

WADVA AND CHLORIDE BRIDGE ATTRACTS ATTENTION

Experimental stage and may now be looked upon as an institution.

WORRY FOR HUNTINGTON

Southern California to be emancipated.

Dominance of Southern Pacific and Santa Fe in regard to Los Angeles seriously threatened by the proposed short cut—annual meeting of the Southern Pacific.

From present indications, within the next thirteen or fifteen months southern California will be the scene of new and important railway developments, which will pile up lots of work for Huntington and place his present two routes to the east at a great disadvantage.

This little cloud upon the horizon, which at the present time does not look much bigger than a man's hand, is the proposed bridge between Uvada and Chloride, mentioned in a brief dispatch three days ago, which, if accomplished, will bring Los Angeles within twenty hours of Salt Lake.

An effort is on foot which will be sprung at the Los Angeles conference of interested railroad men, to have the recently organized Utah, Nevada and California company make an extension from the Utah and Pacific terminus at Uvada and bridge over the 230-mile gap between that point and Chloride on the Arizona and Utah line.

In reviewing the situation the San Francisco Examiner says: "The Santa Fe has the advantage of a short line to the east. It owns a road all the way from Los Angeles to Chicago. It is so tied up in traffic combined with Huntington, however, that it is not using its shorter route to the east to fight the Southern Pacific for its own good and that of the people of the south. The Santa Fe has one round-about line to the east, by the way of El Paso. Its other circuitous line runs north to Mojave, and thence by the way of Lathrop, Sacramento, Reno and Ogden to the Southern Pacific, the route by the way of Kingman and Uvada, would be a strong competitor of the Santa Fe, and make the Southern Pacific a very important business into and out of southern California.

Realizing that there will before long be a road in operation into the south by the way of Uvada, the Southern Pacific, week before last, bought the Carson and Colorado line of D. O. Mills, so as to make it a cut-off between Los Angeles and the coast, and to build a building from Mojave north to Keeler, the southern terminus of the Carson and Colorado, and from Mound House, the latter's northern terminus, northeast to Wadsworth, the Central Pacific, Huntington's new line into the south will be completed. By its use he will avoid the Sierra Nevada mountains, and the route will not resort to all this expense did he not know that at least one more new line will soon seek its share of the rich traffic of Los Angeles and its tributary country.

HEARD AND SEEN IN TIMMONY'S COURT

M. P. Wells, the tailor, was a defendant yesterday, a former employee, Frank Mellick, accusing him of assault and battery. Mellick said he told Wells he didn't want to work for him any longer, at which the tailor became riled and struck him.

CONTRACTS TO BE LET

Extension on Idaho Northern Seid to be now in order. It is stated, according to the Boise Statesman, that work is to be vigorously pushed on the northern extension of the Dewey railroad, known as the Idaho Northern, the grade for which has been built from Nampa to the Boise valley. Colonel Dewey is now in New York and it is understood he has made all arrangements for the completion of the work, his idea being to complete the road into the timber this coming summer. Contracts for a lot of this work will be let at once.

ROCKEFELLER IS IN IT

Plan to Pool 95 Per Cent of Boats on Great Lakes. Chicago, March 3.—The Chronicle says: Another field of transportation to be covered by the syndicates that within the past few months have assumed control of the railroads of Chicago and St. Louis. Those behind the consolidations have turned their attention to the water lines and are working on a plan to combine the large boat companies on the great lakes with the intention of placing these in the big pool with the railroads.

All the big lines are to be brought into the fold as common set of rates agreed upon that will not conflict or cause trouble to the all-rail lines from here to the east. It is said that Morgan, Rockefeller, Harriman and Hill are the prime movers in the lake deal.

ANNUAL MEETING OF S. P.

