

CONSOLE TRADE

Volume of Business Heavy, But Profits Are Small.

GAIN OVER LAST YEAR

THE YELLOW FEVER CRIPPLES TRADE IN THE SOUTH.

General Industrial Situation is Favorable, But There is a Threatened Overproduction in Iron - Business Failures Down to a Minimum - Prices of Leading Staples.

New York, Oct. 7.—Bradstreet's tomorrow will say: With the exception of some parts of the south, where heavy storms and yellow fever, with resulting quarantines, check distribution, a very large business appears to be doing, though complaints of a narrow margin of profit are well nigh unanimous. While the bank clearings of September point to a slightly smaller business done, we believe, however, than a year ago, this week's figures point to a fair gain over last year, and, therefore, over all previous records for this week of the year. The volume of distribution, as a whole, is well up to or above that reported a year ago in most cases, and, therefore, the volume of recent preceding annual periods. As for some time past most activity is perceptible in the west and northwest and on the Pacific coast, particularly at Puget Sound and Columbia river points. It has been a carnival and fall celebration period at a number of western cities this week, and, consequently, a large distribution, both retail and wholesale, is reported.

As trading centers, markets recently favorable reports are fully maintained, and business in textiles, particularly cotton and woolen goods, least favorably situated. The general situation, that the spread of yellow fever in some sections of the south, with resulting quarantines, has sharply checked trade in the lower Mississippi valley, and heavy storms on the south Atlantic coast have operated to arrest distribution and reduce the rice crop.

The situation as to prices generally is one of sustained strength, with a prominent feature in that growing out of the refined sugar war. To the exceptional strength in sugar, freights is charged some of the falling off in exports from northern ports. Business failures are down to a minimum, numbering 162 for the week ended September 25, against 198 last week, 237 in this week a year ago, and 238 in 1894.

Active demand for the actual wheat and unprecedentedly smaller stocks to start with, have constituted a balance for generally estimated maximum world's yields, and recent considerable increase in stocks at home and abroad. In the face, therefore, of a gain of 7,000,000 bushels in American and European stocks last week, prices, influenced by the small gain in world's stocks in South America and Europe, have risen firmer and higher.

Bradstreet's monthly report of wheat stocks shows a total on Oct. 1 in this country and abroad, including stocks in elevators, a gain of 10,115,000 bushels a year ago, while European stocks on a like date are given at 42,300,000 bushels, against 41,500,000 last year, and 20,000,000 to 21,000,000 bushels gain in 1895 and 1896. Stocks in this country and abroad, east of the Rockies, on Oct. 1 are the smallest reported at that date since 1882.

Prices of leading staples, as reported to Bradstreet, are showing a rather more irregularity in the market, are well held. Warmer weather early in the week checked buying of heavy goods at Canadian cities, but better conditions later have favorably affected distributive trade. Toronto reports a northwest buying, with fairly good stocks in that section and a demand in elevators. Deliveries are more liberal, although prices are still above an export basis in Ontario. American lumbermen are reported hiring large numbers of men for work in Canada this winter.

Canadian failures this week number 23, against 22 last week, 43 a year ago, 37 in 1894, 24 in 1895, and 27 in 1894.

REVIEW OF SPECULATION. Market Has Been Irregular, With Restricted Professional Trading.

New York, Oct. 7.—Bradstreet's financial review will say tomorrow: It has been an irregular market, with restricted professional trading. Most of the developments, including the contracts for ports of railroad earnings, have been favorable, but the breaks in the industrial stock list under the lead of tobacco last week, and the weakness in this week, have apparently eliminated public interest for the time being. London has shown a disposition to purchase the Pacific stocks, but its trading here here has had little effect. The increasing ease of the money market seems to be responsible for the restricted activity and strength in the bond list, but neither this nor the continuance of gold imports seem to revive the flagging spirit of speculation. The chief incident has been the weakness of American sugar stock on cutting of prices for the refined article.

The railroads have been neglected, but some specialties have been actively manipulated and advanced. Tobacco has ceased to be a leader of the market, the restriction about the disagreements and liquidation of the pool in the stock having quieted the streets' apprehensions about the situation as a class. Sugar, however, took Tobacco's place in the market. Prices for refined sugar were generally reduced, both by the American company and the opposition refiners, until on Thursday it was understood that granulated sugar was sold at about 4 1/2 cents a pound, which, it is believed, represents all profit from the refining business. From 18 1/2 at the beginning of the week the price of sugar stock fell to 2 1/2, its course being marked by a great irregularity and frequent rallies on the short interest. The latter incidents were assisted by the apparent scarcity of stock and the pressure of a premium for borrowing of one-eighth to one-quarter of one percent. The ordinary dividends were but little affected by the course of sugar.

