

WHOLE MOUNTAIN HAS BEEN STAKED

Progress of the Eastern Utah Gil Boom.

WILL START NEW TOWN OPERATIONS OF THE CALIFORNIA SYNDICATE.

(Special Correspondence.)

Vernal, June 15.—Sterling D. Colton, one of Utah's pioneer citizens, who is heavily interested in the mining prospects of this section, came in from a trip to the oil fields of Colorado today, and brings the information that the interest in the oil fields is in no way diminishing, but on the increase.

The Bakerfield, Cal., crowd that have dipped quickly heavily into the district, Mr. Colton states, are pushing into shape for an active campaign of prospect work this summer. Machinery is now on the road and will be on the ground in a few days, and work will begin at once.

Horace Colthrop has contracted with this company to construct several houses on the west side of the first well to be driven. These houses are for dwelling purposes, shops, storehouses, etc., and are an evidence that the company means business.

Mr. Colton reports that the whole country for many miles in width along the oil strata is covered with stakes, and the interest is growing everywhere. He is interested in the Bronzide copper mine on Douglas mountain, and recently made a trip to that section, where he saw the workings of the mine. He states that the lower workings of the property are looking better than any time in the past, and that a run will be made at the smelter during the summer.

RETURNS FROM MARYVALE.

Isadora Morris Failed to Find Things as Represented.

Isadora Morris returned from a trip to Maryvale Friday night, where he went to examine property adjoining the famous Wedge mine in which Milan Packard's brother and others are interested, with a view to making a purchase.

"Finer-looking ground or a better defined vein," he said, "I never saw in my life and had the assays bore out the representations of the owners a bargain would surely have been made. The mine is exposed from ten to twenty feet wide, and I was informed that the ore for two or three feet on both the hanging and foot walls, was of the same grade as the rest, with the balance going about 15 per cent. I brought up any number of samples, but as the best looking material from the foot and hanging walls only went 40 in gold per ton, I have decided the rest is not worth assaying at all, and I shall stop the whole business."

The gentleman said the mines so far opened showed that the veins carried their values principally in pyrites, and while future development might bring about changes in the conditions that would make mining profitable, he saw or heard of nothing that would pay under present showings.

The Copper Belt appeared to have the best chance of success in the future, and the worth of that property was yet to be proven.

FOUR CARS IN FIFTEEN DAYS.

Record of Ben Butler For First Half of June.

Manager Jacobs returned from the Ben Butler yesterday and reported that in addition to the car of first-class ore marketed during the week two cars of concentrates and another car of first-class was loading when he left camp, and would be on the market tomorrow if no delays in transportation occurred.

IN FROM THE MAY DAY.

F. A. Flindt Speaks of Work at the Mill and Mine.

F. A. Flindt came in from the May Day yesterday and reports work on the new mill-going along swimmingly. He figures that about two weeks will be required to finish up all the little matters of detail that require time and patience to arrange before the heavy work is concerned, power may be turned on and the machinery started within a week.

TESORA'S NEW MILL.

Will Commence Grinding on Ore Tomorrow.

E. V. Sherrod, who has built the Tesora mill, was in from camp yesterday. He says the new plant has stood the preliminary warring up without a jar or a hitch of any kind, and tomorrow he expects to begin the treatment of ore. The plant is a model one, in every respect and that a fine grade of concentrates will come from it he has no doubt whatever.

GOLD MOUNTAIN.

Work Being Pushed on the Tribune and Other Properties.

Writing from the Tribune company's mine, in the Gold Mountain district, Foreman Allen Gow states that as is pushing work on that property with a force of five men and that rapid work is being made. The Tribune is located on the Fish creek side and adjoins the Advocate on the north, the Trapper's Pride on the south, the Key-

stone on the west and the Mammoth on the east, with all of them looking well.

"Everything on this west side," the gentleman reports, "looks very favorable and by the time the snow flies next fall we confidently expect to have a few more chipping claims on the list. We had a three-inch snow-fall Wednesday night."

Ore and Bullion. Ore and bullion shipments in this city during the past week amounted to \$391,316, yesterday's proportion of matters into shape for an active campaign of prospect work this summer.

Mining Notes. The Centennial-Eureka company sold eleven cars of copper ore yesterday.

The Conklin sampler was yesterday in receipt of fifteen cars of ore from Tintic. The Ophir levels company shipped the week with seven cars of concentrates.

The Taylor and Brunton sampler was yesterday in receipt of eleven cars of ore from Tintic, seven from Stockton and two from Bingham.

The Ontario company forwarded from Marsden thirteen bars of silver bullion containing 15,704 ounces, 1,000 fine.

At the Emerald Manager Olesby has gone to the mine at Park City, where he will be working on the 50, 60 and 70 levels and he reports good values in gold as being occasionally encountered.

P. E. Cox, the gentleman who put through the West Ontario deal, returned to the city yesterday on a trip to Portland. He will go out to the Park today and look into matters requiring his attention there.

