

NORTH END OF TINTIC'S CAMP Promising Section That Will Make Producers This Year.

YAMPA SMELTER OPERATING OHIO COMPANY'S MILL READY FOR ORE.

"Much interest now centers in the mining ground directly north of Eureka," said a well known Tintic man yesterday, "for in view of recent developments there and the possibilities presented to intelligent and conservative operators, these can hardly be any doubt that the north end, as it is called, will yet receive the attention it merits and add another producing section to the great ore channel upon which are located such great mines as the Central-Eureka and the Gemini properties."

"The Gemini is acknowledged to be the peer of any in the list of silver-lead producers of the state, and now that the Tintic is being developed, it is sending out a vast amount of high grade ore which will easily make it possible to hold that reputation for an indefinite time and pay handsome dividends to its small owners."

"Among the properties which will merit attention the present year in connection with the north end may be mentioned such ground as the Sacramento Consolidated, the Black Warrior, the Dagmar-Northwest, the Dagmar, the North Gemini, the Yorkville, Fern, Jefferson, Brooklyn and Annie Laurik groups. At the last named property there is a fine showing of quartz in the shaft, and the Dagmar many indications are in evidence that good results may be expected from that property in the cross-cutting now in progress."

"Directly east of the old Manhattan ground, a big ledge of hematite and soft vein material has been uncovered close to intrusive porphyry that gives value of 40 per cent iron, 33 in gold and two ounces silver. This ground has long been idle. The owners, Lee Hopper and Edward Pike of Eureka, Joseph Lippman of Salt Lake and Dr. W. R. Pike of St. George, are now planning a campaign of development."

LOON CREEK GOLD CAMP. Work at Lost Packer-Easterners Purchase Forty Claims.

While on his way to the Lost Packer company's mines at Loon creek, Idaho, the other day, Manager Czizek was interviewed by the Boise Statesman. The paper says:

"Mr. Czizek has not been at the mine for some time, having been east and in California. He is now on his way to the property and will spend some weeks there, while here he says that his reports from the mine were very satisfactory, but he preferred to verify the statements made to him before sending out the information in detail."

"In a general way, Mr. Czizek said an intermediate tunnel that has been run on the vein between Nos. 1 and 2 had opened a large body of ore. The superintendent reported that the body being twenty-two feet wide with a streak of rich ore three or four feet wide on the foot wall. The rest of the ore was reported as being of good grade."

"The intermediate tunnel has been run midway between the two other tunnels named. No. 2 is 200 feet, and the No. 1 is 100 feet. It has been continued during the winter and has reached a length of about 400 feet, ore showing all the way. When the last letter was written the superintendent reported that the plan of the company to put in a smelting plant this year. The theory was that they could purchase rich silver-lead ores from the Sheep mountain and secure a product by smelting the Lost Packer gold ore with them, that would bear transportation. The lead-silver ore have a value of some \$75 a ton. By running two tons of the second grade Lost Packer ore with one of the other, a product having a value of \$150 a ton or more would result. The first grade ore from the Lost Packer mine is shipped as it comes from the mine."

YAMPA SMELTER BLOWN IN. Ohio Company's Mill Waiting For Copper Belt to Haul Ore.

General Manager George H. Robinson of the Yampa smelter and the Ohio company's Yampa mine stated last evening that the smelting plant was placed in commission again Saturday afternoon, and when he left camp it was working very nicely. Mr. Robinson stated, also, that the Copper Belt had not begun hauling when he left, but he presumed trains would be running at right angles today. Millwright Benson, who came in from the Ohio company's Winnamac mill Saturday night, said the plant was ready to go into commission, but no ore could be delivered until the section from the Copper Belt had been laid. It was all ready for the rails and when he left camp the understanding was that a crew would be put to work connecting up yesterday. As the job will require but a day or two, he expected that the bins would be filled with ore in time for a start to be made Wednesday or Thursday next, at the latest."

TWO ANNUAL MEETINGS. Frisco Silver Queen and Golden Reef Elect New Officers.

