

BUSINESS AND MINING.

Latest News From the Camp Floyd Gold Camp.

PAY DAY AT THE HALL.

SEVENTY THOUSAND TO BE DISBURSED AMONG EMPLOYEES.

Encouraging Reports From the Bullion-Beck-Operations Resumed on the Ontario Drain Tunnel-Itab's Record in the Registration of Chinese-Silver Down Again-General Notes.

The Mercury Mercury of yesterday gives the following news of the gold camp:

The week has been a good one, notwithstanding the stormy weather. The organization of a new company to operate in the district, the strike in the Mattie No. 4, and other favorable discoveries point to increased prosperity for the camp and district.

GOT THE MERCURY VEIN.

Last week we recorded the fact that work had been commenced on the Mattie No. 4, owned by Scher, Keifer & Co. It is owned by Scher, Keifer & Co. It is owned by Scher, Keifer & Co. It is owned by Scher, Keifer & Co.

A private letter received from Salt Lake Tuesday contained the information that Sullivan and McDonald, of that city, had bought the interest of Robert Skinner in the Mattie No. 4, and the Ontario No. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100.

NOTES.

L. R. Walker, Jr., and other Salt Lake men, are on their way to the Sunnyside.

Lakers were out yesterday to inspect the Sunnyside mine.

Frank Oger was out from town Sunday, inspecting the Sunnyside.

Scott-Elliott is still working in North Canyon with a force of several men.

The Mercury agency caught fire Wednesday morning and burned to the ground.

Charles H. Mitchell has been granted a patent to the Cyclone lode, Rush Valley district.

A drift is being run each way from the incline of the Sunnyside mine, and both are in excellent order.

Work will be resumed this week on the Bonanza group, on the stage road between the canyon and the Mercury mine.

Jack Green is still sinking on his Hard Times claim, and the vein improves with each shift's work.

The Hard Times looks as though it was going to be a payer.

The Marlin will commence to treat its own sulphides some time during the present month.

About the usual force is employed in the mine, and the mill is running to full capacity.

Captain Ryan has commenced work on the Elmwood group, the bonding of which was recorded last week.

George Ober is working steadily on his claims in North Canyon and is meeting with encouraging results.

Frank Morehouse and M. Merrill returned Monday from a trip to Clifton district.

Deep Creek brigging with a fine specimen of free gold, ore said to run \$5,000 per ton.

It is from the Troy, a discovery made last January by S. K. Kinney, well known to many of our readers.

From four to eight inches of the gold ore and from eight inches to two feet of silver ore of high grade.

The ledge on which the discovery was made is said to crop for miles.

Mr. Morehouse says there is little use for prospectors to go to that district, as everything near the discovery is located.

SOME ENCOURAGING REPORTS.

Bullion-Beck Strike Steadily Increases in Richness.

Reports received from the Bullion-Beck are of a very encouraging nature.

The recent strike of silver lead ore on the 200 foot level steadily increases in richness and as a result the shipments of the company are being increased.

The ore body is also becoming larger and the indications are that the drift will yield richly.

A great deposit of extremely rich rock.

RESUMED OPERATIONS.

Ontario Drain Tunnel to Be Pushed to Completion.

Operations at the face of the Ontario drain tunnel were resumed yesterday and the work will be pushed as fast as possible.

It is the desire of the officials of the company to cut through the mine as soon as possible.

Two reasons, one being that the great amount of water may be drained out without the aid of the pump and thereby save expenses and the other is that the Ontario and Daly may be closed down unless the price of silver increases in the meanwhile.

which is the main reason, which is the main reason, which is the main reason.

It is said that with silver at its present price both of the great producers are losing money but they are unable to close down on account of the vast amount of water which daily flows into the mines.

With the tunnel completed this water can be almost entirely drained off with comparatively little expense and the owners of the property would then declare in favor of closing down until the prospects for the white metal improve.

STARTED THE MACHINERY.

Special Run of the Sugar Factory Being Made.

The machinery at the Lehi factory of the Utah Sugar company was placed in operation yesterday morning and the special run was commenced.

The company has on hand 1,100 tons of syrup which were left over from the regular season's run and this syrup will be made up into sugar of the usual superior character turned out by the Lehi factory.

