

DEEP CREEK IS FULL OF LIFE

Many Companies Rushing Work While Claim Owners Hurry Up Development.

REGION RICH IN MINERAL MUCH MACHINERY TO GO IN THIS YEAR.

Clifton, Deep Creek, March 22.—The Western Utah Copper company, controlled by P. Augustus Heinz and others, under the management of H. H. Green, is pushing development work as rapidly as possible and the showing is better with every shot. The company has two gasoline hoists in commission, one on the apex of the mountain and one lower down the mountain side, where they have attained a depth of 500 feet. At the 400-foot level they cross-cut and tapped a fine body of rich copper ore, carrying good values in gold and silver, and will run another cross-cut at the 600 level. Superintendent J. A. MacVicar is kept busy early and late directing work and is making a mine, if it cannot already be classed as such. No one excepting those who have seen it can realize the amount of rich copper ore already blocked out from the surface to the 400-foot level. The company will use machine drills very soon.

Rich Ore in Red Copper Queen. About one mile north of the Western Utah Copper comes the Red Copper Queen Mining company's group of seven claims. Ed Simons is president and J. H. Smith is general manager. The stock is owned principally by Spanish Fork parties. The property lies in the low foothills and considerable work has been done for which the company has several cars of ore on the dump. Assays show 35 per cent copper, from 20 to 22 per cent silver, and 10 per cent iron to the ton. Superintendent J. V. Lewis has started a double compartment shaft below the ledge, which is now down to a depth of seventy feet. He will run a cross-cut from the 100-foot level to tap the ledge and connect with the main shaft. Adjoining this property comes the Gold Hill Extension Mining company's ground, owned by C. E. Crandall, E. Corbier and others of Provo. The company is working a force of men and the property is giving a good account of itself. The principal ores are copper, carrying good gold values.

Western Pacific's Development. East and adjoining the Western Utah Copper comes the Western Pacific Mining & Development company, a new corporation, headed by such men as E. J. Yard, H. H. Green, John H. McChrystal and others. They are pushing development work with all possible speed, under the direction of W. P. Richards, who is also a heavy stockholder. The company is erecting a new building and will build a boarding house, bunk house, blacksmith shop, assay office, etc., as soon as material can be brought in. They will also install a fifteen-horsepower gasoline engine on the double compartment shaft they are now sinking. There are seventeen claims in this group, all surveyed for a patent, and Mr. Richards has a large force at work developing the patent.

Robisons Have Fine Ground. On the southeast side of the mountain, at the southern end of the district, Proctor H. Robison is superintending the development of a group of six claims bearing high grade copper and gold ores. There are numerous workings on the surface, all showing values of from 10 to 15 per cent. At a depth of seventy-five feet a drift is being run on the vein, which shows three feet of copper ore, carrying 20 per cent silver, also good gold values, besides about three feet of low grade iron. It is Mr. Robison's intention to continue sinking, having recently installed a windmill, and will later put a gasoline hoist on the ground. The company will erect buildings this spring and have everything in good shape for the summer campaign. Dr. George E. Robison of Provo, Almon Robison and J. V. Bolter are interested in the property, which is certainly showing up well and has all the earmarks of being a big mine in a contact between porphyry and lime.

On the north end of Dutch mountain, J. P. Gardner, president of the Gardner and Garrison Mining companies, has a force of men at work driving a cross-cut tunnel to intersect an immense copper body that is being cut by ledges of capped white iron. One of the good finds was made by Young brothers of Deep Creek, who uncovered a ledge of high grade copper twelve feet in width. The values increase with depth.

The prospectors have appointed Barney Heist as recorder of the district to avoid disputes between prospectors, and a petition has been forwarded to Elko asking that the appointment be ratified by the governor.

WHISKEY BARREL GROUP, ADJOINING DEMIJOHN, SOLD. Mrs. N. Donohue and her son Edward have recently disposed of their "Whiskey Barrel" group of claims to W. S. Anderson of this place and Thomas E. Baker of Macon, Georgia, for the consideration of \$5,000, says the Pioche Record. This group consists of the Whiskey Barrel and Whiskey Barrel Nos. 1 and 2, and is located in the Ely mining district, near the Half Moon and Janet Mining companies' claims. The Whiskey Barrel group, now owned by a corporation recently formed in Salt Lake, in which Joseph Eves and William R. Wallace are largely interested.

SPRING HOUSECLEANING. Is just the time for Globe-Wernicke sectional bookcases. They fit into new corners and make beautiful and inexpensive furniture. All woods and sizes in stock. The Bredren Office Supply Co., 40 West 2nd South St.

GORDON HITS IT AGAIN AT ROUND MOUNTAIN. That the judgment of Louis D. Gordon, president of the Round Mountain Homestake Mining company, was well founded in deciding to sink a working shaft at the point where it has been already demonstrated by developments of the past two days, says the Round Mountain Nugget. Only a few feet more of the ore-bearing free gold, were discovered in the bottom of the shaft, which is now at a depth of 83 feet. One stringer is seven inches wide and shows big colors. The second stringer also pans well and all indications in the shaft are the very best. The vein matter in the lead is a porphyritic quartz.

