PUNISH THE "MASHER."
Magistrate Steinert of New York is a
man who believes the despicable male
type known as "masher" should be
punished. The other day Benjamin F.
Smith of St. Louis attempted to engage
in conversation with a woman who re-
sented his attentions by calling a police-
man and having him arrested.

A FRENCHMAN'S VIEW.
A French writer recently asked Tol-
stol if he did not think Americans did
not deserve to be held up to scorn as
the least worthy of all the nations. Un-
prepared to commit himself, Tolstol an-
swered the question by asking again:
He wanted to know why. He was told:
"Because the Americans are a people
terribly practical, avid of pleasure,
systematically hostile to all idealism.

NEWSPAPER READING.
An English court has just gone on
record as saying that a building used
for newspaper files in connection with
a public library is not exempt from
taxation under the law which exempts
educational institutions generally. Said
the court: "Even if the library corpora-
tion was a society instituted for
purposes of science, literature or fine
arts exclusively, that would not cover
an institution for the acquisition of
knowledge from newspapers."

THE GOOD CITIZEN, THE USEFUL CITIZEN, IS
THE MAN THAT KEEPS ABREAST OF THE
TIMES. HE KNOWS WHAT IS GOING ON IN
HIS OWN COUNTRY AND SOMETHING OF WHAT
IS GOING ON IN OTHER COUNTRIES. NO MAN
CAN BE USEFUL WHO DOESN'T KNOW FROM
DAY TO DAY THE HAPPENINGS OF THE
PASSING DAYS. AND THE ONLY WAY FOR HIM
TO FIND OUT IS TO READ THE NEWSPAPERS. HE
DOES NOT, INDEED, HE SHOULD NOT, READ
NEWSPAPERS ONLY. HIS NEWSPAPER READING
SHOULD BE SUPPLEMENTED BY OTHER
READING.

IMPURE FOOD.
The New Hampshire state board of
health has just published a bulletin
showing the results of recent analyses
of food products. If the report is ac-
curate, and we presume it is the result
of scientific study and work, the people
of New Hampshire will be reduced to
a diet of condensed milk, molasses
and spices. Out of eight specimens of
condensed milk examined all were
found to be pure. The same thing is
true of twenty-one specimens of spices.
Sixty-two samples of molasses were in-
spected and fifty-five found to be pure.