Will be held in San Francisco and Not New York. San Francisco, March 3.—The Chronicle says: The annual meeting of the Southern Pacific company will be held in San Francisco this year as usual, and not in New York, as President C. P. Huntington will come out from the east to attend the annual gathering, and several other New York directors are expected to be present. Only three of the eleven directors of the Southern Pacific are now residents of California. They are H. T. Huntington, Julius Kruttschnitt and J. C. Stubbs.

To Work at Track-raising

Springville, March 3.—Last night two more Springville railroad contractors left for the east to work on the Rio Grande Western railway. H. and T. Roylance went to Castlegate, and Mose and Mill Roylance to Green River. Both companies will work at track-raising.

Railroad Notes

J. W. Hamilton, city passenger agent of the Chicago, Burlington & Quincy, was in town yesterday.

C. A. Cairns, assistant general passenger agent of the Chicago & North-western, came into town yesterday from the coast. He is on his way back to Chicago.

S. J. Henry, general freight agent of the Rio Grande Western; J. A. Reeves, chief clerk of the Oregon Short Line railroad; and C. Ira Tuttle, general livestock agent, left for Kansas City last night to attend the meeting of the trans-Missouri freight bureau.

The Rock Island through Palace sleeper from Salt Lake to Chicago on No. 4, Rio Grande Western, is proving an unqualified success. Judging from the short time it has been in operation, the innovation has already passed the

JOB FOR VOLUNTEERS

Horace Smith Made Health Board Clerk. SUCCEEDS ELI FOLLAND

SOLDIER RECEIVED APPOINTMENT YESTERDAY.

Made a Good Record in the Philippines While Serving as a Member of the Fourth Cavalry—Retiring Official Has Held Place Five Years and Done Good Work.

WILLIAM ABBOTT IS CRAZY

WELL KNOWN BAR TENDER SENT TO ASYLUM.

Has Been Ill For Many Weeks and His Mind is Completely Shattered.

Weakened in body and mind by feverish disease, William Abbott, the well known mixologist who formerly held forth at Hogle's saloon, was yesterday committed to the insane asylum at Provo for treatment.

Young Abbott suddenly developed signs of mental irresponsibility by leaving his cot in the fever ward of St. Mark's hospital and suspending himself from an iron rod from which an arc light hung. From this projection he swung to and fro and then released his hold, alighting on the stone steps far below. "Billy" was picked up with a broken leg and carried back into the hospital. His broken limb has healed sufficiently to warrant his removal to the institution where he will be treated with the best of care. Abbott's friends are not without hope that he will be restored to his full mental vigor.

STATE'S FINANCIAL SHOWING

TAXES ARE RESIDED. HIS REPORT.

Balance on Hand Amounts to Nearly \$300,000, While Disbursements Aggregate \$620,000.

Treasurer Chipman yesterday submitted his report of the state's financial transactions for the month of February to Auditor Richards. It makes the following exhibit:

Balance on hand Feb. 1.....\$26,439.75
Revenues for February.....67,219.22
Total.....\$93,658.97

Disbursements. General fund warrants redeemed, \$2,183.24; State district school fund, \$5,782.71; State school fund, \$15,316.55; Refund school fund, \$1,530.00; Sundry funds disbursed, \$2,446.00.

Total disbursements, \$28,328.50; Balance on hand March 1, \$258,327.56. The balance on hand is apportioned to several funds as follows: General fund, \$122,215.50; State district school funds, \$40,236.57; State school fund, \$5,478.25; Other funds, \$1,407.24; Trust funds on deposit, \$81.31.

CONTESTS A SOLDIER'S WILL

PETITION TO ADMIT TUFTS' TESTAMENT IS RESIDED.

Uncle of Dead Cavalryman Disapproves of Boy's Stepmother Acting as Executrix.

Testimony was taken by Deputy Clerk Little in the district court yesterday in support of the petition to admit to probate the alleged will of William E. Tufts, deceased, late of troop E, Fourth cavalry. At the conclusion of the hearing Don C. Tufts, uncle of deceased, orally protested against the appointment of M. C. Harman, the boy's stepmother, administratrix with the will annexed, claiming she is incompetent to serve as such. The objection was overruled, and Harman, in protest and the acting judge, announced that he would submit the testimony to Judge Hiles.