Mr. Gordon arrived in Round Mountain Thursday evening and expressed himself as well pleased with the showing made on the property. Mr. Gordon expects to remain in Round Mountain for some time, looking after his extensive property interests here. He will then return to Salt Lake, where he has formed a partnership in the brokerage business with H. Eason of that city. The Salt Lake firm will deal extensively in Nevada stocks.

COMPANY TO MINE IN MILLARD COUNTY. Provo, March 24.—Articles of incorporation of the Kent Mining company are being prepared. The capital stock is \$500,000 in shares of the par value of five cents each. W. S. Tanner, of Provo, is president, Joseph Yates, of Provo, vice president, and George Snell, Jr., of Payson, secretary and treasurer.

The company owns claims near Antelope Springs, in Millard county, near the line of the San Pedro railroad, and has a well defined vein of ore which carries values of \$2 1/2 a ton in gold and copper, 300 feet below the surface.

J. OBERDORFER, Stock Broker. Tel. Bell 792. 151 S. Main St. Union Assay Office. M. S. Hanauer, J. V. Sadler. 152 So. West Temple. P. O. box 1446.

district besides paper talk. H. H. Green is expected here about the 25th. Uncle Jesse Knight and son, Will, are due here April 1. They own considerable property here, being interested with the Miller brothers, Ned and Paul, of Provo in the claims owned by Charles Morford lying northeast of Gold Hill, and will no doubt do considerable work here this year. The high grade ore on other property in this district, which he may take up on his arrival here.

Doings at Ferber. In the Ferber (Nevada) district, adjoining the west end of the Clifton district, Lester Palmer, C. E. Johnson, George and Sid Knowlton are working steadily on their groups of high grade copper ores and all are meeting with success.

D. Packard of Springville and William Mammoth, have had a force of men working for the past four months on a group of claims located from Owen Sheridan, our Utah merchant. They have sunk a mine seventy-five feet, besides having made numerous surface openings. From the bottom of the mine they have drifted in all directions, showing a solid mass of rich copper ore, averaging \$12 per ton. Mr. Packard has gone to Salt Lake to purchase machinery, which will be used in the summer as rapidly as it can be pushed.

J. H. Raleigh and Albie Barker are prospecting in the district.

NEW TOWN OF COPPERFIELD. District Nine Miles East of Mina Enjoying a Boom.

F. Saville Smith, who returned this week from the new town of Copperfield, which is located near the southern Pacific road, about seven miles east of Mina, states that his company has decided to call the new town Copperfield instead of Anacoda, as was the intention at first, says the Tonopah Miner.

The town will be located near the Acme tanks, which supply water to the railroad company. The surveyors are now at work subdividing the town sites, as well as other properties owned by the company. A petition which contained 200 signatures has been sent to the postmaster general for the establishment of a post-office. From fifteen to twenty prospectors arrive every day, but on account of poor accommodations they are forced to go to Mina to get the necessities of life. About fifteen tents now adorn the new townsite.

Among those interested in the new enterprise are R. S. Percival, of Tonopah; Otto Taubert, of Denver, and the Bowman-Smith company, of Tonopah. They have twenty claims in close proximity to the scene of the recent big strike. The contact has been traced for five miles and is of granite and limestone. The original locators are at present preparing a statement of copper ore that assays 10 per cent on the surface. The croppings in places assay as high as 50 per cent. It is the belief of those that have been on the ground that most of the new locations will pay from the grass-roots.

Malcolm L. Macdonald visited the new contact this week and inspected a number of the most promising prospects. He states that the surface showing is good, and that the present stage of development work has been done to prove any of the properties, the deep-cut hole in the district being down less than 100 feet. The owners are asking from \$5,000 to \$10,000 for their holdings—prices which Mr. Macdonald considers prohibitive at the present stage of development. The country has been staked for several miles in every direction from the original discovery, and it is impossible for newcomers to secure ground by location.

RUSH ON TO WHITEHORSE. New District West of Deep Creek is Attracting Attention.

(Special to The Herald.) Ely, Nev., March 24.—R. B. Slem and S. M. Miquis have returned to Ely from Whitehorse, where they say good strikes have been made during the last ten days. A rush has been started from Cherry Creek, Mizpah and Dolly Varden camps, and there are now between 200 and 250 men at the point of discovery, and in the mountains nearby.

Mr. Slem says the ores assayed from 12 1/2 to 16 per cent in copper, with good showings in silver and from \$1 to \$2 per ton in gold. A selected sample ran 62 per cent copper, 18 ounces silver and \$3 per ton to the ton. There is plenty of wood in the district and water is supplied in necessary quantity from many small springs. The district is reached by way of Currie's ranch and Green Sliding, and is twenty-two miles from the railroad, west of Deep Creek, in Utah.

