## JOHN P. SORENSON DIES OF PNEUMONIA

For Twelve Years Held Position of State Fruit Tree Inspector.

John P. Sorenson, for 29 years a resident of Utah and Salt Lake, and state fruit tree inspector for the last 12 years, died yesterday morning at the L. D. S. hospital at 4:50 o'clock, aged 72, of bronchial pneumonia.

JOHN P. SORENSON.

small islands near the mainland of Denmark in 1837, where he lived until he was about 21 years old. He then emigrated to Australia and engaged in the mining business, amassing a large fortune from several gold mines in which he was interested. In 1871 Mr. Sorenson came to the United States and settled in Utah, where he invested his capital in various mining and other projects. According to Mrs. Sorenson, his widow, he has not been very successful in his ventures in this country, losing a great deal of money. Mr. Sorenson had held several political offices during his residence in this state and for many years was land appraiser, in which position he had the choosing of the site of several experimental stations in the southern part of the state. He has been a staunch Republican all his life.

### CITY BREVITIES

**A GRAVEL PIT** covering three acres near Eleventh East and Twelfth South streets will be sold at auction by the board of county commissioners next Monday. The county has used a great deal of the gravel, but has no more use for a pit at that location.

The final details in the contract with the Pauly Jail Building company will be closed by the board of county commissioners January 3. The original contract was made in two sections, under the law, but the whole work was let to the Pauly company. Sheriff Joseph C. Sharp expects to have his little housewarming in Second East street about April 1.

## COAL SHORTAGE IS BECOMING SERIOUS

It is Claimed Railroads Are Not Able to Move the Cars.

Unless additional cars are provided, or the railroad companies figure out some way to keep the cars now in use hauling coal to Salt Lake moving after they have been loaded at the mines, the city will be literally "up against" it for coal within a few days.

The managers of the different coal companies say that their mines are with few exceptions running to full capacity, but the trouble seems to be with the railroads. According to one of the general sales agents, the railroads are sometimes not even able to move their cars when loaded at the mines.

One large concern with headquarters in this city has been advertising widely for the past week for 100 miners, but the manager of this company said yesterday that even if they are secured it will still be up to the railroads, as they are now working five mines to full capacity, and are having all kinds of trouble in getting the coal away from the mines. Delays to the coal train are frequent, which is another cause of the threatened shortage.

No trouble has been experienced so far in filling orders, but with six or eight tons of coal in their yards after the day's hauling has been done, the coal companies are wondering how long it will be before they will find it impossible to supply the demand. As the city consumes over a thousand tons of coal daily, and as at present only about 300 tons are arriving daily over the various railroad lines, it can easily be seen that the situation is serious.

## MORE SNOW IS PROMISED

Weather Man Says Fall Will Cause a Rise in Temperature.

More snow today is the promise of the weather man, in his report yesterday. The fall of snow will be accompanied by rising temperatures. Though somewhat warmer yesterday, the mean being 22 degrees, the temperature was still nine degrees below the normal today, and as at present only about 300 tons are arriving daily over the various railroad lines, it can easily be seen that the situation is serious.

Temperatures east of the Rocky mountains are still much below normal. Denver yesterday was 2 degrees below zero, and Huron, S. D., was reported as 12 degrees below zero.

Following is the weather report until 6 o'clock p. m. today: "The barometric pressure has fallen over the whole country, except in the Missouri valley. Areas of depression lie central north of the lakes and over California. The temperatures continue low east of the Rockies, where they are much below the normal. The lowest temperature yesterday morning at 6 o'clock was 12 degrees below zero at Huron, S. D., and 4 degrees below at Bismarck, N. D. But on the southern portion of the eastern slope of the Rockies very low temperatures prevail. It is 4 degrees at Abilene, Tex., which is 33 degrees below the normal, and at other stations it is from 15 to 25 degrees below the normal temperatures. West of the Rockies the temperatures are on the average higher, due to the very decided fall in the barometer. Precipitation occurred in the northern tier of states and generally west of the 105th meridian."

## SIDESTEP RESPONSIBILITY

City Council Refuses to Raise Police and Firemen's Pay.

The present city council, which will become a matter of history in less than two weeks, refused last night to assume the responsibility of raising the pay of police and firemen and rearranging the schedules of compensation. The proper committees reported that the recommended increases should be granted, but there was a division of sentiment in regard to the matter, and it was finally put up to the new council. The matter has been hanging fire for months, and the schedules of pay, with few exceptions, are the same as have been in vogue for years. The proposed