MRS. FOY SEEKS A DIVORCE

CHARGES HUSBAND WITH GREAT CRUELTY.

Says He Abused Her and Expressed Intention Not to Live With Her Again.

Clara A. Foy yesterday commenced suit in the district court against Edward M. Foy for a decree of divorce on the grounds of failure to provide support for her and extreme cruelty. According to the complaint, plaintiff and defendant were married Aug. 29, 1882, at Greenwood, Neb., and the issue of the marriage is a son, Clinton, aged 15 years.

Mrs. Foy sets up in her complaint as acts of cruelty by defendant toward her that he, within the past ten days, has abused her with vile epithets and has told her he would no longer live with her or provide for her support.

Besides praying for a decree of divorce, the plaintiff seeks an equitable division of her husband's property, valued at \$4,000.

Wilson & Smith are plaintiff's attorneys. The defendant entered voluntary appearance and took five days to answer his wife's complaint.

HIRSCHMAN CASE

Trustee Asks Review of Referee's Order.

In the bankruptcy case of Jerome Hirschman, the trustee yesterday filed a petition with the clerk of the United States court, asking for a review of the order of the referee, wherein the latter states that he had no right to direct the trustee to sell the stock in trade claimed by him to belong to the bankrupt's estate. The petition was taken under advisement for a week by Judge Marshall.

Going Down Hill

People suffering from kidney diseases feel a gradual but steady loss of vitality. They should lose no time in trying Foley's Kidney Cure. It is guaranteed. Johnson-Pratt Drug Co.

MUCH OPPOSITION TO HAMMOND DEVELOPS

Friends of Mr. Odell Will Remember the Secretary of State—How Mr. Smart Was Fooled.

Smart Was Fooled.

In connection with the matter of Republican disaffection here an amusing anecdote of the last campaign is related. It concerns Thomas Smart, jr., late of the sheepman of the county and a Republican.

According to the story told, Mr. Smart offered to duplicate any contribution made by an individual to the campaign fund, but when several parties contributed \$20 each, Mr. Smart also put up that amount. Desirous, however, of working Mr. Smart for a while, the rest of the county chairman, in a sudden quartet party, Robert Murdoch to have the latter put up his check for \$150, with the understanding that after Mr. Smart had duplicated Mr. Murdoch could take it down again.

This plan, it is said, was carried out, and Mr. Smart paid the additional \$150. The county chairman was able to keep the secret, however, and not long ago Mr. Smart became possessed of the facts. He is now out for revenge, and he said will make every effort to defeat the Republican party in this election.

The one great surprise to people here, in the report of the Republican convention proceedings, is the statement that Cache went solid for Hammond, as quite a number of those who went down from here were open and avowed enemies of the secretary of state. One of the delegates has recently made a claim that Knowles cast the vote of the delegation for Hammond without consulting him or the members of it.

The disgruntled Republicans here are loudly voicing their dissatisfaction on both Hammond's nomination today, and are threatening to pull hundreds of votes away from him in this county.

AGRICULTURAL COLLEGE PRESIDENCY

Another candidate has been pushed to front in the fight for the presidency of the Agricultural College. Dan Ross, the opinion is prevalent that the gentleman will be likely to receive the appointment if the hard, earnest work of the county is done for anything. Professor George Thomas, a member of the A. C. faculty, is the gentleman referred to. Within the past ten days an canvass in his interest has been made by his friends, and it is believed that he has informed them of a desire to go abroad for study in the spring; they say that they can induce him to leave the college, and the presidency of the college shall be offered him.

Among the friends referred to are nearly all the members of the college board of education, the heads of the political parties. Some of the most influential educators of the state, including those who live in Salt Lake and Ogden, are in the canvass for the candidacy. As to his qualifications, he is reputed to be a broadly educated man, and at the head of the city board of education, he demonstrated his great executive capacity. His selection would also be quite a popular one, as he is well liked by the people generally here.

