they have an excellent showing. Samples have been taken of the ore that assays as high as 60 per cent lead, besides zinc and silver.

It is the intention to sink to a depth of fifty feet and then crescent to ascertain the extent of the ledge, only one wall of which has yet been encountered. Associated with Mr. Daugherty in the ownership of the property are J. R. Rickards and Will Stevens, both of this city. Mr. Daugherty is a prominent man of extensive experience, and he holds to the opinion that this is the making of one of the biggest and best mines in the state.

MINING STOCK EXCHANGE.

Week Opens With Most of the Big Guns Participating—Wabash Up.

The week opened on the mining exchange yesterday with the sale of 15,507 shares of Bullion Canyon property, which was confined largely to the higher priced shares of the ordinary.

Wabash spring a surprise on the talent, which has been kept rather in the background. The stock was quoted at \$1.85 bid, \$2 asked, Saturday the best offer was \$1.95 and the ask was \$2.00. The price advanced to \$2.20 yesterday was stepped up and later to \$2.40. The closing price of the shares was \$2.45. It looked as though there was a market for about 100 shares.

During the week several important transactions have been recorded. L. W. Cavanaugh gave an option to Los Angeles men on the White Rock group. The property has been taken to a depth of fifty feet on the seven-foot vein, from which assays of \$50 a ton have been secured.

Salt Lake men have also secured from Mr. Cavanaugh a lease and bond on the Bull's Eye group, in which some work has been done. The lessees are to start active operations on the property within the next few days and as was that with a very immense ledge, which is over 100 feet in width, great results are expected.

The discovery shaft of the property carrying values of \$12 to the ton and upwards. H. Sherman has given a lease and bond on the Red Star group to Andy Short. There is a twenty-foot shaft sunk on this property, with a drift of two feet, and the cutting the vein at the bottom of the shaft. The vein is over 200 feet wide, and from it some sensational values have been taken. Assays ranging from \$50 up to several thousands have been taken.

The owners of the Lucky Dutchman have already got a tunnel into their mountain of Bull's Eye, which is over 200 feet and, as one of them put it, they do not need an assayer when they can see the gold. They are taking out 200 feet of a ledge, and so far they are convinced that the whole vein of rock ledge carries as good values as it does every other vein. Their efforts are being made with the belief that the values increase with depth, and other who have seen the property say that, "there is nothing nothing in the world like this."

"Scotty" Price bought in some rock yesterday from which he was morning and working out the best quality of gold to edify his friends. Mr. Price says he has five claims located northward of the city, and is working in sight to make twenty millionaires in a short time and, judging from the amount of gold he has extracted from a small piece of rock, all he needs to finish the performance were willing to take him at his word.

Andrew Short located a group of claims a few miles east of a ledge he discovered about two and one-half miles north of town. The ledge is about fifty feet wide and carries values, as shown by the assays, returns of 50 per cent lead, 25 ounces silver and \$75 in gold. Mr. Short's friends are consulting him on the strength of his good fortune.

Henry Delmers today located a claim about one-half mile south-east of town, on which he found a cropping of ore about three feet wide which, he thinks, will pay to work from the grass roots. The vein matter carries galena and silver, as well as gold. He is already making arrangements to sink a shaft on the property.

Operators Flocking In. The number and quality of the discoveries that have been made here during the past ten days have fully demonstrated the fact that within a short time Crescent will be counted among the largest mining centers in the west. Mining men of means are already here, close upon the heels of the prospector, and before another week we expect to have some of the most very important developments. The prediction is ventured that Crescent will be the most important camp between Los Angeles and Salt Lake, and that the daily output of ore from which will furnish a new source of revenue to the smelter, and thus give and furnish employment to a host of men.

HARDINGER ANNUAL MEETING.

Company Will Resume Work at Park Valley Property.

The annual meeting of the Hardinger Gold Mining & Milling company, which owns a valuable group of claims in the Park Valley district, was held yesterday afternoon at the city hall.

It is the calculation to begin work at the property again in the near future. Last year a shaft was sunk to a depth of 100 feet and this year it is the purpose to do some more extensive work. Four streaks of ore that were developed by the shaft. Good assays were obtained from the whole would probably not exceed \$5 per ton.

