pollard said. "Oh, that was the name I went by. There were so many of them I did not remember."

WENT INTO HYSTERICS.

Then Miss Pollard had asked what had become of the child; had been told it died in the hospital and then she went into hysterics. Miss Pollard had remembered the death of a girl while she was there, but had forgotten the death of a child.

The sister had said that Miss Pollard had never been there and did not seem to know much about the house. Miss Pollard had been looking for the books of Irving in the room, but the sister had said she thought the books were given by a girl who had been there.

Miss Pollard had been looking for the books of Irving in the room, but the sister had said she thought the books were given by a girl who had been there.

WAS A FRIEND IN NEED.

One Woman, at Least, Who Has Sympathy for Her Sex.

Lexington, Ky., March 2.—Major Horace Means, who is one of the leaders of Colonel Breckinridge's political opponents here, declares that a wealthy widow, residing in Washington City, went to Mr. Wilson at the time Miss Pollard begged him to take her suit, and told him to go ahead with the case, and that she would back Miss Pollard to the amount of \$10,000.

"I will not call the lady's name," said Major Means, "but Miss Pollard had been introduced to her at a summer resort in the city of Washington to the young woman. When the scandal came up, she wrote Miss Pollard, telling her to call and assured her that her social assistance would be given her."

Major Means could not be persuaded to disclose the name of the woman he referred to, but he said that this was the cause of Miss Pollard's funds. Many here wondered where the money was coming from with which the suit was being pushed.

BIGGEST EVER BUILT.

Some Astonishing Tests at Indian Head Yesterday.

Washington, March 21.—A distinguished party of public men and departmental officials and a number of ordnance experts accepted the invitation of the War Department to visit the ordnance proving grounds at Indian Head to see the official test of the first of the big 15-inch guns which had been completed at the government works.

This is the biggest gun ever built in this country, and a vast amount of interest was manifested in the test yesterday. Preparatory to the test of the big gun, arrangements were made for a test of some projectiles from a 10-inch gun. The first of these projectiles was a Johnson's steel armor-piercing bullet, and it was fired at a distance of 1,000 yards from the mouth of the gun.

The projectile penetrated the 12-inch armor about six inches and was then scattered and shattered.

A penetrating shell of wrought steel from the same gun met hardly a better fate. The test of the 12-inch gun then began. The enormous mass of metal of the gun, six tons in weight, is easily under control for elevating or depressing by a hydraulic apparatus. The 1,100 pounds of cast steel shot was hoisted up to the breech by a hydraulic ramming apparatus which extends itself in a most astonishing manner. The elaborate arrangements for the gun are in convenient compass to rest at the breech of the gun. The 400-pound charge of powder was then put in behind a water-tight steel door, and the breech of the gun, and sent the metal roaring, ripping, tearing and raging into the inmost recesses of the opposite hillside. The initial velocity of the first shot was 1,720 feet per second.

The wonderful extension ramrod was brought into use to sponge the gun, and a second charge was then inserted. At this time 42 pounds of powder, the testing instrument indicated an initial velocity of 1,775 feet per second. Interested observers of the test were the naval attaches of the embassies of Great Britain, France, Germany and Italy, and the Russian and Japanese legations. After two shots from a new rifle with armor-piercing powder the projectile from which was dropped far up in the channel of the Potomac, the tests were over for the day.

The exact cost of this piece of ordnance, but it is estimated to cost nearly \$200,000. It will require a day or two more firing with armor-piercing powder to test the power of the gun from the results of today's tests.

BIG PATENT SUIT.

It Involves the Telephone Multi-Switchboard.

Toledo, Ohio, March 21.—The largest patent suit ever filed in Toledo will be inaugurated in the United States court soon by ex-Congressman Hard.

The action is to be brought by the American Electric Company, Lumber one of the leading manufacturers of the Central order of the Roman Catholic church has withdrawn from the church notifying the superior gentlemen that his action was dictated by the voice of conscience.

Charges Failed to Stick.

New Orleans, March 21.—Asa Guy Cramer, who was on trial before the criminal court charged by the American Express company with having stolen \$22,500 from a package of \$50,000, today's tests.

Charges Failed to Stick.

New Orleans, March 21.—Asa Guy Cramer, who was on trial before the criminal court charged by the American Express company with having stolen \$22,500 from a package of \$50,000, today's tests.