WILL CARRY SANPETE

Democrats Pleased With Work of the Convention.

Mr. Pleasant, March 3.—Democrats in this vicinity are highly pleased over the result for their party in the special election to be held next month. Yesterday's Herald were eagerly sought for, and when they came and it was learned that King was defeated, selected to make the race, a feeling of satisfaction settled down over the party here, as they universally claim that the Democrats have been particularly successful in the election. And when the news came in this morning that the Republicans had nominated Hammond, the Democrats became more sanguine, and even some Republicans have been heard to express fears that their man would not stand a very good chance in the fight. This county has been strongly Republican, and the fact that King is to run for the Democratic party, and the further fact that the Sanpete branch of the Republican party is to be elected, has been particularly gratifying to the Democrats with the local Democratic leaders the highest hopes of winning hands down in the county.

Marsh-mallow Taffy at 15c. pound, Monday at Koltz.

SOME IMPORTANT DEVELOPMENTS IN PIKE'S DIGGINGS

BIG VEIN OF GOLD ORE

WILD IRISH HILL A MOUNTAIN OF ORE

Horseshoe is Being Put in Shape for a Large Production—Activity in Deer Lodge District—Mr. Weir Visits the Ajax and Tintic Iron Reports From Tintic.

Aqua, March 1.—Pike's Diggings is to the front with an important strike. The Amethyst, or really the Wild Irish, is the property that now gladdens the hearts of all in the camp. The Amethyst shaft is almost on the line where that claim adjoins the Wild Irish. The south drift from the shaft soon strikes into the Wild Irish ground, and in this drift last week a fine ore chute was encountered. Not only did the vein widen so that its width will not be known until it is cross-cutted, but the ore increased in value. Some correspondents could not learn the value, but it is safe to say they are not less than \$20 in gold to the ton.

This property is under bond to James McFarlane, manager, for McCune & Hoge here and at Deer Lodge. Seven men are at work now developing it. Work has been stopped in the shaft on account of water which came in at 120 feet in depth. Where the water was encountered it came in from a vein which cut the main vein in an easterly and westerly direction. It is the full size of the vein, and the quartz part wells—rather a strange thing to find free gold at water level.

The Wild Irish hill is almost a mountain of ore, and the workings, because of the knowledge obtained would be of incalculable value to them when they had attained another 100 feet lift. He said the presence of the quality and dip and trend of the ore chute had been accurately ascertained, so that all blind work may be avoided when the 550 level of the shaft is reached. Mr. Carruthers further that in all of his years of mining experience he had never seen an instance similar to conditions in the shoebridge, in that the continuity of the ore is not broken, so that it is unmistakably their downward action. On both of the lower levels shipping grades of ore have been obtained, particularly on the 450 and 500 level, in places. The ore on the 400 is a lead and copper mixture, passing to almost wholly copper on the 450, at which point sinking on the ore chute had become more dense. It is not for the fact that the level is just at water level. It looks to a moral certainty that the people back of the shoebridge-Bonanza will ultimately be richly rewarded for their perseverance.

AT THE HORSESHOE

The latter property, by the way, is being rapidly put into shape for a large output as soon as the mill is erected. Drifting is being prosecuted on both the 100-foot and 200-foot levels and the new shaft is being sunk to the 300-foot level. The grading for the mill is completed and work on the building will soon commence.

Around the mine the town of Fay is fast building up. The Fay Mercantile company has a fine store, H. H. Cooper has erected a fine Dan Ross house, and is putting up a lively stable, four neat cottages have been erected by the company, besides a large boarding house, and a number of other residences are being planned. Superintendent McFarlane has moved his headquarters from Deer Lodge to Fay and will direct affairs from there.

At Deer Lodge the principal work being done is on the Homestake. Sinking is going steadily on. The new strike in the Fawn group has increased prospecting and stirred the town up to a little more activity, being taken from this property, running as high as \$140.