It is realized that depth is what is needed in the Park valley and President Olsen states that some day the camp will boom.

WATCHING IRON COUNTY MINE.

Senator Kearns' Representative Gets Frequent Samples.

William Daugherty came in from Glendale canyon a few days since and spent the fourth in town. He has been engaged in the development of his mining property at that place. A shaft has been sunk a little better than thirty feet, and Mr. Daugherty says

lately on Amalgamated Copper and the traders bought considerable stock. The price in Salt Lake is being received again. We hear talk of considerably higher prices in United Copper's quotations:

Mammoth's Pumping Plant to Start Up at That Time.

Superintendent Samuel McIntyre, Jr., of the Mammoth Mining company's property, returned yesterday night after a day night after visiting the company's pumping station at Cherry Creek, where the new pump was being installed.

The telephone in the general office of the company is being practically installed, that all that remained to be done was to connect up with the boiler house, and while the air was being forwarded. He authorized the secretary of the company to say that water would be flowing as usual by Thursday morning.

As soon as the new pump is connected up and the commission repairs on the boiler are completed, a new lead fireproof building is to be erected, so that it will be pretty hard for fire to get in its way again.

Mining Notes.

The recent assessment on Star Consolidated will be delinquent Saturday. Sale day is set for August 8.

Manager C. L. Ross, of the Ontario, accompanied by Mrs. Ross, left for a trip to the mine this morning. He will be away for a week.

Twelve carloads of ore from Tintic, two from Nevada, two from Idaho and one from Arizona, will be ready by Saturday. The directors of the May Day company have been called to meet at 2 o'clock this afternoon at the city hall.

Colonel John Weir, president of the Nevada Utah company, called the day of the past week, after having taken a hand in getting things moving at a camp in the fall. Mr. Weir says, before the company is ready to start work, he is inaugurated. All that is or can be done at the present time is to clean up and get the mines in shape for the new work.

M. M. Johnson, chief engineer of the Newhouse staff, returned from his east trip yesterday morning. He will visit Bingham and a day or two later leave for the mine at Tintic.

HEAVY SELLING TO TAKE PROFITS.

Stop Put to Rise of Species in Wall Street.

DECLINE SEEMS PROBABLE.

SPECULATORS WISH TO BUY IN CHEAP AFTER UNLOADING.

New York, July 10.—The selling to take profits on the opening use in part of stock today, in the face of such character as to cause a pause in the process of taking profits in a particular instance has been completed, leaving a heavy stock of speculative orders, and fostering a further advance and favorably disposed to operate for a decline, cheaply a view to getting back holdings.

It was broadly asserted today that information had been received that the present dividend rate on Union Pacific for the next period instead of increasing to 4 1/2 per cent, would be 4 per cent, and that stock allowed it to be understood that they were selling their holdings, and transferring their interest to portions of the industrial list. There is no one factor on the part of the present speculative confidence so greatly as an increase in dividend rates on a number of stocks which have been made active. Today's assertions were that the market was not so strong as it had been, and that the iron and steel industry, Amalgamated Copper and the Eries seemed to be the mainstay of the market.

The London market was not so strong as it had been, and that the iron and steel industry, Amalgamated Copper and the Eries seemed to be the mainstay of the market.

Money, Silver, Etc.

New York, July 10.—Money on call steady at 100. Time loans firm, 60 days 3 per cent, 90 days 3 1/2 per cent, 6 months 4 1/2 per cent, 1 year 5 per cent.

Treasury Statement.

Washington, July 10.—Today's treasury statement shows available balances cash, \$129,110,520. Gold, \$129,110,520.

Metal Market.

New York, July 10.—There was a strong advance in the London tin market with spot closing at \$215.50, and futures at \$216.25. The local market, while quiet, showed a tendency to rise.

There was quite an active demand for time loans carrying over the end of the year. The opening of subscriptions on Wednesday to the \$50,000,000 Japanese loan apportionment and the return of government deposits set for Saturday next were also subjects for no consideration in the money market. It is expected that both of these factors will operate in the first place to meet the demand here from other points to the requirements. Only about per cent of the government deposits set for Saturday with applications, but it is evident that the loan will be largely over-subscribed.
