

ANGRY MOTHER AFTER TEACHER

Went For Mountain Dell Pedagogue With Musket.

DAUGHTER WAS WHIPPED

Met With Another Weapon And Changed Her Mind.

The administering of corporal punishment to a refractory pupil attending the Mountain Dell school resulted in the irate mother of the girl procuring an antiquated musket and going in quest of the pedagogue with the avowed intention, it is said, of killing him full of lead. The tragedy was averted by the teacher not taking the actions of the mother seriously, displaying a more moderate weapon and inducing the would-be assassin to return to her own dwelling. The matter over seriously and change her mind.

But she had sweet revenge in laying her hands on the case before County Superintendent of Schools Ashton. Later he received the other side of the incident from Mr. Wright, who is the teacher. The latter found it necessary to visit Salt Lake City and call upon Mr. Ashton. During the course of their interview the superintendent brought up the gun play incident, which the teacher had not considered of sufficient importance to mention. The matter was finally disposed of by a hearty laugh by the two men.

Punished the Girl. The Mountain Dell school is one of the few in Salt Lake county which remain open during the summer months. Among the pupils is the girl, whose name is not given. The other day she committed some breach of discipline. Mr. Wright found it incumbent upon him to punish her. Not caring to use the rod or switch, he commanded her to remain in during the next recess. His orders were disobeyed by the girl. When school was temporarily dismissed she fled out with her companions and was soon enjoying herself in juvenile games.

When Mr. Wright commanded her to return to the school she refused. It is said the girl became impudent, whereupon she was told to take her books and go home. That command the girl also refused to obey, and according to the story told by Mr. Ashton, gave the teacher some more "sass." It was at that juncture the cause of the double gun play occurred.

Feeling it incumbent upon him to administer corporal punishment, Mr. Wright procured a switch, according to Mr. Ashton, and gave the girl a mild thrashing. With tears in her eyes and vengeance in her heart the pupil went home and told her mother, who runs the resort above Mountain Dell, of what had happened.

Made the Mother Angry. The mother became furious. With more ado she hastened to the school house to impart to the teacher her estimation of a man who would switch a little girl. The mother met the teacher at one door of the school house. When he refused to admit him he asked her to desist and return home. Upon her refusing to do so, he closed the door. The woman, not to be outdone in that manner, went around to the other door of the school house and took up her trade where it had been broken off when the door was closed in her face. A second time Mr. Wright closed a second door in the woman's face.

Even that did not daunt the mother. Finding that she could not talk to him through an open door, she took up her position at a window. This course she continued her interrupted discourse upon the cruelty of switching a little girl. Seeing that the woman was bent upon disturbing the class by her actions, the teacher, so it is said, closed the window.

That affront was too much for the indignant mother and she returned home. After school had been dismissed Mr. Wright returned to his boarding house. He had not been there three men make fillings, commute payments, and transfer the land at once to a single owner or corporation. This well known procedure will doubtless be tried many times in the acquisition of water rights under the reclamation law. It is extremely difficult to distinguish between the bonafide and fictitious landowners, but if actual residence and cultivation of the soil is required for a long period, say five years, the total payment and passage of title to the use of the water are not made before the expiration of such period, it is probable that the abuse will be comparatively slight.

"The man who is actually living on or near an irrigated tract, and who is earning his subsistence from the soil, cannot object to the payments extending throughout a long period—even ten years. A man who is endeavoring to speculate in real estate cannot afford, usually, to wait several years for the completion of the title to his right to the water. This is very plainly intended to discriminate against speculation, and to insure to the benefit of the man who is making a permanent home."

DR. DALBY AT HOME.

His Condition is Improved After Arrival From California. Dr. W. T. Dalby, who has been dangerously sick in California, arrived in this city yesterday morning, accompanied by his wife and two doctors, who met him at Ogden Saturday night. The patient was taken directly to his home on Second South street, where he is under the care of several physicians.

CLOSING OF SALTIAIR.

Last Excursion of the Season Will be Today. The excursion season at Saltair will close tonight. Today there will be special attractions to visitors, and after tonight the resort will be closed until the opening of next season.