MR. WEIR'S PROPERTIES

Progress of Work on Ajax and Tintic Iron.

Mammoth, March 3.—After an absence of several weeks Thomas Weir of the Tintic Iron and Ajax Mining companies returned yesterday and spent Friday and Saturday in inspecting both properties. Mr. Weir expressed himself as being very pleased with the progress made in drifting in the Ajax mine during his absence, occasioned by encountering a mineralized line of unusual height character. He had calculated the town up to the shaft to be able to make six feet every twenty-four hours, as they had done heretofore, but the driving had been done at the rate of one foot in twenty-four hours. He estimates that it will be thirty days yet before they can possibly reach the point where the ore channel is believed to exist. Sinking in the shaft has been suspended, and exploration work on the various levels.

Mr. Weir spoke in the most favorable manner of the conditions in the Ajax. He said that the four cars of copper ore that he had shipped were particularly fine in value, and that Superintendent Nebeker would be able to duplicate the shipment at once.

ON DOUGLASS MOUNTAIN

Carload of Copper Bullion Shipped by Bromide Smelter.

Vernal, Feb. 28.—Superintendent R. S. Collett of the Bromide Mining company came in from Douglass mountain yesterday, where he has been superintending the operations of the company at the mine and mill. Mr. Collett states that the recent run of the smelter was entirely satisfactory. Sixty thousand pounds of bullion was produced, which was shipped to Denver. A force of men are now at work in the mine getting out ore, and teams are on the road transporting the ore. Things will get into shape generally for another good start with the coming of spring.

William Donaher, the veteran prospector of the Carbonate district, came down from that district last night and informs The Herald that the prospect is very encouraging in the Dawson, where heavy copper stains have been encountered, which indicate a close proximity to the long-sought extension of the Dyer ore bodies.

ALL IN ORE

Conditions at the Showers and the Bowers Mines.

Diamond, March 3.—The Joe Bowers, Showers Consolidated and Joe Bowers Extension mines are all in ore. It can be truly said that the last two named properties have never looked so promising as they do at this writing. The Showers Consolidated folks will send out a car of very nice first-grade silver and lead ore today, and will have a part of another car left on their recently enlarged platform. By reason of strict restrictions, Superintendent Dan Brighton of the Showers is very reticent about giving out information concerning the property, but admits that conditions on the 400 level are such that should make anyone who is interested in the mine feel much gratified with the outlook. Another shipment from the mine will follow in one or two days.

Superintendent Pat Talons of the Joe Bowers has been developing the property in a northerly direction on the 300 level with profitable results. The prospecting has determined the existence of excellent mineral, though somewhat scattering in many places

Work to be Resumed on the Vertical Shaft.

Silver City, March 3.—General Manager Henry G. Heffron of the shoebridge-Bonanza mine has sent out instructions to Foreman Carruthers to discontinue prospecting and development work on the 400 and 450 levels, and to make preparations to resume sinking in the vertical shaft. Carruthers accordingly commenced blasting out a place on the 450 level yesterday sufficiently large to accommodate the shaft. The shaft will be enclosed in brick and the steam columns covered with asbestos packing, so as to retain and utilize the pressure. Foreman Carruthers, an intelligent and experienced worker and intelligent underground miner, told The Herald today that the company had been very judicious in suspending work on prospecting the lower workings, because the knowledge obtained would be of incalculable value to them when they had attained another 100 feet lift. He said the presence of the quality and dip and trend of the ore chute had been accurately ascertained, so that all blind work may be avoided when the 550 level of the shaft is reached. Mr. Carruthers further that in all of his years of mining experience he had never seen an instance similar to conditions in the shoebridge, in that the continuity of the ore is not broken, so that it is unmistakably their downward action. On both of the lower levels shipping grades of ore have been obtained, particularly on the 450 and 500 level, in places. The ore on the 400 is a lead and copper mixture, passing to almost wholly copper on the 450, at which point sinking on the ore chute had become more dense. It is not for the fact that the level is just at water level. It looks to a moral certainty that the people back of the shoebridge-Bonanza will ultimately be richly rewarded for their perseverance.

