WHY STONE WALLS ARE DAM

Sudden Changes of Weather Responsible—Easy to Remedy.

The walls of a stone house, an sometimes of a brick house, are covered with dampness. This is due to the very same causes by which dew is deposited on grasses or moisture on the side of a glass or pitcher that is filled with ice water and brought into a warm room. The walls become cold, and as stone is a nonconductor of heat, they remain cold for a long time. When the weather changes suddenly from cold to warm the air becomes filled with moisture, for the warmer the air the more moisture it will absorb. When this warm air strikes the cold walls the moisture is deposited on it from the air, which is suddenly cooled by contact with them, and as the warm air is continually coming in contact with the cold walls, the dampness accumulates until it appears like a dew upon them, and pours down in streams at times. It is easily prevented. No plaster should be put directly upon brick or stone, but furring strips should be nailed to the walls and laths put on these. Cellars are frequently made very damp in the same way by too much ventilation in warm weather.

First Apples Brought to America.

John Winthrop is usually held responsible for the introduction of the apple into the New World. But as a matter of fact when Winthrop anchored off Cape Ann the recluse Blackstone already had apple trees growing about his cabin at Shawmut Neck. Some of the best of our American apples were brought over by the Huguenots, who settled in Flushing, L. I. in 1660, and planted there, among others, the pomme royale or spice apple.

Queen's Betrothal Kiss.

No more celebrated kiss was ever given than that bestowed on Nov. 22, 1851, in the gallery of Greenwich Palace, by Queen Elizabeth upon the Duc d'Alencon, one of the suitors for her hand, whom, in the presence of Walsingham and Leicester, she kissed upon his coarse lips and, placing her ring upon his finger, presented to her courtiers as their future master.

OPEN PUBLICITY THE BEST GUARANTY OF MERIT.

When the maker of a medicine, sold through druggists for family use, takes his patients fully into his confidence by frankly and fearlessly publishing broadcast as well as on its bottle wrappers, a full list of all its ingredients in plain English, this action on his part is the best possible evidence that he is not afraid to have the search light of investigation turned full upon his formula and that it will bear the fullest scrutiny and the most thorough investigation. Dr. Pierce's Favorite Prescription for the cure of the weaknesses, periodical pains and functional derangements of the organs distinctly feminine, is the only medicine put up for sale through druggists for woman's special use, the maker of which has published to his patients into his full confidence by such open and honest publicity.

A glance at the published ingredients on each bottle wrapper, will show that it is made wholly from native, American medicinal roots, that it contains no poisonous or habit-forming drugs, no narcotics and no alcohol—pure, triple-refined glycerine, of proper strength being used instead of the commonly employed alcohol, both for extracting and preserving the active medicinal properties found in the roots of the American forest plants employed. It is the only medicine for women's peculiar diseases, sold by druggists, that does not contain a large percentage of alcohol, which is in the long run so harmful to woman's delicate, nervous system. Now, glycerine is perfectly harmless, and serves a valuable purpose by possessing intrinsic value all its own, and besides it enhances the curative effect of the other ingredients entering into the "Favorite Prescription."

Some of the ablest medical writers and teachers endorse these views and praise all the several ingredients of which "Favorite Prescription" is composed—recommending them for the cure of the very same diseases for which this world-famed medicine is advised. No other medicine for women has any such professional endorsement—worth more than any number of ordinary testimonials. If interested, send name and address to Dr. R. V. Pierce, Buffalo, N. Y., for his little book of extracts from the works of eminent medical writers and teachers endorsing the several ingredients and telling just what Dr. Pierce's medicines are made of. It's free for the asking.

Arthur Chapman and Thomas Murray, each 17 years old, committed two highway robberies in San Francisco, fractured one man's skull and cruelly beat the other. One of the victims, Charles Aman, aged 61 years, is likely to die. The other, A. T. Jaffin, was not seriously hurt.

AWFUL ITCHING ON SCALP.

Hair Finally Had to Be Cut to Save Any—Scalp Now in Good Condition Cured by Cuticura.

"I used the Cuticura Soap and Ointment for a diseased scalp, dandruff, and constantly falling of hair. Finally I had to cut my hair to save any at all. Just at that time I read about the Cuticura Remedies. Once every week I shampooed my hair with the Cuticura Soap, and I used the Ointment twice a week. In two months' time my hair was long enough to do up in French twist. That is now five years ago, and I have a lovely head of hair. The length is six inches below my waist line, my scalp is in very good condition, and no more dandruff or itching of the scalp. I used other remedies that were recommended to me as good, but with no results. Mrs. W. F. Griess, Clay Center, Neb., Oct. 23, 1905."

