

GREAT BRITAIN WILL NOT LAG Will Build Warships as Long as Other Nations Do Likewise.

UNITED STATES AS A FACTOR QUESTION TO BE CONSIDERED IN THE FUTURE.

London, May 14.—The question of the reduction of naval armaments came up again today in the house of commons during a discussion of the estimates. The speakers suggested that the government take the first step in proposing a reduction to other powers, Sir Charles Dilke, advanced radical, said he thought this might be possible. In view of the improved relations between Great Britain and France, those two nations might talk the matter over and subsequently approach Russia. Even if Germany did not agree to a reduction, the three powers might agree something. It was not necessary for Great Britain to build against the United States. It would be as great a mistake to consider the United States as an enemy as to count on her as an active ally, for the United States has always been the great defender of the rights of neutrals.

NO STRIKE ON GREAT NORTHERN Both Sides to the Controversy Made Concessions.

AN AGREEMENT WAS SIGNED EMPLOYEES ARE SATISFIED WITH THE OUTCOME.

St. Paul, Minn., May 14.—All danger of a strike on the Great Northern railway system has passed, and an agreement between the company and its trainmen has been settled, the schedules being signed shortly after 5 o'clock this afternoon. Both sides made concessions, and the fact that the terms of compromise, as stated by A. B. Garretson, the assistant grand conductor of the Order of Railway Conductors, was that the men were to receive an increase of 15 per cent; the yardmen get the Chicago scale, which is 3 cents an hour higher than the St. Paul scale; new men are given increased wages after one year's service instead of five proposed by the company, and upon the domestic question, which was the cause of the men's dissatisfaction in the negotiations, the men modified their demands to a slight degree. East of Minot, across the agreement, the road may run one-half of 1 per cent of the gross mileage as double-header, on the mountain divisions, west of Minot, 2 1/2 per cent. The men were allowed to be double-headers. But in computing the percentage of double-headers helper engines must be included.
