Mines Belonging to the Anacosta Company, and on Which \$250,000 Worth of Development Work Has Been Done, Closed on Account of a Flood of Water—A Silent Marriage at Butte.

(Special to The Herald.)

POCATELLO, Ida., June 8.—J. M. Johnston, Sr., who has been employed in the coal mines for the past year, committed suicide at Diamondville, Wyo., about noon today by jumping from a bridge spanning Ham's Fork river. His body was recovered two hours later. He left a note addressed to his son, residing in Diamondville, bidding him good-bye; also a letter to his wife in Iowa. He has another son and a daughter residing in Park City, Utah.

It appears Johnston had been saving his earnings for several months, expecting to bring his family together, and on receiving a statement from the mining company today, showing he was indebted to them, he became discouraged and determined to end his life.

Too Much Water.

BUTTE, Mont., June 8.—The Anacosta Mining company has closed down all its mines at Camp Creek on account of a tremendous amount of water encountered in the last few days, and which it was found impossible to handle. The company has spent over a quarter of a million of dollars in development work there the last year or two.

Sensational Divorce Case.

CHEYENNE, Wyo., June 8.—A petition for divorce was filed in the district court here, which promises to result in sensational disclosures. The petition is made by W. R. Stoll, a prominent lawyer, who asks for divorce from his wife on the grounds "that her acts since marriage have rendered his life unbearable." The couple have been married two years and to all outward appearances have had no dissensions.

Bannock County Democrats.

Meeting of Democratic county convention held at McCammon, Bannock county, Ida., June 8, 1936. Meeting called to order by the chairman of the county central committee, J. F. Kane. Chester Call was elected temporary chairman and M. A. Hendricks temporary secretary. After the temporary organization was made permanent the following resolution was passed:

"We, the Democrats in Bannock county in convention assembled, under the guidance of an all-wise providence, deem it to the best interests of the people of the United States to pledge the Democracy of Bannock county to the free and unlimited coinage of silver at the ratio of 16 to 1, without regard to the action of any other nation on earth; and we hereby instruct our delegates to the national convention to be held at Pocatello on June 16, 1936, to elect only such delegates to the national convention at Chicago who will pledge the support and cooperation of the party during such convention the free, unlimited and immediate remonetization of silver by the United States at the ratio of 16 to 1. We deem this to be the paramount issue."

The following delegates were chosen to attend the state convention to be held at Pocatello on June 16, 1936: William Chester, George W. Oxford, W. J. Cusic, Pocatello; Howard W. Platt, Pocatello; John Gooch, Gentile Valley.

The Raging Provo.

Home Fraughton returned from the head waters of the Provo Monday where he has been prospecting for some time past. He says the snow has only just begun to melt up that country and that we may look for higher water in the Provo than that of last Saturday, after a few days of sunshine. He reports much damage to bridges and roads from Woodland up the bridges that were across the river near Jones' mill and at Robert Jones' ranch both being washed away. The self-supporting flume used to conduct water across the river on irrigating farms on Woodland bench is also gone which causes much inconvenience to the ranchmen and crops will in all probability suffer. The water is so high that it may be necessary to build a dam before it can be replaced. The snow at McGuire's old saw mill setting near the head of the south fork is in all places deep, as near as Mr. Fraughton could judge, and its depth becomes much greater as the higher mountains and canyons are reached. All this has to come down and greater damage than has already been done by the flood is anticipated.—Wasatch Wave.

Barnes-Blood.

Henry H. Blood, the able Herald correspondent from Kayville, city recorder and counselor to the city president of the Young Men's associations, and the amiable Miss Minnie Barnes, daughter of Hon. John R. Barnes, were married in the Salt Lake temple yesterday, and a quiet family wedding reception was held at the home of the bride on the same evening. Hereafter, no doubt, the young couple will not confine himself altogether to writing news and political items, but will also treat upon subjects pertaining to the domestic science.—Bountiful Clipper.

Rising Rivers.

The Salmon and Lemhi rivers are both rising, and the water is still rising.

MOUNTAINS OF MANICLAND.

Part of Southern Africa Which May Be Compared With Switzerland.

Two hundred miles north-northeast of Basutoland the great Kathlambas range rises in very bold slopes from the coast levels behind Delagoa bay, and the scenery of the valleys and passes is said to be extremely grand. Knowing it, however, only by report, I will not venture to describe it. Nearly 500 miles still further to the north, in the district called Manicland, is a third mountain range, less lofty than Basutoland, but deriving a singular charm from the dignity and variety of its mountain forms.

The whole country is so elevated that the summits of 7,000 or even 8,000 feet do not produce any greater effect upon the eye than does Ben Lomond as seen from Loch Lomond, or Mount Washington as seen from the city. There is a boldness of line about these ranges comparable to those of the west coast of Norway or of the finest peaks of the Alps. Some of them rise in smooth shafts of apparently inaccessible rock. Others form long ridges of pinnacles of every kind of shape, specially striking when they stand in the open. The hillsides are morning or evening sky. The valleys are well wooded, the lower slopes covered with herbage, so the effect of the mountains is softened by the softness of the surroundings which they dominate, while at the same time the whole landscape becomes more complex and more noble by the mingling of such diverse elements.

BLOOD POISON A SPECIALTY. No scenery better deserves the name of romantic. And even in the tamer parts, where instead of mountains there are only low hills, or "kopjes," as they are called in South Africa, the comparatively friable rock of wrinkles hills decomposes under the influence of the weather into curiously picturesque and fantastic forms, with crags rising to their base and detached pillars supporting loose blocks of tabular masses, among or upon which the timid Mashonas have built their huts in the hope of escaping the raids of their warlike enemies, the Matabeles.—The Century.

LAUGHTER ADDS TO BEAUTY.

Laughing is said to produce small wrinkles about the mouth, but no one need have any anxiety about wrinkles so formed, for they are rather pleasing than not, and often add to the attractiveness of a face, for they show a light and merry heart. "With mirth and laughter let old wrinkles come," as Shakespeare says. Cheerfulness and bright happy looks always add to beauty, so laughter should certainly be encouraged, even at the expense of a wrinkle or two. It is the lines that come from a peevish, discontented frame of mind that disfigure the face, and have to be fought against.

The women's clubs and societies of the city originated the enterprise and will carry it through.