EXPLANATION DEMANDED BY BRITISH GOVERNMENT

Rejostvensky Charges That the British Fleet Was Held in Readiness to Sink His Ships if the Japanese Failed.

St. Petersburg.—The remarkable allegation that the British fleet was held in readiness to destroy the Russian fleet if the battle of the Sea of Japan had gone in the Russian's favor, is made by Admiral Rejostvensky in a letter published in the Novoe Vremya on Wednesday with the permission of the minister of marine. Referring to the absolute secrecy of Admiral Togo in regard to the disposition of his forces, Rejostvensky declares that "this was unknown even to the admiral of the British fleet allied with the Japanese, who concentrated his forces at Wei Hai Wei in expectation of receiving an order to annihilate the Russian fleet if this, the final object of Great Britain, was beyond the power of the Japanese."

Mr. Spring-Rice, the British charge d'affaires, without waiting for instructions from his government, demanded an explanation from Foreign Minister Lamsdorff of the statements contained in the admiral's letter to the Novoe Vremya.

TORNADO IN GEORGIA.

Two Killed and Several Injured by Twister.

Albany, Ga.—A tornado passed over this town Wednesday afternoon, coming from a southwesterly direction, and spreading ruin and desolation over portions of a dozen blocks.

Ben Jones, a negro machinist in the employ of the Virginia-Carolina Chemical company and Jake Johnson, a 9-year-old negro boy, were killed.

The known injured are Luta Glad, Jessie Davis, Annie Davis and Jessie Woodall. Hundreds of negroes in the city are homeless tonight and many have lost their household effects. The total property loss will reach \$150,000. The Virginia-Carolina Chemical company is the principal sufferer, its destroyed buildings and machinery having been worth probably \$60,000. Very little of the destroyed property was protected by tornado insurance.

AFTER CHAUNCEY'S SCALP.

New York Legislator Asks Depew to Shed His Toga.

Albany, N. Y.—Senator Brackett of Saratoga, soon after the legislature convened on Wednesday, introduced a resolution demanding of Chauncey M. Depew his resignation as United States senator from this state. Later the resolution was withdrawn. The withdrawal followed a long debate in the senate. In recalling it, Senator Brackett specified that he intended to introduce it again at a later date. Senator Raines, who wanted immediate action, in which he desired to defeat the resolution, objected to its withdrawal, but upon roll call the withdrawal was allowed by a vote of 27 to 19.

Mr. McCall's salary was \$100,000. The board of trustees also cut down the number of second vice presidents, so that hereafter there will be two of these officers, instead of three.

Starving in North Japan.

Victoria, B. C.—The famine in north Japan is causing thousands to starve, according to advices received by the steamer Empress of Japan. A government report says Miyagi, Fukushima and Iwate provinces, with a population of 2,821,557, is confronting the worst famine since the deadly one of sixty years ago. So great is the calamity in Miyagi that famine investigators report as follows: "The sentence of death has been passed on one-third of the people of the province."

"Vaudeville."

The name "vaudeville" is understood to be a corruption of Vaux de Vire, the name of two picturesque valleys in the Bocage of Normandy, and was originally applied to a song with words relating to some story of the day. These songs were first composed by one Oliver Baselin, a puller in Vire; they were very popular and spread all over France, and were called by the name of their native place (Les Vaux de Vire).

TITLES ONLY FOR WEALTHY.

Englishmen Must Have Certain Income Before Ennoblement.

Sordid questions of finance enter into the consideration of the eligibility of those upon whom an English monarch would confer the distinction of knighthood, and there are many who might use the coveted prefix "Sir" did they possess a larger income.

It is, roughly speaking, a rule that knighthood shall not be conferred upon any one who has not an income of at least \$15,000 upon which to maintain his knightly dignity, while a baronet, before his creation, must not only be found to have an income of at least \$50,000 a year, but must further be able to purchase a country seat and be able to suitably provide for his eldest son.

While knighthood or ennoblement is a mark of distinction awarded for distinguished merit, it is held that its conferment would only embarrass those who could not afford to keep up the dignity of their station.
