CUBAN INDUSTRIES REVIVED

First Car of Sugar Marketed at Santiago.

Scarcity of Oxen Retards Plantation Work—Americans Buying Timber Lands in Eastern Cuba.

(Correspondence of the Associated Press) Santiago de Cuba, Feb. 28.—The first car of sugar that has come into Santiago since long before the blockade and the first that has been produced since the spring of 1897, was marketed last week. It came from the Santa Ana plantation, near San Louis, the first to begin grinding. There was quite a celebration among business men in the big plantation, and some of the big plantations and their dependent colonies of the island. Many mills have been destroyed, and will require time and new capital to restore, but those remaining are resuming the work of grinding as rapidly as possible.

COMPARED TO THE MAINE.

M. Casaigne's Article says: "The queen becomes our guest at a moment when the British government has made itself more than ever our enemy. Her journey will be full of the same risks as the Maine in Cuba. The French government is committing the same foolish act as when Sagasta let not prevent the queen from being escorted in such a manner that the smallest accident might precipitate both powers into a terrible conflict."

PRINCE OF WALES CRITICIZED.

The Prince of Wales went to Paris this week and visited the exposition grounds. He proceeds to Cannes on Sunday. The prince's wonderful scheme, known as the League of Nations, in connection with which a new order has been established for those who collect and promote the collection of subscriptions for the Prince of Wales hospital fund, five years' work being required for admission to the order, is severely criticized in several quarters. The Daily News thinks the prince has not been fortunate in his selection, committing himself and in securing the sanction of the queen to such a scheme. The paper calls it an "organization of mockery by the aristocracy, which is repugnant to the idea of charity, and not calculated to add to the dignity of the throne."

MISSING PRINCE FOUND.

There has been a revival of the sensation caused a few weeks ago by the alleged disappearance of Prince Ludwig von Loewenstein-Worthheim, who married the daughter of a duke, a nephew of the Earl of Mexborough. He moved a good deal in English society, and then disappeared mysteriously. An advertisement inquiring after his whereabouts caused considerable speculation in the London press, and now a telegram from Manila has been published, saying the prince is at Manila, and has been there for many months, as present during the destruction of the Spanish fleet, and was a member of the European club. But it is added, his behavior aroused suspicion, and he was thought to be acting as the confidential agent of the German government. Before Manila surrendered, it is further alleged, the prince was allowed to pass in and out of the Spanish and insurgent lines, each party apparently regarding him as favorable to themselves. For a few days, it is even asserted, he was a voluntary aide-de-camp of General Miller, though he was never connected with the American army. The English papers are wondering what is the meaning of these "mysterious movements."

PECULIAR POISONS.

GENERATED IN THE HUMAN BODY.

The Result of Imperfect Digestion of Food.

Every living thing, plant or animal, does not promptly and thoroughly digest the food. The result is a heavy, sodden mass, which ferments (the first process of decay), poisoning the blood, making it thin, weak and lacking in red corpuscles; poisoning the brain, causing headaches, pains in the eyes. Bad digestion weakens the heart, causing palpitation, and finally bringing on disease of this very important organ.

STUART'S DYSPEPSIA TABLETS.

Stuart's Dyspepsia Tablets are the most sensible remedy in all cases of indigestion. It is to take after each meal one or two of Stuart's Dyspepsia Tablets, because they supply in a pleasant, harmless form all the elements that weak stomachs lack.

INFLUENZA EPIDEMIC.

Influenza has reached an epidemic form in London, being responsible for one in eighteen deaths during the past week, when the deaths from the disease reached a total of 112. But the increase was accompanied by the least number of deaths from pulmonary affections recorded during the present winter.