FRUIT GROWERS MEET

Will Continue Crusade Against Orchard Pests.

The fruit growers of Salt Lake county held an interesting and profitable meeting yesterday in the county commissioner's office. The main topic of discussion was the best method of exterminating the peach borer pest which has recently made its appearance in Utah orchards. Bulletin No. 176 from the Cornell college experiment station afforded some pertinent suggestions on the subject.

It was the consensus of opinion that winter spraying is necessary to be continued for the eradication of the San Jose scale, shot hole fungus and curl leaf on peach trees. The treatment recommended is a mixture of lime, sulphur and salt in solution, according to formula No. 7 in County Inspector Serenson's printed instructions.

Before adjourning till the first Saturday in April the meeting resolved to give the matter under consideration of the National Pure Food association, and the secretary was directed to communicate the fact to Secretary Wedduburn of a trip to Washington, and also to Senator Rawlins.

Business of Week

Approach of Spring Closes Some Activity.

INCREASE IN CLEARINGS

SHOW GAIN OF 72 PER CENT OVER 1899.

Local Stocks Were Strong, But Few Sales Were Recorded—Several Real Estate Deals Completed—Building Permits for the Week Just Ended.

With the near approach of spring there is noted an increase in activity and a greater volume of local business as reflected in the bank clearings. The clearings yesterday were \$269,671.67, compared with \$301,358.62 for the corresponding day last year.

Local Stocks Active

Local stocks were active during the week. But few deals were reported, and those small ones. The following are the most reliable quotations for the week: Deseret National bank, \$10.00; Deseret Savings bank, \$10.00; State Bank of Utah, \$10.00; Zion's Savings bank, \$10.00; Utah Commercial & Savings, \$10.00; C. M. L., \$10.00; Cunningham & Co., \$10.00; Co-op. Wagon & Machine Co., \$10.00; Home Fire Insurance Co., \$10.00; Clark, Eldridge & Co., \$10.00; B. M. Telephone Co., \$10.00; Ogden Sugar company, \$10.00; Utah Sugar company, \$10.00; Salt Lake Railway bonds, \$10.00; Mormon church bonds, \$10.00.

Real Estate Transfers

A warranty deed was filed for record yesterday from William Wonnacott to Isabelle Cameron Brown, conveying for a consideration of \$5,150, \$250 and \$511 rods, together with right of way fronting west on Eighth East street, between South Temple and First South streets.

The Utah Sugar company yesterday filed deeds for thirty-one acres of greater acreage, situated near Bingham Junction, as a site for the proposed auxiliary sugar factory in this county. One-half the ground was bought from William H. Bird for \$2,000, and the other half from James Wardle for \$600.

Explosion in Powder Mill

Rochester, N. Y., March 3.—News has just reached here of an explosion which occurred at the Rand Powder Mills at Oak Ridge, about six miles east of Pittsford, yesterday, probably fatally injuring Fred Buboltz, an employee, and causing the destruction of many tons of powder and a valuable building.

Nominations Are Confirmed

Washington, March 3.—The senate confirmed the following nominations today: C. E. McClesney of Sioux Falls, S. D., to be agent for the Indians of the Rosebud agency, S. D.; Colonel W. S. McCreaf, Twenty-fourth Kansas volunteer infantry, to be brigadier general by brevet.

Harrison Expresses His Opinion

Indianapolis, Ind., March 3.—In response to the question whether he had as reported in conversation with friends, expressed opinion adverse to the Porto Rican bill, General Harrison said today: "Yes, I regard the bill as a most serious departure from the right principles."

Call and inspect my new imported spring goods.

H. D. SABINE, Merchant Tailor, 172 Main Street.

## &lt;
