ACORN RANGES. Are in a class by themselves, when it comes to the points of cooking, baking, cleanliness and fuel economy. Their superior construction embraces many important features not found in any other make. The Greatest accomplishment of Modern Range Building is the Acorn Hot Blast Fire Box.

As indicated in the above illustration, the Acorn Hot Blast fire box, passes a current of intensely heated air over the surface of the fire, causing the combustion of gasses and heavy smoke which ordinarily escape unburned, filling the chimney with soot and wasting fuel. It insures economy of fuel and satisfactory results in baking. It is found only in Acorn Ranges. Be sure you get a copy of Mrs. Rorer's book; Kitchen Economy given to every lady visiting our store next week.