People's Gas was very strong, rising from 1 1/2 to 1 5/8 on inside support and indications that the street was in favor of the National Gas dispute and involving the gas companies with important property interests which supplies the city. An advance of 1 1/2 cents on a stock is said to be part of the arrangement in the outside market. The Federal Steel company stock has been the object of considerable dealings at well sustained prices, the common being about 22 1/2.

The railroad share list has been neglected. The grangers, with the exception of Rock Island, which had support on its favorable August statement, were dull. Atchison preferred was something of a feature, rising to 48 on rumors that dividends will com-

Three More Officers Vindicated the War Department.

ARMY WELL SUPPLIED

MAJORITY OF THE COMPLAINTS WERE EXAGGERATED.

General Greene, Major Hersey and Quartermaster Lee Testify before the Investigation Commission - Declared No Army Was Ever So Abundantly Supplied.

Washington, Oct. 7.—Three witnesses were before the investigating commission, General Greene, who participated in the battle of Manila; Colonel Lee, chief quartermaster at Camp Thomas; and Major Hersey, who was for a time in command of the Roosevelt rough riders. Each admitted the possibility of individual cases of suffering and discomfort, but all said that the vast majority of complaints were exaggerated, if not without foundation. They agreed in saying that no army was ever so abundantly and luxuriously supplied as was the American army in the Spanish war.

LIET. LAFFERTY'S DEATH.

Surgeon Walker Declares He Received Every Attention.

Washington, Oct. 7.—Dr. William W. Walker, the physician who attended Lieutenant Lafferty in his last illness at Camp Wikoff, has sent an explanation of his connection with the case to a special investigation committee. The letter is dated Oct. 2, and was written from Fort Sam Houston, Tex.

Dr. Dellafield, a very prominent New York physician, Colonel Sam. Major Thompson, Colonel Greenleaf, Captain Jackson and some other prominent physicians were called in consultation on Lieutenant Lafferty's case, and a doctor's nurse was detailed night and day to attend Lieutenant Lafferty alone, and an orderly whose duty it was to devote his whole time to Lieutenant Lafferty. I saw him every hour during the day. I made my visit to the ward at 9 p. m. and again from 12 to 1 p. m. and again at 4:30 a. m. If anything occurred in the ward I was called and answered cheerfully at any hour.

SHOCKING CRIME IN KANSAS

WEALTHY TAILOR ACCUSED OF MURDERING HIS WIFE.

THE WOMAN KNEW SHE WAS BEING POISONED AND DECLARED HER HUSBAND MURDERED THEIR DAUGHTER.

SPANISH REINFORCEMENTS.

Additional Troops Sent Against the Philippine Insurgents.

Washington, Oct. 7.—Admiral Dewey has called the navy department that he has been advised that a number of Spanish troops have arrived at Singapore, bound for the Philippines to reinforce the Spanish garrison at Iloilo, on the island of Panay.

At this place is concentrated about all that remains of the Spanish army of occupation of the Philippines outside of the few troops on the island of Luzon. In sending troops to the islands the Spanish government has raised the direct question as to the right to reinforce troops now engaged in active hostilities with the insurgent forces. The weight of opinion here is that the action is permissible, and does not constitute a breach of the terms of the protocol suspending hostilities. A good deal, however, may depend on whether the Spaniards confine themselves to a defensive position, or undertake to carry on an offensive warfare against the insurgents.

The cabinet today gave some consideration to this subject, which, in the end, is likely to be left to the disposition of the peace commission.

Played Out. Dull Headache, Pains in various parts of the body, sinking at the pit of the stomach, loss of appetite, fever, chills, Pimples or Sores are all positive evidences of impure blood. No matter how it became so, it must be purified in order to obtain good health.

Queen Victoria, though slightly under five feet in height, is close upon 12 stone weight.

Lawrence, Kan., Oct. 7.—J. J. Kunkle, a wealthy merchant tailor, was arrested here today, charged with having murdered his wife by poisoning. Mrs. Kunkle died ten days ago. About four weeks previous to the woman's death, Birdie Comynore, her 14-year-old daughter by a former husband, died, after a lingering illness which baffled the skill of the family physician. A few days before the death of Mrs. Kunkle she told several of her neighbors that she was being slowly poisoned, and also that her daughter had been poisoned. When asked why she did not leave the house, Mrs. Kunkle replied that she did not feel strong enough to go, and that she hoped to secure actual proof of the truth of her suspicions.

Upon the death of Mrs. Kunkle, her neighbors brought the case to the attention of the coroner, who caused the woman's stomach to be taken to the state university for an analysis of its contents. The result of this analysis was reported to the coroner's jury yesterday. Strong signs of arsenic were present, and upon this showing, and upon the testimony of neighbors of the Kunkles, the jury today returned a verdict that Mrs. Kunkle came to her death by poison administered at the hands of her husband, "and others to the jury unknown."

Following the rendering of this verdict, Kunkle was arrested. The stomach of Mrs. Kunkle's little daughter has now been removed for the purpose of analysis. A former wife of Kunkle died suddenly after her life had been heavily insured.
