

STREET GRADE FIGHT IS BITTER

Col. E. A. Wall Fires a Broadside at Engineering Department. Gives Copies of Letters Attacks the "Established Grade" Idea.

Another installment of the controversy between Colonel E. A. Wall, chairman of the board of public works, and City Engineer George W. Ritter over the Brigham street grades was laid before the city council last evening in the form of a communication from Colonel Wall.

Col. Wall's communication was addressed to the city engineer, and was accompanied by a copy of a letter from the city engineer to the city council, dated July 12, 1905, in which the city engineer stated that he had no objection to the proposed grades for the street.

Col. Wall's communication is a reply to the city engineer's letter, and in it he states that he is unable to accept the proposed grades for the street, and that he will continue to fight for the "established grade" until it is adopted.

Col. Wall's communication is a long and detailed one, and in it he sets forth his reasons for opposing the proposed grades. He states that the proposed grades are not in accordance with the original plan for the street, and that they will result in a loss of property value to the owners of the property on the street.

Col. Wall's communication is a very strong one, and in it he states that he will continue to fight for the "established grade" until it is adopted. He states that he will not be deterred by any opposition, and that he will continue to fight until the city council has adopted the "established grade" for the street.