Ephraim, Jan. 15.—Secretary John Durkin, Jr., attended a meeting of the Frisco Silver Queen Mining company at Richfield Wednesday. Officers were elected for the ensuing year as follows: Hans Taft of Monroe, president; J. A. Ross of Joseph, vice president; Simon T. Beck of Spring City, treasurer; John Durkin, Jr. of Ephraim, secretary. All of the above were re-elected. Simon T. Beck succeeds Otto Nielsen of Ephraim as treasurer. The annual meeting of the stockholders of the Golden Reef Mining company was held at Elsinore Tuesday. After the presentation of reports by officers, the old officers were re-elected as follows: D. W. Woodward, Elsinore, president; Thomas Foutin, Ephraim, vice president; H. N. Hayes, Richfield, secretary; J. H. Erickson, Richfield, treasurer. The above named officers with J. A. Ross of Joseph City constitute the board of directors.

COOPER CONSUMPTION. J. B. Haggis and Jesse Lewisohn Make Interesting Statements.

A New York publication quotes J. B. Haggis as saying: "I believe that the copper consumption of the United States is increasing at the rate of 10 per cent per year, and it is doubtful if the Peruvian copper mines will, I believe, give a good account of what work has been going on there."

Jesse Lewisohn said: "The domestic consumption of copper during the year was large. The consumption, I believe, has kept pace with the production, and the market is keeping pace with the supply. Within the last year the case in the copper trade in ten years."

"The outlook appears quite satisfactory, and while no prediction can be made as to the prices which will prevail for the metal for the current year, conditions warrant the statement that present prices will continue. The custom which formerly prevailed in the trade of buying large lots is being discontinued and smaller stocks are being carried."

GOLD IN GIZZARD. Idaho Duck Proves Means of Locating Rich Places.

By mere chance a discovery was made recently at the home of George T. Ostrom which may be of the greatest benefit to Emmett. A domestic duck had been presented to Mr. Ostrom, and in the cleaning of the gizzard two gold nuggets worth about 40 cents were discovered.

The duck was traced up and the farm from which it had been bought located. T. H. Wyzant took a pick and gold pan, and after considerable search found the source whence the ducks had been known to feed. In part of a day he had washed out over \$4 worth of gold dust.

The place where the gold was found is about three miles from Emmett, on the river. Nobody knows of its location except Mr. Wyzant, Mr. Ostrom and E. E. Forsyth, and they all expect to get rich. Mr. Wyzant says that the surrounding country looks very favorable for a placer mine opening.

RADIUM FROM PITCHBLEND. Tedious Process Necessary to Separate Radium Sulphate From Ore.

The separation of radium from pitchblende is a long and tedious process. The rare ore is first crushed and the powder is roasted with carbonate of soda. After washing, the residue is treated with dilute sulphuric acid, the sulphates being then converted into carbonates by boiling with strong carbonate of sodium. The radium sulphate, an exceedingly insoluble salt, is contained in the residue. The soluble sulphates are washed out, and from the residue hydrochloric acid dissolves out polonium, bismuth and other elements. Radium sulphate remains, with some barium sulphate. The sulphates are further purified and finally converted into chloride.

REGARDING COPPER SMELTING. Why Desulphurizing Roast Is Used Before Treatment in Blast.

In smelting copper sulphides the smelting is often preceded by a desulphurizing roast which burns off an excess of sulphur, leaving sufficient sulphur to give the matte a certain amount of sulphur. The matte is then roasted to a chloride of silver by adding chloride of sodium during the roasting process, this being one of the preparatory steps in the extraction process in which hypo-sulphite solutions are employed. In the chlorination process, wherein gold ores are treated in revolving barrels by chlorine gas, the chloride of gold, this operation is preceded by oxidizing roasting if the ores are refractory. This is done to eliminate such elements as sulphur, antimony and arsenic. The silver is then recovered by roasting in the presence of an abundance of air.

LEDGES CHANGE PLACES. Silver and Gold Veins in Idaho Mine Show Novel Freak of Nature.