There has been some delay in the commencement of operations on account of the unavoidable absence of the internal revenue collector who has charge of the weighing of the sugar produced in order to determine the amount of bounty allowed by the government.

The run will last in the neighborhood of twenty days.

UTAH'S GREAT RECORD.

But One Unregistered Chinaman Within Her Border.

In accordance with the law governing the registration of the Chinese of this territory, Messrs. Cabell and Chase, have ceased this work and all unregistered heathens must of necessity be deported.

There is but one case of this nature within the knowledge of the officials, however, that being a Chinaman of Eureka who has been repeatedly ordered to present himself for registration.

but at the expiration of the time allowed by law he had not complied

and upon receipt of instructions from the treasury department the work of deporting will be instituted.

According to the books of the registrars there have been 800 Chinamen registered in this territory.

The work has been performed most thoroughly and every one of the criminals were spotted early.

PAY DAY AT THE HALL.

Twenty Thousand Dollars to Be Disbursed.

This will be regular pay day at the city hall and the city auditor will distribute in warrants \$20,000.

All of the regular departments and the officials will be paid off for the month of April, while the others will secure their pay for the two weeks ending May 1st.

The rolls to be cancelled are as follows:

Table with 2 columns: Department Name and Amount. Includes Police department, Fire department, Health department, etc.

JOINT BUILDING COMMITTEE.

Estimate of the Cost of Completion and Furnishing.

The joint city and county building committee was in regular session yesterday afternoon for the transaction of business.

Causten Browne, Jr., was selected as clerk in the superintendent's office at the building, to fill the vacancy caused by the resignation of H. M. McCartney.

which was presented at a previous meeting and accepted. The vote was unanimous.

It was decided to substitute felt deadening for the mortar set out in the specifications on the third and fourth floors.

The twenty-fourth estimate of the architect, calling for \$7,748.58, was audited and allowed.

Although there was no discussion on the subject, an estimate of the cost of completing the building, including the building, was submitted.

It called for \$57,000 as the city's half of the necessary expenditures. The indications were that the members of the committee are unanimous in favor of completing the structure at once.

RICH STRIKE REPORTED.

One Chimney Encountered in the Reed and Goodspeed Tunnel.

Another rich strike has been made in one of the workings of the Reed & Goodspeed tunnel in Big Cottonwood canyon, which is being driven for the purpose of opening up the old Reed & Goodspeed mine.

Major Goodspeed stated yesterday that he is of the opinion that at last they have struck the ore chimney of the mine and the indications are that a great ore body is about to be uncovered.

At present the vein is but eight inches wide, but it is gradually widening out and evidently leads to the main body of the ore. The rock has just been assayed and gives a return of 25 per cent of silver, 60 per cent lead, 6 per cent copper and 32 in gold.

OPERATIONS AT OPHIR HILL.

Concentrator Now Making a Clean Up Run.

Shipments of concentrates are now being received almost daily from the Ophir Hill concentrator.

which is making a clean up run. One of the mines in the district are now being worked very industriously and the output of ore is not sufficient to keep the mill at work all of the time.

Occasional runs are therefore made for the purpose of reducing the accumulation of ore. This time the output of the mill will be about 700 tons.

Down Went Silver.

The silver market took a sudden slump of 1/2 cent yesterday and the New York quotations, based upon the telegraphic returns, were lower.

As a result of the drop, the price of silver is now 64 1/2 cents, which is a gain of 1/2 cent over the price of last week.

The drop was evidently occasioned by the overstocking of the market which has been estimated during the past few days by the upward tendency. There is still no change in the price of lead, which is quoted at \$32.00.

Will Be Paid on Monday.

The \$12,000 appropriation list approved by the mayor on Thursday will be paid at the office of the city auditor on Monday.

On account of the rush attendant upon the general pay day, which occurs today, it was found impossible to make out the warrants for the amounts represented upon the list and the entire matter was allowed to go over until the beginning of the business week.

Election of Officers.

At a meeting of the stockholders of the Coalter & Snegrove company, held last evening, the following officers were elected: President, Charles R. Snegrove; Secretary, Elwood G. Crap; Directors, Charles R. Snegrove, Mrs. Emily Snegrove, Elwood G. Crap, George J. Snegrove and E. Snegrove; Charles R. Snegrove, general manager.