C. F. Spillman of the Eureka Miner went to Ogden yesterday afternoon and about the first thing he did after landing in the Junction City was to bet \$50 that the car of high-grade ore to be sent in from the mine at Park City next will go \$20,000 for thirty tons.

John D. Packard returned yesterday from a trip to the mine at Park City. He says the new mill is one of the finest of its kind in the country and is a safe, sure and swift remedy for all bronchial ailments. Price, 25 and 30 cents. Van Dyke's drug store, corner Main and Third South.

IRRIGATION COMMISSIONERS

Must Pass an Examination Before County Surveyor.

The county commissioners held an informal session yesterday afternoon to discuss the matter of appointing a commissioner for each of the two irrigation districts recently created for this county in pursuance of the new law under which the state engineer operates. It was agreed that the commissioners to be appointed on or before July 1 from among the list of applicants who made the most creditable examination before the county surveyor as to their scientific knowledge in measuring flowing water and supervising the construction of measuring weirs and diverting dams. A time and place will be announced of the examination.

In the opinion of the county commissioners the two water commissioners to be appointed will be so acceptable to the several canal companies in the county that Judge Morse will appoint them also to carry out the decrees of the court in the big water case which was recently decided, but several of the attorneys in the case believe that the court will be prevailed upon to appoint other commissioners to represent the court.

FOOD FOR MEMORY.

The Kind That Builds Up the Brain. It is hard to believe that certain kinds of food will strengthen the memory, and yet upon the condition of the brain depends the character of the mind, and its power to remember, and to exert itself in various ways, and a healthy brain can only be maintained by well selected food.

Now we know that daily use of the brain uses up certain parts that are thrown out through the pores to the outer surface of the skin. This waste is natural, and must be made up from food.

Grape-Nuts Food was made especially to rebuild the brain and nerve centers. An experience in Chicago will illustrate.

Mrs. G. H. Baber, 523 South Paulina Street, Chicago, writes: "I was afflicted with gastritis, my stomach refused everything in the way of food until I got hold of Grape-Nuts. It was perfectly wonderful in its effect, and I was able to eat again. I gained in weight, strength and health steadily and rapidly, and now weigh 150 pounds, and am strong and in better health than ever in my life."

I have lately had a seven-months' course of vocal instruction, and have memorized 1000 words, and most of the accomplishments, besides several piano pieces. When I started in, it seemed difficult to memorize one, but my memory has been growing better every day, and I now find it easy to commit to memory without difficulty.

LIVE WIRE IN RISING STOCKS

Business Unprecedentedly Large For This Season.

BOOM IN CERTAIN STOCKS

SALES FOR THE WEEK REACHED \$372,650.48.

The past week on the mining stock exchange has been a remarkable one from every standpoint. Sales have been heavy, and with very rare exceptions prices have advanced and in some instances shares have doubled in value, while the week closed with spirited buying on 'change and amid intense excitement on the curb.

The recorded sales on 'change amounted to \$372,650.48, against \$21,762 shares and \$345,480.55 during the week previous. Such a volume of business at this season of the year is unprecedented in the annals of the exchange, and the chief feature of interest in the record is that conditions favor a continuance of the healthy tone far into if not entirely through the midsummer months.

The mines of the state were never in such good form as at the present time, and as hardly a day passes without important disclosures being made, the investing public is following the market with the keenest interest, and a favorable report results in renewed activity in the shares covering the favored property.

Ajax has hardly held its own during the week, as no important announcement concerning developments has been made. Another has steadily grown in favor, and sales at advanced figures over the previous week have been of frequent occurrence, though the stock is closely held.

Eagle & Blue Bell has made a sharp advance, which was not reflected in yesterday morning but an afternoon call can be heard it would have made a record of over \$1 a share, as against 70¢ at the high price of the week ago. Century, that sold at \$2.06 a week since, closed yesterday at \$2.43, while Daily has climbed from \$1.92 bid to \$2.41, with several sales around \$2.39 during the week.

Boss Tweed remained firm around \$1.50, while Ben Butler has advanced from \$1.00 to \$1.05. Lower Mammoth has maintained the even tenor of its way, and only fractional changes in the quotation upon it have occurred. The same can be said of Mammoth, Grand Central and Con. Mercur.

May Day has been the sensation of the week, as during that time it has more than doubled in price, and the sensational disclosures in the mine seem to have fully warranted the rise. One week since reports of the finding of a fine body of horn silver ore sent the shares up from about \$1.00 to \$1.05. The price shot up to \$1.90, and after call found buyers as high as \$2.17. The new mill will be in operation by the close of the month and is being predicted for the shares when that occurs.

The unloading of a big block of South Swansea stock early in the week knocked the price down several cents, but an early recovery is predicted. Tesora has proven a most profitable member since the announcement that its new mill was completed, and from 81¢ bid it has shot up to 98¢, with prices jumping to well over the \$1 mark during yesterday afternoon.

Daily-West is now \$40 stock, as not a share can be touched under that figure. Ontario has been quoted at \$10.00 and \$10 to \$10.40 has been offered for it. It was held at \$12 yesterday.