SPRAINS.

S. A. Road, Cisco, Tex., writes, March 11, 1901: "My wrist was sprained so badly by a fall that it was useless and after using several remedies that failed to give relief, used Ballard's Snow Liniment and was cured. I earnestly recommend it to anyone suffering from sprains." 25c, 50c, \$1.00. For sale at Z. C. M. I. Drug Dept.

At Mullett's.

Boys' suit sale for school opening. Three days, Thursday, Friday and Saturday, Sept. 10, 11 and 12, your choice at \$1.75. Regular price, \$2.50 to \$3.00. See show windows.

FOR BENEFIT OF REAL SETTLERS

Irrigation Law Gives Small Show to Land Grabbers.

LIMITATIONS OF THE ACT

OPINION OF CHIEF NEWELL ON THE SUBJECT.

(Special to The Herald.) Washington, Sept. 6.—A deal of diplomacy will have to be used by the officials of the interior department who are charged with carrying out the provisions of the national irrigation law when they come to constructing government works in localities where portions of the lands have already passed into private ownership. This fact is appreciated, as evidenced by statements contained in the first annual report of F. H. Newell, chief of the reclamation service, in the geological survey. On this subject, he says: "Recognizing the fact that there is scarcely a section of the country in the United States, even in the most sparsely settled regions of the west, where an irrigation project would involve the reclamation of lands in private ownership, all well as those belonging to the United States, the bill authorized the sale of the right to use water for land in private ownership, to be limited, however, to the amount required for a tract not exceeding 160 acres. Further provision is made upon this provision is that no such sale shall be made unless the landowner is an actual bonafide resident upon the land, or an occupant thereof, residing in the neighborhood. In this case, as in the case of one who takes up public land, the right to the use of water does not permanently attach until all payments required have been made.

Limited to 160 Acres. The provision of the law that no right to the use of water shall be sold for a tract exceeding 160 acres to any landowner, would clearly apply to the amounts purchased under different projects. That is to say, the owner of 160 acres of land, or more, cannot have lands irrigated in two or more different projects would be limited, in the total amount of water which he could purchase. This is plainly evident from the further provision in the same sentence of the act—the requirement that the landowner shall be a bonafide resident on the land, or an occupant thereof, residing in the neighborhood. It is accordingly does not contemplate the condition that a man residing in the neighborhood of one tract of land irrigated under the act may acquire water sufficient for 160 acres of land there and later change his residence so as to become qualified to acquire water for another 160 acres under a different project. Therefore the regulations on the subject of acquiring water would very properly include a provision to limit the amount of water sold under this act to that which is needed to irrigate 160 acres of land for any individual, and to exclude application under any other project after having acquired a right to use water to the extent indicated.

Stringent Regulations. "It is apparent," adds Mr. Newell, "that very carefully drawn stringent regulations must be enforced in order to bring about the obvious intent of the reclamation law. It was asserted by the opponents of the measure during its passage that vast areas of the public lands had already been acquired fraudulently, by violation of the homestead law, and that now the owners of these lands were making an effort to increase the value of the lands by inducing the government to provide water for them. This is recognized to be a real danger, and many persons who are possessed of areas of land of 1,000 acres or upward have acted as if they were endeavoring how to evade the provisions of the law limiting the area of the water rights to 160 acres. The most obvious method is that similar to the so-called dummy or hobo homestead, in which men make fillings, commute payments, and transfer the land at once to a single owner or corporation. This well known procedure will doubtless be tried many times in the acquisition of water rights under the reclamation law. It is extremely difficult to distinguish between the bonafide and fictitious landowners, but if actual residence and cultivation of the soil is required for a long period, say five years, the total payment and passage of title to the use of the water are not made before the expiration of such period, it is probable that the abuse will be comparatively slight.

"The man who is actually living on or near an irrigated tract, and who is earning his subsistence from the soil, cannot object to the payments extending throughout a long period—even ten years. A man who is endeavoring to speculate in real estate cannot afford, usually, to wait several years for the completion of the title to his right to the water. This is very plainly intended to discriminate against speculation, and to insure to the benefit of the man who is making a permanent home."