Takes Another Large Stock.

The stock contained in the Butte branch of Goldsmith & Company has just been sold at auction under attachment, the purchaser being the Seigel Clothing company of this city.

The purchase price was \$22,750, which will be paid in installments of \$5,000 each, the remainder of the claims aggregating \$43,855.72.

Business Briefs.

The city and county building grounds are being cleared with much haste.

Christopher Colburn had the usual number of callers at the chamber of commerce yesterday.

It is learned that the amount paid by Colonel Montgomery for the hand-made residence in Salt Lake was about \$5,000. The deal was made through A. J. White and the transfer will go on record today.

Mining Notes.

Silver, 63 1/2. Lead, \$3.25. Wells, Fargo & Co. received yesterday: Pennsylvania bullion, \$3,767.

T. R. Jones & Co. received: Bullion, \$4,000; silver and lead ores, \$2,200. McCormick & Co. received: Hanauer bullion, \$3,100; silver and lead ores, \$3,850.

The Clearings.

Yesterday's clearings were \$182,445.

Real Estate Transfers.

Harriet A. Partridge to J. M. Broughton, lot 3, block 4, plat 1, B. Garden City, \$25.

William Healy et ux to John M. Wood, part of lot 1, block 1, plat 1, south range 1 west, Salt Lake Meridian, \$100.

John M. Wood to Mary Nicoll, part section 34, township 2 south, range 1 east, \$100.

Avery, lot 2, block 55, plat 1, 1,900. Charles E. Alken to Gustavus S. Holmes, part of lot 1, block 51, plat 1, Lehighville to Emil Glatte, lots 1 and 2, block 4, South Lawn subdivision, \$3,000.

Christopher Blum to Salt Lake Pressed Brick Co., part section 21, township 2 north, range 1 east, Salt Lake Meridian, \$25.

William E. Hope et ux to Don Carlos Snegrove, part of lot 1, block 51, plat 1, south range 1 west, Salt Lake Meridian, \$200.

Meridian Child, part section 21, township 2 north, range 1 west, Salt Lake Meridian, \$100,000.

JOINT BUILDING WORK.

Important Meeting of the Committee Last Night.

THE SITUATION REVIEWED.

AND THE OUTLOOK IS ENCOURAGING AND SATISFACTORY.

The Figures Show That the Sewer Can Be Completed, the Joint Building Finished, and the Municipality Have Some Money Left—The Proceedings.

The meeting last night of the joint committee to consider the advisability of curtailing work on the city and county building, as contemplated in Councilman Young's resolution, was one of deep concern, and if the figures and philosophy upon which the members agreed are sound, the gravity sewer is a consummation not remote.

work will continue on the courthouse undisturbed and the city will come out after all bills have been settled with a dollar in its pocket. The mayor had carefully reviewed the situation, and as he presented it to those present called upon President McCormick to check up on his calculations, that the night ascertain just where the city, financially, was at. His elucidation was clear, his points well defined and the arguments forcible.

The deliberations began with Mayor Baskin in the chair and all members present excepting Councilman Young, of the special committee appointed at the last regular meeting of the council.

Mr. Daly might be done by setting aside temporarily such items as that providing for an elevator, clock, etc.

Secretary Dennis, of the joint committee, then called the following report of work to be done, conducted for and otherwise—and the balance cost of same:

WORK CONTRACTED FOR.

Table with 2 columns: Item and Amount. Includes Carpentry, Painting, Brick work, etc.

WORK NOT CONTRACTED.

Table with 2 columns: Item and Amount. Includes Stone cutting, Stone masonry, Glass for doors, etc.

SUMMARY.

Table with 2 columns: Item and Amount. Includes To complete building, To complete power house, To complete grounds, etc.

COMPOSITE JELLY.

Make a jelly with gelatin, by the directions that come with the package, using a somewhat larger amount, so that the jelly will be quite stiff.

When cool enough to begin to thicken, so that the fruit will stay where it is put, place a layer of thinly sliced pineapple that has been lying well sprinkled with sugar for two hours, in a glass dish, cover it with cream, and as soon as it sets add more fruit, and more jelly until the dish is full. Set it upon ice and serve with whipped cream.