The gold ledge in the Washington mine is now at the top of the silver ledge. At a depth of forty feet below the 400-foot level the two ledges come together. The silver ledge dips south at an angle of 45 degrees, and the gold ledge has a dip of only three feet in 100 feet, the strike of the Idaho City World.

TONOPAH RAILROAD. Material to Be Used in Construction Beginning to Arrive.

Material for the Tonopah railroad is beginning to arrive in carloads arriving on the local yesterday. There were six cars of rails and four cars of ties. Both the rails and the ties were for broad gauge. Four forty-ton locomotives have been ordered from the east, and a forty-ton locomotive has been purchased of the N. O. railroad for construction work, making a total of five. The new road will have. The latter will be brought into the Virginia & Truckee car shops in this city today or tomorrow for overhauling.

NEW BUREAU OF CORPORATIONS. Work Will Be Pushed by Secretary Cortelyou.

ALL THE DATA IS DESIRED. TRADE SECRETS WILL NOT BE DISCLOSED. (Special to The Herald.) Washington, D. C., Jan. 17.—There is evidence of serious purpose on the part of Secretary Cortelyou of the department of commerce and labor to push more actively than heretofore the work of the bureau of corporations, now making inquiries by this bureau which are necessary to reach that publicity of corporate affairs that the law contemplates is needed. Lack of adequate funds has hampered the work of the bureau, and Secretary Cortelyou has asked for a special appropriation for this work of \$30,000, to be included in the general deficiency bill. If there is opposition in congress to this item it will be interpreted as an effort through the influence of corporations doing interstate business to tie the hands of this bureau.

It is worth recalling that it is the duty of the bureau of corporations to investigate the business of all corporations engaged in interstate or foreign commerce. The data to be reported to the president, and such portions as he may direct are to be made public. The work of the bureau thus far has been largely legal and preliminary. Secretary Cortelyou says if proper means are made available the results will be far-reaching. In order that investigations already begun may be completed, a liberal addition to the present appropriation should be granted. Secretary Cortelyou also announces that the powers of the bureau will not be used to the injury of any legitimate enterprise. The publicity of the bureau is intended only to expose corporate privileges that breed unfair dealing, dishonesty and corruption. It is not designed to disclose trade secrets, the results of individual thrift and initiative to competitors or to invade any private rights.

No further legislation to regulate trusts will be asked from this congress by the secretary of the department of commerce and labor. It is felt that the efficacy of legislation granted by the last congress should be fairly tested, especially in the execution of the work begun by the bureau. The work of the bureau thus far has incurred no opposition. Its inquiries have met with prompt responses. But the inquiries have related only to the laws of the various states, methods of taxation, effect of industrial combinations upon prices and similar matters. It remains to be seen what the responses will be when the inquiries are pushed a degree further. But the officials of the department do not anticipate any serious trouble, and are of the opinion that all of the information desired will be forthcoming.

Yomei Cures Catarrh Without Dangerous Drugging of the Stomach. Not until Yomei was discovered it had been possible to truthfully say that a remedy for catarrh was known. This remedy is brought through the Yomei Inhaler for a few minutes four times a day, and during that time every particle of air taken into the passages and lungs is impregnated with the curative and health giving Yomei. It is the only treatment that cures catarrh. Stomach drugging often causes indigestion or brings on some other disease and never makes a permanent cure of catarrh. Yomei not only kills the germs in the throat and nose, but penetrates to the minutest air cells in the lungs and enters the blood with the oxygen, killing the germs in the blood. It frees the mucous membrane from poisonous microbes and gives perfect health. A complete outfit costs but \$1.00, and includes an inhaler, dropper and sufficient Yomei for several weeks treatment. E. C. Schramm has so much faith in the merit of Yomei that he agrees to return the money to any purchaser who may be dissatisfied. For sale by E. C. Schramm, druggist, corner Main and First South streets.