Even that did not daunt the mother. Finding that she could not talk to him through an open door, she took up her position at a window. This course she continued her interrupted discourse upon the cruelty of switching a little girl. Seeing that the woman was bent upon disturbing the class by her actions, the teacher, so it is said, closed the window.

That affront was too much for the indignant mother and she returned home. After school had been dismissed Mr. Wright returned to his boarding house. He had not been there three men make fillings, commute payments, and transfer the land at once to a single owner or corporation. This well known procedure will doubtless be tried many times in the acquisition of water rights under the reclamation law. It is extremely difficult to distinguish between the bonafide and fictitious landowners, but if actual residence and cultivation of the soil is required for a long period, say five years, the total payment and passage of title to the use of the water are not made before the expiration of such period, it is probable that the abuse will be comparatively slight.

ALL HALLOWS COLLEGE DEDICATED

The New All Hallows College.

THE new additions to All Hallows college were dedicated yesterday afternoon by the Rt. Rev. Bishop Scamlan. He was assisted by the local clergy. The ceremonies were both impressive and interesting. The dedication was held in the parlors of the college, Bishop Scamlan and his corps of co-workers graciously showing the many visitors through the new quarters of the educational institution. A luncheon was served in the private dining room to those who participated in an active way in the exercises, and at 6 o'clock a number of prominent citizens took dinner with the priests in charge of the college. The first number on the programme was a vocal solo by Professor Charles Kent. He sang "Ever More; Ever More." The piece was made especially attractive, not only because of the pleasing manner in which it was rendered, but because of the fact that the music was written by Dr. J. Lewis Brown, the well-known composer and musician, who recently visited Salt Lake City and gave an organ recital at the tabernacle. Professor Kent was accompanied by Professor J. J. McClellan on the organ, Professor Pedersen on the viola and Master Arthur Pedersen on the violin. Then came the impressive blessing ceremonies. They were performed by Bishop Scamlan, who followed closely the ritual of the Roman Catholic church. He was assisted by Rev. George Harding, Rev. J. Guinan, president of the college; Rev. M. J. Murphy, vice-president; Rev. T. Rosen, Rev. A. Chauve, Rev. N. Walter, Rev. Father Estes and Rev. Father Myers. The ceremonies lasted about twenty minutes, during which time Master Pedersen played "Andante Religioso" on the violin, with a suitable accompaniment. Gounod's "Ave Maria" was then sung by Miss Reni Pedersen in her usual pleasing manner, her sympathetic voice seldom being heard to better advantage than yesterday afternoon.

Then came the oration by Rev. George Harding. Appreciating the fact that there were many Protestants in the audience, the clergyman added to the interest of the occasion by minutely explaining the dedicatory exercises, dilating upon every phase of the ceremony. His explanation was so lucid that by the time he concluded that portion of his address his large and attentive audience was in a far better mood to understand and appreciate the various steps of the dedication.

Founding of the College. In a feeling manner, indicating his sympathy with the institution, Father Harding recounted how Bishop Scamlan had founded the college many years ago; how he had fostered it year by year, each semester seeing a decided increase enrollment and an awakened interest. As time progressed and the name and fame of the institution spread throughout this section of the west, the duties became so arduous that the bishop was finally forced to relinquish his superintendency and turn it over to the clergy which now has in charge the duties, and enter the college with the spirit and sentiment that actuated every move of the bishop, and under their management the school has attained the reputation which it now bears in the intermountain region of the far west.

The aims and objects of the college were the closing theme of the address. He said the motto of the college is to educate the mind and make more sympathetic the heart. The first principles of patriotism, fidelity to the flag and loyalty to the country, are instilled in the hearts and minds of the boys. And at the same time the moral and religious temperament of the students is carefully guarded that they may, when they leave the school, and enter the activities of life, be men of chastity and respectability.

Blessing by the Bishop. Those present then joined in singing the hymn "Holy God, We Praise Thy Name." That was followed by a selection by a sextet, composed of Mrs. Browning, Miss Pedersen, Miss Peterson, Professor Kent, Professor Pea-