The formation is limestone and granite, varying in different parts of the district. The formation is blown out by ledges of capped white iron. One of the good finds was made by Young brothers of Deep Creek, who uncovered a ledge of high grade copper twelve feet in width. The values increase with depth.

The prospectors have appointed Barney Heist as recorder of the district to avoid disputes between prospectors, and a petition has been forwarded to Elko asking that the appointment be ratified by the governor.

WHISKEY BARREL GROUP, ADJOINING DEMIJOHN, SOLD. Mrs. N. Donohue and her son Edward have recently disposed of their "Whiskey Barrel" group of claims to W. S. Anderson of this place and Thomas E. Baker of Macon, Georgia, for the consideration of \$5,000, says the Pioche Record. This group consists of the Whiskey Barrel and Whiskey Barrel Nos. 1 and 2, and is located in the Ely mining district, near the Half Moon and Janet Mining companies' claims. TRACES TRUTH DOWN THE AGES

Is the Law of Harmony in Changing Environment, Says Mr. Eddy.

GREAT SPIRITUAL HEROES ALL WERE STRIVING FOR THE ETERNAL PRINCIPLE.

The services of the First Unitarian society yesterday in Unitarian hall were largely attended. In the course of the service Mrs. Browning and Mrs. Smith sang a beautiful duet and Unity quartette rendered an anthem in which solo parts were taken by Mr. Poll and Mr. Mahan. The sermon by the pastor, Rev. Frank Pay Eddy, was upon "The Reincarnations of Truth."

Mr. Eddy began his discourse with a number of word pictures relating to epoch-making incidents in the lives of some of the great spiritual heroes of the race. He described King Jehoshaphat, burning the roll on which were written the rebuking prophecies of Jeremiah; Socrates before his judges; Paul rebelling against the Jews under the Bo-tree; Paul arguing with the Jewish apostles in Jerusalem; Marcus Aurelius pecking; Mohammed fleeing from Mecca to Medina; Luther nailing his theses on the church door at Wittenberg; Emerson reading his resignation to his congregation in Boston.

Spiritual Heroes. "All these occurrences," said Mr. Eddy, "were, at the time of their happening, more unimportant incidents. It is only in the consequences that they take on themselves dramatic significance." "Our spiritual heroes always struggle against the established, the ancient, the formal, the authoritative. They are prophets, every one of them. Gautama, Buddha, rebelled against a priestly Brahminism; Paul saved Christianity from being absorbed by ritualistic Judaism; Marcus Aurelius taught the great lesson of man as a free moral agent and valued his crown as a small thing compared with the integrity of his soul; Luther rebelled against the idolatry of the Arabian tribes and the scholasticism of the Christians; Luther waged his war on the authority of the church; Emerson proclaimed that the free soul must not compromise.

A Common Motive. "A common motive can discern in all these seekers after truth, love and all inward harmony with the eternal order, that is, with truth and righteousness. "They are all seeking the same diverse enough but always proclaim the spiritual sustenance our human souls obtain by leaning on the eternal, the great, the God, the Divine reason, nature or the moral order, or what we may.

"When we call truth that which is inevitable and eternal harmony, physical and spiritual, which is fixed in the constitution of the universe. Because so fixed it is, it is unchangeable. One great idea may have a thousand rebirths in as many centuries. "The will live in almost any house except that of authority. The priests and the scribes say that is the law and the prophets, and thus saith Moses." But truth has flown, to be refashioned in the heart of one Jesus, the heretic.

Truth Flits With Life. "The trouble is that men are always trying to fix truth to terms, and to exhibit it in some unchangeable and permanent form. We are all as eager to put our own particular tag on truth as a rancher is to rope and brand a stray maverick. "But there is where truth escapes us. If we are content to let it be as it is, that is, in a phase of truth or one of the forms in which truth manifests itself, we are safe. "Authority is seldom so cautious, though. Authority says 'Kings rule by divine right' and in other volumes innumerable. Authority's kingdom is the throne of iron under authority's kingdom; then resurrect if you can this abode principle. "As soon as men say, here is a holy church, a holy Bible or a holy priesthood the spirit of life ebbs out of them. Life leaves them and truth flits with life.

The Law of Harmony. "There is no form of truth necessarily eternal, unless it is the multiplication table. "There is truth in the laws ascribed to Moses, in the maxims and parables of Jesus, in the epistles of Paul, in the dialogues of Plato, the meditations of Marcus Aurelius and in other volumes innumerable. There is truth in the Book of Mormon and in Science and Health, and in the philosophies of the past and the present. Nowhere is there a permanent, unquestionable and invulnerable expression of truth. "Truth flows on as an eternal principle of life in the universe. It is the law of harmony which ceaselessly works in a changing environment. Because the universe is in constant flux, truth must, in order to produce harmony, bring about from day to day new adjustments, and must near in an infinite number of new forms. "He who would have a long acquaintance with truth must be an adventurer and a rover. Truth is friendly to those who run with her. With the dogmatist she will stay scarce a day."