Double Track. The Chicago & Northwestern is the only line double tracked Missouri river to Chicago, and maintains the fastest service between Omaha and the city at the head of the lakes. In connection with the Union Pacific, three daily trains run through solid to Chicago. For information consult C. A. Walker, general agent, 200 South Main street, Salt Lake City.

Guine Little Liver Pills. Must Bear Signature of Dr. Wood.

Very small and as easy to take as sugar. FOR HEADACHE. FOR DIZZINESS. FOR BILIOUSNESS. FOR TORPID LIVER. FOR CONSTIPATION. FOR SALLOW SKIN. FOR THE COMPLEXION. Sixty Years' Experience of an Old Nurse. Mrs. Winslow's Soothing Syrup is the prescription of one of the best female physicians and nurses in the United States, and has been used for sixty years with never-failing success by millions of mothers for their children. During the process of teething its value is incalculable. It relieves the child from pain, cures colic, soothes the bowels and wind colic. By giving health to the child it rests the mother. Price 25 cents a bottle.

So Wholesome! So Bright! (both dishes and dietaries) when Pearline is used. That cloud on your china, glass and silverware after washing comes from the fact that you are using the wrong soap. Pearline is the only soap that cleanses, brightens and whiter. It is used by the highest class of housewives.

HELVETIA MILK CONDENSING CO. PRODUCED AND GUARANTEED BY THE. Lowest prices in the city. I have a reputation for expert watch and jewelry repairing.

BEAVEN & MURRY TRIO OF Osteopaths. 302 Auerbach Building, Office Tel. 112-V. Res. 4124-Z.

Economy Brand Evaporated Cream. goes farthest, because it is most concentrated; is most nourishing; because richest in cream; most palatable; because most skillfully prepared. Its purity is guaranteed under forfeit of \$5,000 to anyone able to prove any adulteration in our product.

MULLER'S BLEND. The money you pay for is not lost—not even spent—for you can always have it returned if the flour don't suit you.

NEW BUREAU OF CORPORATIONS. Work Will Be Pushed by Secretary Cortelyou.

Notice of Sale. ESTATE OF VICTORIA S. HILLIER. The undersigned will sell at private sale all the interest in the Victoria S. Hillier had at the time of her death, or which her estate has since acquired, in and to an undivided one-third part interest of this part of lot 8 in block 54, of plat "A," Salt Lake City survey; commencing northeast corner said lot 8 and running west by road; thence south 9 rods; thence east 1/2 rod and thence by lot 8 to the place of beginning, lying in Salt Lake City, Salt Lake County, Utah, on or after the 25th day of January, 1904, and written bids will be received at 23 Commercial block, Salt Lake City, Utah, terms of sale, as per advertisement, and the balance upon confirmation of the sale. JOHN R. HILLIER, Administrator. Dated Jan. 15, 1904.

OSBORNE MINING & MILLING COMPANY. Principal place of business, Salt Lake City. Location of mines, Park Valley. Notice is hereby given that Park Valley Mining & Milling company, held on the 22nd day of December, 1903, assessment No. 1, of one-eighth (1/8) cent per share was levied upon the capital stock of the corporation, issued and outstanding, payable immediately to the treasurer, at his office, 318 E. 10th South, Salt Lake City, Utah. Any stock upon which this assessment remains unpaid on Tuesday, the 23rd day of February, 1904, will be delinquent and unless payment is made before, or advertised for sale at public auction, and unless payment is made before, will be sold on the 23rd day of February, 1904, for the purpose of satisfying the assessment, together with the costs of advertising and expense of sale. E. W. MADSEN, Secretary. Dated Dec. 21, 1903.

"Let the GOLD DUST TWINS do your work"

The Gold Dust Twins will help you get through your work in a jiffy. The greatest cleanser in the world and the housewife's best friend is Gold Dust. It cleans everything from cellar to attic with less labor and in half the time of any other method. Nothing can take its place, because no other washing powder is so good. OTHER GENERAL: Scrubbing floors, washing clothes and dishes, cleaning wood-work, glass, silverware and tinware, polishing brass work, cleaning bath room, pipes, etc., and making the finest soft soap. Made by THE N. K. FAIRBANK COMPANY, Chicago—Makers of FAIRY SOAP. GOLD DUST makes hard water soft.

