BLAIR MINES

Grand Central, Victoria and Mountain View to Make Distribution Next Monday.

UNITED STATES' NEW CO. BLAIR MINES IN NEVADA SELL FOR \$750,000.

Three Tintic mines came to the front with dividends yesterday. The Grand Central directors posted one for \$12,500, or 5 cents a share; the Victoria decided to pay \$7,500, or 2 cents a share, and the Mountain View ordered a distribution of \$3,487.57, or 2 1/2 cents a share.

The old Blair mines here almost as famous in the early days of Nevada mining as the Comstock. They have a record of about \$7,000,000 in production and are credited with having paid more than \$3,000,000 in dividends.

The Blair estate has been all the time held by the John R. Blair estate of New York, so that feature of the deal is no secret.

On what it will earn this year, but on extensive and valuable ore developments and plans for a very great increase in production. It will be recalled that the company recently raised something over a million dollars to be used for developments, equipment and the purchase of a large mill plant.

United States Mining stock is advancing on the report that a new company will be organized to take over the \$10,000,000 of new money will be raised to buy other properties and build two additional underground mill plants.

Utah Apex is selling high, on what it has so far developed. Its property is a large prospect, however, with great possibilities.

Utah Consolidated is fulfilling its repeated promise to sell the west and west are buying it. A good deal of Aracanda is being swapped for Utah in the market.

MINING STOCK EXCHANGE.

Several Stocks Showed Advances and the List Generally Is Strong.

Ajax, Carissa, May Day and New York Bonanza were all stronger on the mining exchange yesterday and the rest of the list held its own. Trading was quite lively, as indicated in the transfer of \$2,000,000 worth of stock for \$25,000,000.

Little Bell did business between \$4.55 and \$4.85, the final cash sales being at about \$4.85. Daily-Judge sold at \$7.50, and Beck Tunnel held around the \$7.00 mark.

Utah Apex is selling high, on what it has so far developed. Its property is a large prospect, however, with great possibilities.

STOCK MARKET NOT SO LIVELY

Keeping Prices From Getting Too High.

SPURT AT THE BEGINNING REALIZING LATER WITH THE USUAL RESULTS.

New York, Jan. 10.—There was a further contraction in the activity of the dealings in stocks today, and the disposition to take profits was even more clearly manifested than yesterday. The market was generally strong, and a very orderly and systematic manner and without creating any serious disturbance of values.

The principal influence in today's market was the response to the decided relaxation abroad. Discounts eased in London, Paris and Berlin, and the change moved up briskly in Paris. This operated to prevent the expected profit on an engagement of New York for export to Paris, in spite of the further rise in foreign exchange in New York.

Another item in the situation was the recovery in the price of silver to the level of 60 cents, after a previous decline to 55 cents. This was a striking demonstration of the continued power of the organized speculation to sustain prices.

Two cars of ore from Tintic, two from Bingham and one from Alta were reported at the Pioneer sampler yesterday morning. The silver king's regular monthly dividend of \$100,000 went to the shareholders in that famous bonanza yesterday.

The silver king's regular monthly dividend of \$100,000 went to the shareholders in that famous bonanza yesterday. He stated that he was carrying through the three cars of ore from Tintic, four from Nevada and two from Bingham.

Kingman Miner-Colonel H. G. Herffron of the Silver King company, who came down from the Park to attend the meeting of directors at which the \$2 assessment was returned to camp yesterday morning.

Manager M. J. McGill of the New York Bonanza, who came down from the Park to attend the meeting of directors at which the \$2 assessment was returned to camp yesterday morning.

During the next two or three days the engineer selected by the Buckhorn Ore company to handle the properties will arrive and take charge of the work that has been so splendidly looked after temporarily by Engineer E. P. Jennings.

There was no news to account for the day's movements of prices. The selling to realize profits was more pronounced in the fixed plan of operation entered upon in the early stages of the movement by the speculative combination.