HOW TO BE BEAUTIFUL.

You first apply the lotion, and then apply the cream.

You then rub about an hour, and then turn on the steam.

Your steaming apparatus is essential, as it costs but \$50, and is as cheap as cheap can be.

The different medications in these several sleeves you place.

You bind your back back tightly, and then you change from water to steam.

You then rub the face with "cream of flowers."

You next in water boiling hot put medicated water.

And then prepare to bathe the face with most untrifling soap.

You change from water boiling hot to water freezing cold.

And then for active friction to produce a healthy glow.

The marked directions by that time is very near complete.

At any rate, by nature's laws, you must take time to eat.

—San Francisco Examiner.

ALASKA RANKS FIRST IN SEALS.

Rudy's Pile Suppository is guaranteed to cure Piles and Constipation, or money refunded, 50 cents per box.

Send stamp for circular and free sample to Martin Rudy, Lancaster, Pa.

AN ALLEGED MURDERER.

Taken in Custody By Captain Donovan.

HE IS WANTED IN CHICAGO FOR KILLING A MAN LAST THANKSGIVING DAY.

The Charge Against Charles Shoemaker Dismissed—Other Cases Disposed of Before Judge Smith.

Captain Donovan yesterday afternoon arrested an alleged murderer from Chicago and has him under lock and key awaiting instructions from the Chicago police.

The arrest was made on west Second South, the man under surveillance being a negro who recently arrived in this city from Ogden, where he had been some eight weeks, working part of the time at the Reed Hotel.

The captain received a straight tip from a local colored man and went on a still hunt for his man. He was encountered just west of the postoffice about 3 o'clock yesterday and when he saw that officers were after him attempted to escape.

The captain was stopped by the revolver, however, and the negro, who is charged with having murdered Charles Wilson, at 406 State street, Chicago, on Thanksgiving day last, after the killing he escaped and came west. Of course he denies all knowledge of the crime, but admits having shot a man in the groin while in Chicago.

PINEAPPLES.

A Dozen Ways to Serve Them—Excellent Receipts.

Pineapples, once regarded as a luxury, are grown extensively in the south of Florida, and the adjacent islands.

Large pineapple plantations are found in Elliott's Key, at Key Largo and Metacomb.

In 1822 the acreage in pines in the three named keys was 320, and the number of pineapples shipped from the keys during the season was quite close to 2,000,000.

Plantations are slowly extending northward on the peninsula.

Harbor of the coast, the Indian of the river, Lake Worth and the Jupiter region on the east.

It is not generally known that pineapple plants may be grown and that it is claimed to be a fine window garden, or conservatory.

The crown of leaves at the top of the fruit, and two-thirds of a cup of powdered sugar, dissolved in one-half cup of water, is put in a pan and mixed with the pineapple slices, and poured into a mold. When wanted, turn it carefully on the dish and let it be served.

Pineapples ought to be prepared for the table in many more ways than the usual slicing in sugar. If to be eaten uncooked, they should be peeled and sliced with a sharp knife in a thin cutter two or three hours before they are to be served, and placed on ice.

A variation in raw serving is to peel and slice seven or eight oranges, grate a coconut, and peel and slice a pineapple in thinnest possible slices. Put the sliced fruit, and grated coconut in alternate layers in a glass dish, with a layer of cream between each layer, and refrigerate until ready.

PINEAPPLE CREAM.

Beat one-half pint of sweet cream until it is stiff. Peel and chop a pineapple, add the juice of a lemon, and two-thirds of a cup of powdered sugar.

dissolve an ounce of gelatin in a little hot water and mix all lightly together, and pour into a mold. When wanted, turn it carefully on the dish and let it be served.

PINEAPPLE DESSERT JELLY.

Make a jelly with gelatin, by the directions that come with the package, using a somewhat larger amount, so that the jelly will be quite stiff.

When cool enough to begin to thicken, so that the fruit will stay where it is put, place a layer of thinly sliced pineapple that has been lying well sprinkled with sugar for two hours, in a glass dish, cover it with cream, and as soon as it sets add more fruit, and more jelly until the dish is full. Set it upon ice and serve with whipped cream.