FARMINGTON CONSOLIDATED OIL AND GAS COMPANY. A LIMITED NUMBER OF SHARES OF THE

Of a par value of a dollar, are offered for sale at ten cents a share. This offer is made with the understanding that it may be recalled without notice, and that in case of the failure of the Guffey and Galey development work the investment is worthless. The directors feel, however, that the offer should prove attractive to any one who anticipates, as they confidently do, a discovery of oil, and who desires to share in the advantages arising from the choicest holdings and a strong organization. They base their confidence on these facts: Mr. Galey of Pittsburg, the most experienced oil man in the country, said the Farmington district showed the best oil indications he had ever seen, and Guffey and Galey had backed up this opinion by appropriating thousands of dollars for development work. Mr. Rumbaugh, superintendent for Guffey and Galey, says he is certain of striking oil and gas, and has backed up his opinion by subscribing for stock in this company. Subscriptions should be sent and checks made payable to Hugh Satterlee, trustee, 88 Commercial block.

OFFICERS AND DIRECTORS. PRESIDENT—S. V. SHELF, General Manager, Walker Bros. Dry Goods Company. VICE PRESIDENT—C. K. ROWLAND, Mining and Oil Expert. SECRETARY—HUGH SATTERLEE, Assistant Treasurer Stromberg-Carlson Tel. Manufacturing Company. TREASURER—FRANK KNOX, President National Bank of the Republic. George T. Odell, General Manager Consolidated Wagon & Machine Company; Elmer B. Jones, Managing Director Utah Independent Telephone Company; Dr. Alexander C. Erving.

Dr. J. B. KEYSOR DENTAL PARLORS. 30 S. Main St. Over Davis' Shoe Store. Fifteen years' continuous practice in Salt Lake City. Good Set of Teeth for \$5.00. Amalgam or Silver Filling \$1.00 and up. Teeth cleaned \$1.00 and up. Gold crown \$5.00. Bridge work per tooth \$5.00. Crown and Bridge Work a Specialty. Office open Sunday from 10 a. m. to 3 p. m. Phone 1430-Z.

R. G. DUN & CO. GEORGE RUST, General Manager, Utah, Idaho and Wyoming, Offices in Progress building, Salt Lake City.

Exhibition Bull Fight. Postponed Till Jan. 23. Saturday afternoon at 2 p. m. at Salt Palace bicycle track. SENOR ENRIQUE ROBLES. MADRID, SPAIN. The world's champion bull fighter, assisted by his renowned company of fearless riders, broncho riding, lariats throwing, bull riding and bull fighting. Exhibition to be purely scientific. No animals injured. Instructional treat to those who have not seen this important sporting event. Admission, 50c. Reserved Seats, \$1.00. Railroad excursions from all points.

THE DESERT SAVINGS BANK. DIRECTORS: W. W. Riser, President, Moses Thatcher, Vice President, Elias Cleghorn, Cashier, James Sharp, John R. Barnes, John C. Cutler, David Eccles, A. W. Carlson, George Kounany, John R. Winder, Louis Spool, E. R. Ludrige, W. S. James. Four per cent interest paid on savings deposits. Capital paid in, \$200,000. General Banking in All Its Branches. Directors—J. E. Cosgriff, John J. Ditty, C. J. Salisbury, Myron C. Fox, J. E. Cosgriff, W. P. Noble, George M. Downey, John Donnellan, A. F. Holden. Office, 409 McCornick block.

Delinquent Notice. DEXTER-TUSCARORA CONSOLIDATED Gold Mines company, principal office, 409 McCornick block, Salt Lake City, Utah. Notice.—There are delinquent upon the following described stock, as per account of assessment No. 1, levied on the 15th day of November, 1903, the several amounts set opposite the names of the respective delinquents, as follows: Cert.
