

Mines and Mining Stocks

ENGLISH MONEY IN POCHE DEAL

Representative of Cerebos Company Joins A. W. Scott in Purchase of Silver Discovery Ground.

NO COLUMBUS CON. OPTION MANAGEMENT CAN'T ACCOUNT FOR JUMP IN STOCK.

A. W. Scott, the Pioche mining man who snapped up the Whipple discovery twenty-five miles north of Pioche the other day, came up from camp yesterday morning. At Caliente he parted company with Edward Thompson, an English representative of the Cerebos company (limited) of Newcastle-on-Tyne, who joined him in the purchase of the claims, for which \$9,750 spot cash was paid. Mr. Thompson is interested in other propositions in the Pioche region with Mr. Scott and, when he left for Los Angeles, he expressed himself as being much more satisfied with what he had accomplished during his short stay in the camp, and he promised to return at an early date.

I believe that we have one of the biggest things found in that country during the last twenty years," said Mr. Scott. "Here is a specimen of the rich ore that makes in the vein. Rock like this," and he exhibited a piece of ore that was filled with horn silver—what assay over \$2,000 a ton. There is a streak of it five or six inches thick on the hanging wall side of the vein, while at no place where the ledge has been cut it is possible to take a sample that will not show 140 ounces of silver up."

Mr. Scott says that he is in the market for a developed mine, and if anybody has something in that line that is worth while, he can do business with them. He can be reached at Pioche all the time.

GOLDFIELD'S LATEST STRIKES.

One on Combination and Another in Old Kaintuck Territory.

(Special to The Herald.)

Goldfield, Nev., March 10.—The strike on the north end line of the Combination by Lessee Kendrick, Ish and Sheets is one of the most important events of the year in this district. The ore was struck in a shaft at depth of forty feet and has been sunk into for a depth of fifty-five feet. No foot or hanging wall has yet been encountered. It is the intention to encroachment at sixty feet.

The miners figure that the vein comes direct from the main shaft of the Combination, one-eighth of a mile away. If it continues beyond the present point of discovery it will go through Mohawk ground and into Columbia mountain. The apex has been located forty feet to the west of the shaft. It would therefore seem that the vein has a dip to the east and into Mohawk ground, although on this theory Silver Pick will enjoy the apex.

The lease on this block of Combination ground has eleven months to run. W. H. Rely, who made the great fortune in a lease on the Florence at the other end of the Combination estate states that this latest strike looks much better to him than did his own. The Monnet lease on the Mohawk already has some ore and is sacking.

A strike is reported on the Old Kaintuck ground immediately east of the Diamond claim of the Lone Star company. This is what sent Lone Star stock up today. Three hundred thousand shares of all stocks were traded in on local exchange yesterday.

COLUMBUS CON. HAS BOOM.

Stock Jumps Up \$1 Almost in a Day—No Option on the Property.

Manager Tony Jacobson of the Columbus Consolidated disclaimed having any knowledge of the reason why stock in the company had advanced \$1 a share almost within a day, when seen yesterday afternoon.

"No," said Mr. Jacobson, "there is no option out on the control of the property that I know anything about and there has been no developments at the mine out of the ordinary for some time. Conditions are improving, of course, because we are opening up more stopeing ground all the time. The shaft is now down fifty feet or more below the 200-foot level under the tunnel, and by the end of the month we expect to have got down to the 300. By the time we reach there I believe we shall have opened the ore bodies in the shaft, as the ledge is pitching toward it. On the 200 we had to cross-cut twenty-five feet to get the ore and, if the dip holds true, the shaft should be in the vein at just about the 300-foot level."

TWO DIVIDENDS POSTED.

Grand Central and Victoria Both to the Front.

(Special to The Herald.)

Provo, March 10.—The directors of the Grand Central and the Victoria Mining companies met here today and posted the regular monthly dividends. The Grand Central will pay 5 cents a share, \$12,500, and the Victoria 4 cents a share, \$10,000. The books will close at noon March 12 and the dividends will be paid March 15. Reports from both properties continue to be encouraging and it is believed continued and possibly increased dividends.

AT BINGHAM MINES.

Boston Con. Puts in Heavy Rail—Adie Company Resumes.

The Boston Con. mine was closed down the first part of the month for a few days to enable the workmen to change the tracks in the main tunnel. The rail heretofore used weighed twelve pounds, and it was thought necessary to install twenty-pound rails for the main tunnel. The change has proven satisfactory and will eliminate much trouble which was experienced with the light rail formerly used, says the Bingham Bulletin.

fall of snow which completely tied up the work. As soon as the snow melts the grading will be rushed rapidly. A couple of hundred graders will be put to work and it is hoped that the road will be ready in a couple of months.

The Adie Mining company, the properties of which are situated in Cottonwood gulch, is busy beginning operations on the property. A. L. Woodhouse and A. L. Heaston, joint owners in the company, started work about two weeks ago. As soon as the weather is busy engaged in grading out the property in preparation for a hoist which the owners intend to install as soon as the elements will permit. An electric line is being strung to the property by the Telephone Power company which will operate the hoist and also furnish light for the mine.

There has been sunk to the depth of over 100 feet and the grade of ore found exceeded the anticipations of the owners. As soon as the weather will permit, ore will be shipped, and the mine owners expect to mine much copper this year.

COPPER ORE FOR JEWELRY.

Mason Valley Rock Sells at 25c to \$1 a Pound on the Coast.

Copper ore from the Mason Valley district, Esmeralda county, Nevada, is not only eagerly sought by the smelting companies, but much of the auriferous malachite finds ready sale at high prices to manufacturing jewelers, as shown by the following from the Yerrington Times:

"The shipments made to the smelters last month are estimated to have netted the company in the neighborhood of \$25,000. The lower grade ore, containing the greatest amount of fluxing material, is going to the Tacoma smelter, which the lower grade ore is being taken by the Peyton Chemical company of San Francisco, for the manufacture of acids, blue-stone, etc."

Tonopah-Goldfield Stocks.

James A. Pollock & Co. furnish the following as the closing quotations on the local exchange yesterday over their private wire:

	Bid.	Asked.

Green Gold	5.25	5.75

MINING STOCK EXCHANGE.

Good Business and Strong Market Record of Week.

The week on the mining stock exchange has been one of good business and advancing prices. During the six days a total of 37,734 shares of stock, with a selling value of \$17,556.42, changed hands. As indicated in the total, the lower priced stocks had the call, but for all that some business was done in the list that sells from \$1 a share up, and the prices in these were just as strong as in the ranks of the little fellows. During yesterday's single regular and open board calls a total of 24,850 shares of stock sold for \$2,897.75.

At \$0.94 to \$1.10 Daly-Judge is about 50c a share higher than it was one week ago. Grand Central, at \$3.80 is up 30c. Victoria has advanced from \$2.74 to \$2.82 1/2. Little Bell is bringing 10c a share more than it was a week back, while Columbus Con. has shot up close to \$1 a share, closing sales being made at \$5.36. Wash, which was selling a week ago at \$0.90, is now bringing \$1.08, after having

been several cents higher than that. Beck Tunnel is another stock that seems destined to step over the \$1 mark before long. During the last week it has moved steadily up the line from \$0.20 to \$0.40. Ajax is a trifle higher at \$2; Bullfrog-Liberal is up 1/4c at 17 1/2c, and May Day shows a gain of approximately 1/4c a share. New York, Star Consolidated and Uncle Sam have not been particularly strong, but there has been nothing of a discouraging nature heard from any of the mines.

Following is the list of final quotations and record of sales made:

	Bid.	Asked.
Albion	.50	.50
Alice	3.50	4.50