Tankee has regained bid at \$4.65 to \$4.75, with only a limited number of shares changing hands. Richmond & Anaconda as well as Tetro have both grown in value during the week. Like Little Chief, each has scored nice advances in price.

Star Consolidated has been a little stronger, as has United Sunbeam, while Martha Washington, Silver Shield, West Morning Glory, Galena, Valeo and any number of the other shares have been the center of consideration at the hands of the talent, with the week closing on the following quotations:

HEAVY ON THE CURB.

Estimated That \$75,000 Worth of Business Was Done.

Seldom has greater excitement pervaded the atmosphere of the curb than on yesterday afternoon, when in all probably \$75,000 worth of business was done. May Day jumped from \$1.90 to \$2 a share early in the trading, and by 3 o'clock it had touched \$2.17. An effort was then made to bear it, and from a dozen side came bids of \$2.10, with \$2.15 asked. Finally it was offered at \$2.14, and instantly a jangle ensued between the half-dozen who simultaneously shouted "sold." Later it was crowded down to \$2.05, but at closing-up time the top-notch figure of \$2.17 was being offered. Not less than 20,000 shares were sold.

Little less sensational were the performances of Tesora. Opening at \$7.75, it soon reached \$11.00 and later \$11.05, while at one stage of the game \$7.50 was paid for it. Rumors of all kinds were circulated regarding stocks at the mine, and the crowd was easily carried off its feet. Brokers estimated that anywhere from 15,000 to 20,000 shares of that stock changed hands. It closed the day at \$11.05. Eagle & Blue Bell, with rumors that the management was hiring a true condition of the property, also shot like a rocket, and sold as high as \$1.26. Tetro was lively also at 15¢ to 18¢, while Little Chief was at 75¢ to 80¢. Dexter sold at 75¢, Ben Butler at 10¢, and to lead tone to the afternoon's matinee, \$40 a share was paid for 100 shares of Daly-West.

MAY ADOPT SCHEME.

Powers Look Favorably Upon British-American Indemnity Plan. Washington, June 15.—The news dispatches from Berlin convey to the official mind here the belief that what is known as the British-American plan of settling the indemnity question is making headway and that it will in the end be adopted as the only feasible scheme. The firm attitude of the United States in declining to enter into a joint guarantee of the enormous bond issue is believed to have had its effect in inclining the ministers to accept the British-American proposal. It is certain that any movement toward the settlement of this indemnity question must result in unanimity to be effective.

Although often mentioned, the details of the British plan have not heretofore been given, and they were learned today from an authoritative source to be as follows: The Chinese government is to issue bonds to each of the powers to the amount of the indemnity due each. These bonds are to bear 4 per cent interest with a sinking fund of 10 per cent for amortization. Certain of the Chinese revenues, not specifically designated in the proposition, are to be ear-marked

for the liquidation bonds. A committee appointed by the foreign powers to take charge of the questions relating to the revenues thus ear-marked, and the committee is to arrange details by which the revenues are to be applied to the bonds. In case of default on the bonds, the default is to be to the committee and not to the several powers.

The foregoing is in substance the entire proposition, but later it was proposed in addition that the period of the bonds be thirty years, and that they be in the form of installments. In this form the proposition stood up to within a few days ago, but it is not known in what particulars it may have been modified by the ministers.

RARE SURGICAL OPERATION.

Mrs. John A. Lenzi Suffers Amputation of the Leg. A surgical operation, rare of its kind, was performed yesterday at St. Mark's hospital by Dr. Pinkerton and Dr. Worthington, for sarcoma. The patient is Mrs. John A. Lenzi, nee Holling, who has many friends in this city and Park City, where she has lived for several years. Mrs. Lenzi has been at the hospital the past month, under the care of Dr. Pinkerton, who, a couple of weeks ago, operated upon the affected limb and removed a fleshy growth on the smaller bone of the left leg below the knee, but, as was feared, that operation was not successful. The history of nearly all cases of sarcoma is that only amputation of the affected limb far above the seat of trouble affords relief and averts fatal consequences. Accordingly, Mrs. Lenzi's left leg was amputated yesterday. The operation was successfully made, and the patient rallied so nicely that it is now believed that she will recover her health and strength in due course of time.

During a period of seven years Mrs. Lenzi was treated for sarcoma, and all the while she was a patient sufferer. Even when she was a little girl she had fearful pains, and it is now believed that she will recover her health and strength in due course of time.

Encouraging reports that came last night from her bedside.

Why We Are So Enthusiastic. If we did not have the utmost faith in our work we could not be as enthusiastic about it as we are. If our clothing had not been proven in a thousand ways and by millions of people to be all that we claim for it, we should never put the thought and money that we do into these advertisements.

We most fully believe that our suits have the most style, the most care taken in the detail of their construction, consequently the most "staying quality," of any suits in the world.

We guarantee them all new and fresh, no three or four year old garments here, and strictly up to the twentieth century in all that goes to make up a perfect garment.

Our \$20.00 suits are the best money can buy or that skill can produce.
