"THE HOUSE OF QUALITY"

ARE YOU TOO THIN?

Would a little more flesh make you more stylish and attractive? Would it or so pounds more make you better satisfied with your personal appearance? Would your gowns look better and please you and others more if you were a little stouter? If so, do you believe our medicine can give you the additional flesh that you desire?

I PROVE IT FREE

If you write me today I will send you promptly sufficient Dr. Whitney's Nerve and Flesh Builder to prove that it will give you a superb figure with beautiful arms, shapely neck and shoulders, full round bust, and well developed limbs; not for the time being, but permanently.

There will not be a penny of charge for this; my experience proves that I can well afford to take all the risk in proving what this treatment will do. This is a purely vegetable compound and cannot possibly do you any harm but is always of great benefit to the general health.

It will positively enlarge the bust from 2 to 6 inches and give a healthy tint to the complexion; the Free Trial Treatment proves this.

If this generous offer overcrows you it will be discontinued so don't delay, write today to THE C. L. JONES CO., 25 1/2 Realty Bldg., Elmira, N. Y.

Why Maple?

Why do we use Maple Syrup? Not a mixture of cane syrup and maple, but the pure Vermont maple. We boil it into the wheat before flaking.

The main reason is—the children. They like the flavor of the maple better than anything else that is good for them.

We are making a food which we know to be the best for them. Isn't it wise, for all concerned, to induce them to like it?

Mapl-Flake is the perfect food.

It is so because of our process, consuming 96 hours. Because we spend six hours in steam-cooking. Because of our method of curing. Because we toast the thin flakes, for 30 minutes, in a heat of 400 degrees.

There are numerous wheat foods—numerous flaked foods. But we spend four times the time that some others spend in the preparing.

The result is, the starch is digestible.

Raw starch gives scarcely more nourishment than chalk. Half-cooked starch yields half its possible nourishment. But from **Mapl-Flake** you get the benefit of every atom of food that is in it.

What if Mapl-Flake does cost 15 cents, while other flakes cost 10 cents? The cream costs the same on both. And the cream cost is more than the food cost.

Mapl-Flake is all food because it all digests. Isn't it more economical than a food that's half food—a food that but half digests? Besides, the starch that doesn't digest is bound to ferment and breed germs. That is why we spend those 96 hours in preparing Mapl-Flake.
